Number and street name | Area Code | Telephone Number | Ext.

City | State | ZIP Code

B. Product Preference

Please mark (X) only one

☐ **GUPS** – The Census Bureau's Geographic Update Partnership Software (GUPS) is a self-contained Geographic Information System (GIS) tool. It includes the Census Bureau's address list, address count list by census block, and partnership shapefiles. GUPS allows you to add external geospatial data (shapefiles, geodatabases, and imagery) for comparison and update purposes. GUPS functions on Windows XP, Vista, and Windows 7, 8, and 10, and Apple Mac OS X with additional bridge software.

☐ **Digital Address List and Shapefiles** – The Census Bureau provides the address list and address count list, by census block, in Excel (.xlsx) and Comma Delimited Text (.csv) format. (Choose preference below). Partnership shapefiles are provided and require the use of Geographic Information System (GIS) software. Address structure points are ***not*** included in the partnership shapefiles but can be created from the latitude/longitude coordinates included on the digital address list.

.☐ Excel **OR** ☐ Comma Delimited Text File

C. County(ies) Selection

Mark (X) only one

☐ **Send data for ALL counties (or county equivalents) in our state.**

☐ **Send data for the county(ies) or county equivalent(s) marked below.**
