This information is being collected to ensure accurate and timely records about the fishing activity of persons licensed to participate in fisheries under Federal regulations in the Western Pacific Region. This will enable the National Marine Fisheries Service and the Western Pacific Fishery Management Council to (a) determine how these persons would be affected by changes in management; (b) ensure that they are informed about prospective changes in fishery regulations and the analysis of estimated impacts; and (c) determine whether the objectives are being achieved by monitoring the fishery and evaluating the impacts on stocks and the fishery participants and related businesses. Responses to the collection are required to obtain the benefit of a license for the fishery involved (ref. 50 CFR 660.13). Data provided concerning the activities and business of the respondents are handled as confidential under the Magnuson-Stevens Fishery Conservation and Management Act (Sect. 402(b)). Notwithstanding any other provision of the law, no person is required to respond to, nor shall any person be subject to a penalty for failure to comply with a collection of information subject to the requirements of the Paperwork Reduction Act, unless that collection of information displays a currently valid OMB Control Number.
