

DOE Manpower Survey

Department of Energy

DOE Manpower Survey

Introduction

We want to thank you for taking time for this survey. This survey will take about 12 to 15 minutes. We would like to reassure you that the information you provide here is to evaluate Department of Energy's activities, not your research activities under the grant. The purpose of this survey is to help the Department understand the impact of its grants on scientific and technical training. Data collected here will be pooled with all other interviews to ensure confidentiality.

Please refer to the pre-notification e-mail about the DOE grant number that is the subject of this survey.

Before we ask about the employment situation of your grant, it is important to note that some grants have subcontractors, and/or are conducted at multiple sites. This survey refers to sites other than your location as *alternative sites*.

• 2. Does this grant have any subcontract?

Yes

No

Back

Continue

DOE Manpower Survey

The following questions concern with your research activities conducted locally. They are to exclude any subcontract or alternative site.

Let's start by identifying the number of graduate students who are working under this grant. Graduate students include both Ph. D. and master students.

DOE Manpower Survey

Department of Energy

DOE Manpower Survey

In addition to graduate students, post-doctoral fellows and PIs, grants could employ other technical and non-technical personnel. By technical personnel, we mean persons, who are neither graduate students nor post-doctoral fellows, engaged in technical activities. For example, lab technicians or computer programmers, or engineers. These types of personnel can include undergraduate students.

DOE Manpower Survey
