Attachment C. Changes to EDEN Data Set From 2005-06 to 2006-07

Introduction

The changes proposed to EDEN for the 2006-07 reporting year represent the culmination of meetings with numerous program offices within ED to determine their data collection and reporting mandates. Additionally, the EDEN team has worked closely with the Education Information Management Advisory Consortium (EIMAC) of the Council of Chief State School Officers and state EDEN coordinators to understand the numerous challenges at the state level associated with collecting the data needed for EDEN and preparing and submitting EDEN files. Finally, the team, working to consolidate the EDEN and NCES' Common Core of Data (CCD) data collections, identified a small number of changes needed in order to align EDEN with the CCD. As part of this consolidation effort, the EDEN team examined virtually of the data groups and data categories approved for EDEN for 2005-06.

While the vast majority of the data groups and data categories approved for EDEN for the 2005-06 reporting year remain unchanged, the comprehensive examination uncovered data groups that do not meet program office needs and will be eliminated, data groups that need revision, and data groups that need to be added.

This attachment contains a detailed description of the proposed changes to EDEN from the 2005-06 to the 2006-07 reporting year. For a full listing of all data groups and data categories proposed for collection through EDEN for school year 2006-07 (including data groups and data categories with no proposed changes) refer to Attachment B of this OMB clearance package.

This attachment is organized to provide a description of the significant changes to EDEN proposed for the 2006-07 reporting year by providing detailed discussions of changes to first the data groups and second the data categories for 2006-07. (Some non-substantive, technical and editorial corrections are not included in this attachment.) Although the data for the data groups in the survey and on-line data collection sections are submitted through means other than the ESS, they are included in the discussion of data groups and categories. Each section starts with an overall summary followed by a series of tables and summary text that are organized by the type of proposed change.

Changes to EDEN Data Groups for 2006-07

- **New Data Groups** – This table lists the new data groups. The table includes the name, identification number, definition, code set, reporting level and steward of the new data groups, and the name of the section of attachment B where the rest of the information on the data group may be found. This section is presented in alphabetical order by data group name.

- **Dropped Data Groups** – A small number of data groups are proposed for removal for the 2006-07 EDEN data cycle. This list is provided in alphabetical order.

- **Name Changes** – This table lists the existing data groups where the name of the data group will be changed for 2006-07. Since the data group number will remain unchanged, the list is presented in order by data group number and includes both the old and the new name of the data group.

- **Changes to Data Groups** – There are a number of proposed changes to the EDEN data set for 2006-07 that revise the definition, category sets, collection level, and/or code sets used within specific data groups. In this section, there is a separate page for each revised data group presented in alphabetical order by data group name. Each page shows the data group as collected for 2005-06 and the proposed changes for 2006-07. Data group changes that do not affect state submissions (e.g., editorial changes) are not included here.

Changes to EDEN Data Categories for 2006-07

- **New Data Categories** – This table lists all of the proposed new data categories for 2006-07. The table includes the definition, the code set, comments, and the EDEN data groups that use the new category. This list is presented in alphabetical order by name of the data category.

- **Dropped Data Categories** – A small number of data categories are proposed for removal for the 2006-07 EDEN data cycle. This list is provided in alphabetical order.

- **Data Category Changes** – For the 2006-07 reporting year, there are a number of proposed changes to definition and/or code sets used with the data categories. Within this section, there is a page for each data category with a change. The page shows the data category as used for 2005-06 as well as all of the changes proposed for 2006-07. These pages are organized in alphabetical order by name of the data category. Data category changes that do not affect state submissions (e.g., editorial changes) are not included here.

Changes to EDEN Data Groups for 2006-07

Summary of Data Group Changes from 2005-06 to 2006-07

Overall, there were 168 data groups approved for the 2005-06 data collection.[1] As shown in the table below, the number of data groups changed to 186 for 2006-07. These figures include all data groups – regular data groups (collected through ESS) as well as the survey data groups and the data groups associated with the on-line data collection.

	Number of Data Groups
Final 2005-06 Data Groups	168
Changes for 2006-07	
Data Groups Added	40
Data Groups Dropped	22
Total Number of Data Groups for 2006-07	186

New Data Groups

Of the 40 new data groups shown in this table, 12 of them are for the Office of Civil Rights Survey and do not directly impact on state EDEN reporting burden. Additionally, several of the data groups classified as new are spin offs from existing data groups. For instance, the state neglected or delinquent data groups did not collect information for LEA and state agency programs separately. Now those are separate data groups. Finally, in addition to changes in the overall number of data groups between 2005-06 and 2006-07, the EDEN team made changes to the level at which data groups are collected. For 18 data groups, the school level data collection was eliminated, thereby reducing reporting burden.

The following table shows the proposed new data groups for the 2006-07 EDEN reporting cycle. For each new data group, we provide the name, definition, section, data category sets, reporting level, and data steward.

[1] The staff data group for the Migrant Education Program (MEP) originally collected both FTE and Headcount in the same data group for 2005-06. For clarity, these two counts were divided into separate data groups thereby increasing the total number of 2005-06 data groups from 167 to 168.

Dropped Data Groups

As part of the program office meetings that took place as input for the 2006-07 EDEN data set, the EDEN team determined that a number of existing EDEN data groups do not meet program office needs and will therefore be dropped from EDEN for 2006-07. The following table shows the 22 data groups proposed for elimination.

Data Group Name Changes

While most of the names of the EDEN data groups are self explanatory, the EDEN team has determined that some use terminology that has led to confusion among state EDEN coordinator and program offices in ED. Additionally, for 2005-06 there were a number of inconsistencies in the names of data groups that are being corrected for 2006-07.

The following table shows all of the changes to data group names for 2006-07 (in order by data group number). All of the data group numbers remain unchanged.

Data Group Changes (Part I)

The changes shown in the following pages are the result of input from three important sources: state EDEN coordinators, program offices in ED, and comments during the initial public comment period. The EDEN team strives to minimize the number of changes to data groups from one year to the next but at the same time recognizes that program office reporting needs change and that refinements may be necessary to existing data groups in order to ensure consistent reporting from one state to the next and maximize the number of states able to provide data.

The following pages show each data group that has a change (in order by section and alpha order by section). Approximately one third of the data groups with changes are provided in this document. The remaining two thirds are in C-2 and C-3. The left side of the page shows the data group as approved for the 2005-06 EDEN reporting cycle. The right side of the page shows the proposed data group for 2006-07. There are check boxes to the right of each element of the data group – Section, Definition, Code Set or Format, Category Set, Subtotal, and Reporting Levels. All changes are marked with these check boxes. Additional notes regarding the change(s) are provided in the far right column of each page.
