Smoking Study

Male and female smokers needed.

Participate in a study on the effects of smoking cigarettes.

Cigarette Smokers are needed to participate in a study to measure patterns of normal smoking behavior. Participation includes laboratory visits on two consecutive days, each lasting about 1 hour. The first laboratory visit needs to be in the morning and the second laboratory visit needs to be in the afternoon.

**Participants will be compensated
for their time and inconvenience.**

To qualify for participation you must be a current, regular smoker 18 years of age or older, in good health, with reliable transportation and willing to answer questions, provide urine and saliva samples, and smoke your own brand of cigarettes using a special holder.

Call **410-823-8226** or toll-free **1-866-264-0012**
Monday–Friday 9:00 am–5:30 pm
and ask for the Smoking Behavior Study.

HEALTH WARNING: Quitting smoking now greatly reduces serious risks to your health. Smoking causes lung cancer, heart disease, and emphysema and may complicate pregnancy. Smoking by pregnant women may result in fetal injury, premature birth, and low birth weight. If you are pregnant, you cannot participate in this study.
