SUPPLEMENTARY INFORMATION:

I. Background

The Department of Labor, as part of its continuing effort to reduce paperwork and respondent (i.e., employer) burden, conducts a preclearance consultation program to provide the public with an opportunity to comment on proposed and continuing information collection requirements in accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3506(c)(2)(A)). This program ensures that information is in the desired format, report burden (time and costs) is minimal, collection instruments are clearly understood, and OSHA's estimate of the information collection burden is accurate.

The Occupational Safety and Health Act of 1970 (the OSH Act) (29 U.S.C. 651 *et seq.*) authorizes information collection by employers as necessary or appropriate for its enforcement or for developing information regarding the causes and prevention of occupational injuries, illnesses, and accidents (29 U.S.C. 657). The OSH Act also requires that OSHA obtain such information with minimum burden upon employers, especially those operating small businesses, and to reduce to the maximum extent feasible unnecessary duplication of efforts in obtaining information (29 U.S.C. 657).

The general industry PPE standards (29 CFR part 1910, subpart I) include several paperwork requirements.¹ The following describe the information collection requirements:

Hazard Assessment and Verification (29 CFR 1910.132(d)). Paragraph (d)(1) requires that the employer assess work activities to determine whether there are hazards present, or likely to be present, which necessitate the employee's use of PPE. If such hazards are present, or likely to be present, the employer must communicate selection decisions to affected employees and verify that the required occupational hazard assessment has been performed. Paragraph (d)(2) requires that the verification document, which must be identified as a certification of hazard assessment, must contain the following information: occupation, the date(s) of the hazard assessment, and the name of the person performing the hazard assessment.²

The hazard assessment assures that potential workplace hazards necessitating PPE use have been identified and that the PPE selected is appropriate for those hazards and the affected employees. The required certification of the hazard assessment verifies that the required hazard assessment was conducted.

Training and Verification (29 CFR 1910.132(f)). Paragraph (f) requires that employers provide training for each employee who is required to wear PPE. Paragraph (f)(3) requires that employers also provide retraining when there is reason to believe that any previously trained employee does not have the understanding and skill to use PPE properly. Circumstances where such retraining is required include changes in the workplace or in the types of PPE used that render prior training obsolete, and inadequacies in the employee's knowledge or use of PPE that indicate the employee had not retained the requisite understanding and skill.

Paragraph (f)(4) requires that employers certify that employees have received and understood the PPE training required in § 1910.132(f). The training certification must include the name of the employee(s) trained, the

¹ The Information Collection Request (ICR) does not include burden hours and costs associated with the information collection requirements in the standards on respiratory Protection (29 CFR 1910.134) and Electrical Protective Equipment (29 CFR 1910.137), both of which have been addressed in separate Information collection Requests (ICRs). See OMB Control Nos. 1218-0099 and 1218-0190, respectively.

² Paragraph (g) of § 1910.132 specifies that the section's hazard assessment (paragraph (d)) and training (paragraph (f)) requirements only apply to PPE for the eyes and face, head, feet and hands.

date of training, and the subject of the certification (i.e., a statement identifying the document as a certification of training in the use of PPE).

The training certification verifies that employees have received the necessary training and know how to properly use PPE. OSHA compliance officers may require employers to disclose the certification records during an Agency inspection.

The part 1910 standards on PPE protection for the eyes and face (§ 1910.133), head (§ 1910.135), feet (§ 1910.136), and hands (§ 1910.138) do not contain any separate information collection requirements.

II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information collection requirements are necessary for the proper performance of the Agency's functions, including whether the information is useful;
- The accuracy of OSHA's estimate of the burden (time and costs) of the information collection requirements, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply; for example, by using automated or other technological information collection and transmission techniques.

III. Proposed Actions

OSHA is requiring OMB to extend their approval of the collection of information requirements contained in the general industry PPE standards. The Agency is requesting an increase in burden hours for the existing collection of information requirements from 3,169,344 to 3,953,759 (a total increase of 784,415 hours). The Agency will summarize the comments submitted in response to this notice, and will include this summary in its request to OMB.

Type of Review: Extension of currently approved information collection requirement.

Title: Personnel Protective Equipment (PPE) Standards for General Industry (29 CFR part, 1910, subpart I).

OMB Number: 1218-0205.

Affected Public: Business or other for-profits; Federal Governments; State, local or tribal government; Not-for-profit institutions.

