Subject: RE: Request for Human Subject Clearance for DTBE/DASH NPIN SOW
Date: Monday, May 14, 2018 11:22:46 AM

Hello Molly,

I have reviewed the SOW entitled " Communication Message Concept Testing and Optimization – Division of TB Elimination (DTBE) and Division of Adolescent and School Health (DASH) ". The purpose of this task is to explore and test message concepts about latent tuberculosis (TB) infection among high-risk population. This SOW does not involved human subjects. However, if the purpose of this activity changes, please resubmit for human subjects review.

Thank you,
Janella

Subject: Request for Human Subject Clearance for DTBE/DASH NPIN SOW

Hello,

We are in the process of drafting and submitting a statement of work. As part of this process, clearance from your office is required. Please see the attached statement of work for your review and approval/clearance.

Thank you,

Molly Dowling, MPH, CHES
