Background

TSA is altering two existing systems of records under the Privacy Act of 1974. The first, the Transportation Security Threat Assessment System (T-STAS) (DHS/TSA 002), facilitates the performance of threat assessments and employment investigations on individuals who require special access to the transportation system, and was last amended in a notice published in the **Federal Register** on December 10, 2004 (69 FR 71837).

The second, the Registered Traveler (RT) Operations Files (DHS/TSA 015), relates to a pilot project designed to positively identify certain travelers who volunteer to participate in the program. The program may expedite the pre-boarding process and improve allocation of TSA resources. Information concerning the RT program was last published in the **Federal Register** on June 1, 2004 (69 FR 30948).

TSA is in the process of improving its direct access to certain governmental databases used in performing security threat assessments in order to more efficiently perform such assessments. The improved access will result in the individuals covered by these databases being added to TSA record systems. Accordingly, TSA is amending the "Categories of individuals covered by the system" portions of T-STAS and RT systems of records by adding, at the end of the list of individuals, a new category to include: "Known or suspected terrorists identified in the Terrorist Screening Database (TSDB) of the

Terrorist Screening Center (TSC); individuals identified by TSA who are on the Selectee List because they pose a viable threat to civil aviation or national security; and individuals on classified and unclassified governmental terrorist, law enforcement, immigration, or intelligence databases, including databases maintained by the Department of Defense, National Counterterrorism Center, or Federal Bureau of Investigation."

TSA is also making further amendments to the "Categories of individuals covered by the system" and to the "Categories of records in the system" in the T-STAS system, which it is not making to the RT system, by expanding and clarifying various sections as follows:

(1) Adding a new category (l) to the categories of individuals, to expressly include individuals seeking to become, or qualified as, known shippers. These individuals are currently covered by category (g) "Other individuals who are connected to the transportation industry for whom TSA conducts security threat assessments to ensure transportation security," but express identification in a new category (l) will clarify that this system covers these individuals.

(2) Adding the term "shipping venues" to the introductory paragraph of the categories of individuals, and revising category (9) of "Routine uses of records maintained in the system, including categories of users and the purposes of such uses" section to reflect that TSA will disclose information to air carriers and indirect air carriers regarding individuals who contract for, or seek access to, transportation infrastructure or assets.

(3) Including in the introductory paragraph of the categories of individuals, individuals seeking, or being provided access to, Sensitive Security Information or Classified information provided in connection with transportation security matters.

(4) Modifying the first sentence of "Categories of individuals covered by this system," and category (a) of the "Purpose(s)" sections to clarify that the system covers all types of evaluations performed for security purposes.

(5) Revising categories (d) and (p), and adding a new category (u) at the end of the list of records in the "Categories of records in the system," as follows:

- Current category (d) covers various forms of Government-issued licensing or identification information. The category is being revised to expressly reflect the inclusion of citizenship and immigration records, alien registration numbers, and visa information. These

items are currently listed in category (o) and will be repeated in (d) to clarify that such records are not limited to travel documents, as they are listed in category (o).

- Current category (p) covers criminal history records obtained from the Federal Bureau of Investigation (FBI). This category is being revised to include other criminal history records, such as Department of Defense and some state and local criminal history records. While these records are described in existing category of record (r) "Other information provided by Federal, State, and local government agencies or private entities," TSA has determined that amending the category of records will clarify that criminal history records from several sources may be part of this system.

- TSA is adding a new category (u) to include suitability testing and results of such testing. This expansion of the category of records is intended to cover any tests that transportation-related employees or contractors may be required to undergo.

The complete revised notice of the systems of records follows.
