Please destroy your old PRC and wait for the new PRC to arrive in the mail before you try to register a password.

## What You Can Do With Your Password

You can use your password and Social Security number to view and make changes to your information online or by phone (for example, you can change your address or check your benefit information). In order to use your password to view and make changes, you must have received:

- Your notice of benefit payment, or
- Your first payment.

**NOTE:** If you are a new beneficiary, you can only use this password to check your information starting with the first month your benefit payment begins. You can find this start date on the notice of benefit payment letter that we sent to you.

Please protect your password and do not keep it with your Social Security number.