Number of Respondents: 3,400,000.

Frequency: On occasion.

Average Time per Response: Varies from one minute (.02 hour) to maintain a training certification record to 29 hours to perform a hazard assessment.

Estimated Total Burden Hours: 3,953,759.

Estimated Cost (Operation and Maintenance): \$0.

IV. Public Participation—Submission of Comments on This Notice and Internet Access to Comments and Submissions

You may submit comments and supporting materials in response to this notice by (1) hard copy, (2) FAX transmission (facsimile), or (3) electronically through the OSHA Web page. Because of security-related problems, there may be a significant delay in the receipt of comments by regular mail. Please contact the OSHA Docket Office at (202) 693-2350 (TTY) (877) 889-5627 for information about security procedures concerning the delivery of submissions by express delivery, hand delivery, and courier service.

Comments, submissions, and background documents are available for inspection and copying at the OSHA Docket Office at the above address. Comments and submissions posted on OSHA's Web page are available at <http://www.OSHA.gov>. Contact the OSHA Docket Office for information about materials not available through the OSHA Web page and for assistance in using the Web page to locate docket submissions.

Electronic copies of this Federal Register notice as well as other relevant documents are available on OSHA's Web page. Since all submissions become public, private information such as social security numbers should not be submitted.

BILLING CODE 7535-01-M

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50-334 and 50-412]

FirstEnergy Nuclear Operating Company, FirstEnergy Nuclear Generation Corp., Ohio Edison Company, The Toledo Edison Company, Beaver Valley Power Station, Unit Nos. 1 and 2; Notice of Issuance of Amendments to Facility Operating Licenses

The U.S. Nuclear Regulatory Commission (Commission) has issued Amendment No. 275 to Facility Operating License No. DPR-66 and Amendment No. 156 to Facility Operating License No. NPF-73 issued to FirstEnergy Nuclear Operating Company (the licensee), which revised the Technical Specifications (TSs) and licenses for operation of the Beaver Valley Power Station, Unit Nos. 1 and 2 (BVPS-1 and 2) located in Beaver County, Pennsylvania. The amendments are effective as of the date of issuance.

The amendments modified the TSs and licenses to increase the maximum authorized rated thermal power from 2689 megawatts thermal (MWt) to 2900 MWt for each unit. Additionally, the amendments approved full implementation of an alternative source term in accordance with Title 10 of the Code of Federal Regulations, Section 50.67, using the guidance in Regulatory Guide 1.183, "Alternative Radiological Source Terms for Evaluating Design Basis Accidents at Nuclear Power Plants." The amendments also approved deletion of the power range neutron-flux high-negative rate trip, removal of the boron injection tank boron concentration and renaming the boron injection flow path for BVPS-1, the addition of a footnote to Table 3.3-3 for BVPS-1, and correction of an inconsistency regarding a referenced permissive for BVPS-1.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment.

Notice of Consideration of Issuance of Amendments to Facility Operating Licenses and Opportunity for a Hearing in connection with this action was published in the **Federal Register** on August 17, 2005 (70 FR 48443). The supplemental letters dated February 23, May 26, June 14, July 8 and 28, August 26, September 6, October 7, 28, and 31, November 8, 18, and 21, December 2, 6, 9, 16, and 30, 2005, and January 25, February 14 and 22, March 10 and 29, May 12, and July 6, 2006, provided additional clarifying information that did not expand the scope of the initial application as published in the **Federal Register**. No request for a hearing or petition for leave to intervene was filed following this notice.

The Commission has prepared an Environmental Assessment related to the action and has determined not to prepare an environmental impact statement. Based upon the environmental assessment, the Commission has concluded that the issuance of the amendment will not have a significant effect on the quality of the human environment (71 FR 40162).

For further details with respect to the action see (1) the application for amendment dated October 4, 2004, as supplemented by letters dated February 23, May 26, June 14, July 8 and 28, August 26, September 6, October 7, 28, and 31, November 8, 18, and 21, December 2, 6, 9, 16, and 30, 2005, and January 25, February 14 and 22, March 10 and 29, May 12, and July 6, 2006, (2) Amendment No. 275 to License No. DPR-66, (3) Amendment No. 156 to License No. NPF-73, (4) the Commission's related Safety Evaluation, and (5) the Commission's Environmental Assessment.
