In the 12 months beginning April 1, 2006, and ending March 31, 2007, how many ADMISSIONS for substance abuse treatment did this facility have? Count every admission and re-admission in this 12-month period. If a person was admitted 3 times, count this as 3 admissions.

For outpatient clients, consider an admission to be the initiation of a treatment program or course of treatment. Count admissions into treatment, not individual treatment visits.

If data for this time period are not available, use the most recent 12-month period for which you have data.

If this is a mental health facility, count all admissions in which clients received substance abuse treatment, even if substance abuse was their secondary diagnosis.
