1	PRESCRIBED MEDICINE	Display name of prescribed medicine PMED.PMEDNAME

```

Roster Definition:
This item displays the PERSON'S-PRESCRIPTION MEDICINES-ROSTER
for selection and addition of medicines associated with this
HS..
=====
Roster Behavior:
1. Multiple select allowed.
2. Multiple add allowed.
3. Limited delete allowed. Interviewer may deletd medicines
added at the section as
long as CAPI has not yet created the link between this PMED
and the EVNT.
If delete is attempted at a time when it is not allowed
(i.e., after the link is established), display the
following error message: 'DELETE ALLOWED ONLY
WHEN MEDICINE IS FIRST ENTERED.'
4. Limited edit allowed. Interviewer may edit the
name of a PMED added on this screen as long as
CAPI has not yet created the link between this
PMED and the EVNT. If edit is attempted at a time
when it is not allowed, display the following error message:
'EDITING ALLOWED ONLY WHEN MEDICINE IS
FIRST ENTERED.'
5. Any medicine added to the roster should be flagged
as 'created' this round. Any
medicine selected at the roster should be flagged
as 'selected' this round. This
flagging should occur at each person's-prescribed
-medicines-roster throughout the instrument (unless
otherwise specified), the first time the medicine is
added or selected during the round. For example,
if it is Round 1, all medicines on the roster would
have the flag 'created - Round 1'. If a medicine is
created in HS, but selected in MV, all during round
1, it would only have the flag 'created - Round 1'.
Thus, for any one round, a medicine can be
flagged only as either 'created' or 'selected'. If it is
Round 2
and a medicine that was created in round 1 is
selected, it should be flagged as 'selected -
Round 2'. This flag is in addition to the original
'created - Round 1' flag.
6. When a medicine from a previous round is selected,
a new event is created since it involves a new
purchase of the medicine. A new purchase requires asking
CP and
the pharmacy. The reason for including all of the
prescribed medicines on the roster is simply to avoid
the interviewer having to type them in again (if the
person is getting refills of the same medicine every
round).
