Vessel Sanitation Program Acute Gastroenteritis Log

Form Approved
OMB No. 0920-1260
Exp. Date 04/30/2022

Note: The Header/Banner section of the AGE Surveillance Log must be completed for EVERY voyage, even if the case counts are zero for both passenger and crew. Even if there is an underlying illness, there may be justification in reporting the patient as reportable. This should be based on sound clinical judgment and based on medical practice. Enter "none" if there is no underlying illness.
