I am writing to ask your help in making sure that we are paying you the correct amount of Social Security benefits. We need you to give us current information about your work.

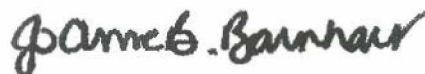

Earnings in the months before a person becomes full retirement age (currently age 65 and 6 months for people born in 1949 and gradually increasing to 67 for persons born in 1960 or later) can reduce the amount of Social Security benefits. Because we want to make sure that we pay you accurately, we want you to give us an earnings estimate for this year.

The enclosed form has some questions about your work for this year. After you complete it, please mail it in the enclosed envelope. We need to hear from you as soon as possible.

Thank you for taking the time to assist us. We would like to give you the best possible service and hope that you find this form a convenient way to inform us about your work.

If you have any questions, you can call us toll free at 1-800-772-1213, 7:00 a.m. to 7:00 p.m. Monday through Friday. We can answer most questions over the phone. Our busiest times are the first week of the month and Mondays. So, we may be able to handle your call more quickly if you can call us at other times. If you prefer to visit or call one of our offices, use the 800 number and we can give you the office address and telephone number. Please have this letter with you if you call or visit an office. It will help us answer your questions.

Sincerely,

Commissioner

### How to Estimate Your Earnings for 2005

- In 2005, the full retirement age for people born in 1940 is age 65 and 6 months. If you were born on the first day of the month, we consider you to have reached full retirement age in the prior month. For example, if your birthday is June 1, we treat you as if you reached full retirement age in November. This means if you were born June 1, 1940, you only have to report wages for January through October. Question 1 shows the month you will reach full retirement age.

If you were born <sup>August 40</sup> October 2, 1939 through January 1, 1940, you will reach full retirement age in 2005 (age 65 and 4 months). This means you only have to report wages for the months before you reach full retirement age in 2005. Question 1 shows the month you will reach full retirement age.

- If you are paid wages, base your estimate on what you expect to earn before taxes or other deductions up to the month you become full retirement age. Be sure to include bonuses, vacation pay, sick pay, tips of \$20 or more a month, and any contribution that you make from your salary to a tax deferred savings plan.
- Drop from your estimate any money you will get from your employer prior to the month you are full retirement age for work you did last year or before. Also, do not include:
  - Social Security, railroad or civil service retirement, veterans, black lung or public assistance benefits;
  - pensions and other retirement payments which are not reported on your W-2 form;
  - investment income;
  - interest from savings accounts;
  - life insurance annuities and dividends;
  - gifts or inheritances;
  - gain (or loss) from the sale of capital assets;
  - rental income;
  - unemployment or worker's compensation;
  - jury duty payments.
- If you are self-employed, base your estimate on what you think your net earnings will be - just like on your tax return. If you became entitled to Social Security benefits before 2005 (1) do not include in your estimate any Federal agricultural program payments you expect in 2005, and (2) do not include self-employment income received in 2005 from carry-over crops for work you did before you became entitled to Social Security benefits.
- If you are self-employed, we will reduce your estimated self-employment earnings to adjust for the period you are full retirement age and over.

Now, you are ready to answer the following questions about your earnings. And again, it is important for us to hear from you.

Your Monthly Earnings

Now you need to go back, and estimate how much you will earn each month up to but not including the month you become full retirement age. We need to know this because we pay you based on how much you will earn each month.

33,240 It works like this. Usually, if you make more than the earnings limit, which in 2005 is \$31,800, we have to hold back some of your Social Security. But if we know how much you plan to earn in each month in 2005 before full retirement age we may be able to pay you more.

The same is true of self-employed people. The difference is that we will need to know how many hours you work in each month before full retirement age, instead of the amount of money you will earn.

Please go on to the next question.

For the following months in 200<sup>6</sup>, you previously told us that you will not earn over \$2,6~~50~~<sup>770</sup> and will not work over 45 hours in self-employment.
