

Supplemental Justification for Revised Collection Instrument HA-1151

0960-0662

**Re: Medical Source Statement of Ability To Do Work-Related Activities
(Physical) -- HA-1151**

Per our correspondent of August 8, 2006 attached is the corrected edition of the HA-1151, (entitled **HA-1151 1-2006**) and the previously submitted form for comparison (entitled **HA-1151 09-05 EDITION**). Outline below are the revisions between the originally submitted HA-1151 and the final version of the form dated 06/2006:

- Page 1, last paragraph under the defined terms, added “Age and body habits of the individual should not be considered in the assessment of limitations. Added the word “clinical” after “particular medical” in second sentence.
- Page 1, under lifting and carrying, added “Up” to B.; changed “21” to “20 in C.; changed “51” to “50 in D.
- Page 2, added section on use of a cane (the addendum in the OMB package discusses this section)
- Page 7, added “or clinical findings” in paragraph after chart and in item IX last line.
- Added to the paragraph at the bottom of each of the sections the language: “and why the findings support the assessment.”

Naomi,

I just talked with Rachel and she said it's okay to do the change sheet to implement the changes on the HA-1151.

[Did any members of the public request copies of the package during either the 60 day or 30 day review? If so, did the copies they received contain the correct version of this form? Did SSA receive any comments during either comment period? Thanks.](#)

[Hi Rachel,](#)

[I'm doing follow-up for Liz on this one. Have you had a chance to review the below requested action? This collection was approved back in April, but the most recent version of the form was mistakenly not included in the package. Attached are both forms for comparison and below an explanation of the revisions. I don't believe these represent significant changes; mainly "updated clarifying language" and we will follow-up with a change sheet. Also I know the component is anxious to move forward with this so if you could get back to me sometime today I would appreciate it. Give me a call with any questions.](#)

[THANKS!](#)

-
Rachel,

-
The first attachment is the form we believe was included in the OMB clearance request.
The second attachment is the form we intended to clear. Below is a comparison of the forms.

-
- Page 1, last paragraph under the defined terms, added “Age and body habitus of the individual should not be considered in the assessment of limitations. Added the word “clinical” after “particular medical” in second sentence.
- Page 1, under lifting and carrying, added “Up” to B.; changed “21” to “20 in C.; changed “51” to “50 in D.
- Page 2, added section on use of a cane (the addendum in the OMB package discusses this section)
- Page 7, added “or clinical findings” in paragraph after chart and in item IX last line.
- Added to the paragraph at the bottom of each of the sections the language: “and why the findings support the assessment.”

-
We will prepare a change sheet after your review. Thanks.
