As part of the COVID-19 Public Education Campaign market research efforts, the Current Events Tracker (CET) is a flexible survey vehicle designed for easy addition or removal of questions as applicable to the current environment. This wave includes new questions on boosters including reasons for or for not getting one as well as a knowledge check; on vaccination of children including having a pediatrician, preferred location to vaccinate child(ren), and reasons for not vaccinating child(ren); and on testing behaviors including tests taken, results, and ability to procure an at-home test or appointment at a healthcare facility.
