

INSTRUCTIONS

1. Prepare in duplicate copy. The original copy of the complete report should be submitted to the Poultry Improvement Staff, Building 265, BARC - East, Beltsville, Maryland, 20705, as changes occur in participation. These reports will be used in preparing supplements to publications APHIS 91-41 and 91-42. The duplicate copy should be retained in the office of the Official State Agency.
2. List participants alphabetically, by Subparts, with the complete mailing address of each participant, including Zip Code.
3. Subpart or Type of Poultry - Indicate Subpart for which participant's products are qualified, as follows:
 - B** - Egg Type Chickens
 - C** - Meat Type Chickens
 - D** - Turkeys
 - E** - Waterfowl, Exhibition Poultry, and Game Birds
4. For hatcheries - the egg capacity should include both incubating and hatching capacity. For dealers - use this column to indicate the type of products each dealer offers for sale with the following codes. Leave column blank for Independent Flocks.
 - E** - Hatching Egg dealer
 - C** - Chick dealer
 - E & C** - Dealer in both hatching eggs and chicks
 - P** - Poulter dealer
 - E & P** - Dealer in both hatching eggs and poults
5. List the code for the breed or variety (including strain and trade names) of products handled in the column "Products Classified U.S, Pullorum-Typhoid Clean." The codes which were published in the tables of stock codes in the latest revision of publications APHIS 91-41 should be used. Stocks not included in the tables should be assigned a code by the reporting Official State Agency and the code explained on a supplementary sheet.

Crosses should be designated by combining the code letters and numbers of the stocks involved, indicating the variety of the male first. For example, b1c2 would indicate Arbor Acres Rhode Island Red males mated to Colonial Barred Plymouth Rock females.

6. Additional diseases and breeding classifications for the individual products handled should be indicated in the "Additional classification For Which These Products Qualify" column. For those products that have an additional disease classification as well as a breeding classification, always list the disease classification first. The following abbreviations should be used for these additional classifications:

- MG** - U.S. M. Gallispticum Clean
- MS** - U.S. M. Synoviae clean
- App** - U.S. Approved
- None** - No classification other than U.S. Pullorum-Typhoid Clean

The following is an example of a report for one hatchery:

NAMES AND ADDRESS OF PARTICIPANTS (List alphabetically by Subpart and give complete mailing address of each, including zip code)	SUBPART OR TYPE OF POULTRY	EGG CAPACITY OR TYPE OF DEALER	PRODUCTS CLASSIFIED :U.S. PULLORUM-TYPHOID CLEAN"	ADDITIONAL CLASSIFICATIONS FOR WHICH THESE PRODUCTS QUALIFY
