\$ _____ AMOUNT TO REPLACE PRIMARY ACTIVITY EQUIPMENT

Part D: Knowledge, Attitudes & Perceptions of Sanctuary Management Strategies and Regulations

In 1990, Congress and the President established the Florida Keys National Marine Sanctuary (FKNMS). The FKNMS is just one of 13 National Marine Sanctuaries in the U.S, which are managed by the National Oceanic and Atmospheric Administration (NOAA). After a long public process and approval by the Governor and Cabinet of Florida, regulations were established and implemented in July 1997. The FKNMS is cooperatively managed with the State of Florida. This survey asks about your knowledge, attitudes and perceptions of FKNMS management strategies and regulations and conditions of the resources in the FKNMS. There are no right or wrong answers; we simply want your honest opinions. Again, your privacy will be protected. No one will be given information that will allow them to identify you from survey data.

INFORMATION AND PERCEPTIONS

In this section of the survey, we want to know about how you get information about the FKNMS, which covers all the waters surrounding the Florida Keys/Key West. A map is included with this booklet showing the boundaries of the FKNMS. We also ask questions about the public process in creating the management strategies and regulations and ask about your opinions about the existence of the FKNMS and an appraisal of how well the area is being managed.

- D1. Please list the sources of information that you have received in the past on the FKNMS and rank the sources in terms of their usefulness. Place an "x" for each source used. Please rank each source 1=highest (most important) to 9=lowest (least important).**

1 2 3 4 5 dk
- D24. When planning your outdoor recreation activities in the Florida Keys/Key West, did you know that there were special zones where certain activities are restricted or not allowed?
___ YES ___ NO

There are five kinds of zones established within the FKNMS, and three of these zone types analyzed for this study are collectively referred to as 'FKNMS zones' in the survey. Zones allow different uses and are generally established for different purposes. Below, a short, general description for each of the three zone types is provided.

Sanctuary Preservation Areas, or SPAs, encompass discrete, biologically important areas and are designed to reduce user conflicts and sustain critical marine species and habitats. Regulations for SPAs are designed to limit consumptive activities while continuing to allow activities that do not threaten resource protection. There are 18 SPAs in the FKNMS, which limit consumptive activities (activities where you take something) and 4 that are set aside for research only.

Ecological Reserves, or ERs, encompass large, contiguous, diverse habitats, in order to protect and enhance natural spawning, nursery, and permanent-residence areas for the replenishment and genetic protection of fish and other marine life. Regulations for Ecological Reserves are designed to meet the objectives of these zones by limiting consumptive activities while continuing to allow activities that do not threaten resource protection. Ecological Reserves therefore restrict all consumptive activities and allow non-consumptive activities only where such activities are compatible with resource protection. There are currently two Ecological Reserves in the Sanctuary, the Western Sambo's Ecological Reserve and the Tortugas Ecological Reserve.

Wildlife Management Areas, or WMAs, include bird nesting, resting, or feeding areas, turtle-nesting beaches, and other sensitive habitats. Regulations are designed to protect these species or the habitat while providing for public use. Access restrictions will include no-access buffers, no-motor zones, idle-speed only/no-wake zones, and closed zones. Some restrictions will apply to time periods, others to areas. There are currently 27 WMAs, of which 7 are managed exclusively by the FKNMS (the FKNMS co-manages the others with the US Fish and Wildlife Service).

The next set of questions asks about your opinions on the three types of zones. Please answer each question for each type of zone. Answer by placing an "x" in the space for each type of zone. Leaving a space blank means you don't think the statement applies to that type of zone.
