

Supporting Document for Paperwork Reduction Act Submission
Third Party Collection Program/Medical Services Account/Other Health Insurance

A. Justification

1. Need and Use

DoD implemented the Coordination of Benefits Program in FY 87 based on authority of 10 USC 1095, enacted as Section 2001 of Pub L. 99-272, Consolidated Omnibus Budget Reconciliation Act of 1986 (COBRA), April 7, 1986, and Uniform Business Office (UBO) Manual 6010.15-M, Military Treatment Facility UBO Manual, April 1997¹. Under this program, DoD is required to collect from third-party payers the cost of inpatient and outpatient services rendered to military retirees, all dependents, and others who have private health insurance. Title 32, Part 220 of the Code of Federal Regulations, implements 10 USC 1095. Specifically, 32 CFR 220.2(d) states that the form must be available to third-party payers upon request. A third-party payer may not request any other assignment of benefits form from the subscriber. Copies of the statute and regulatory provision are attached.

2. Purpose and Users of the Information

This information will be collected by administrative support staff, including but not limited to, admissions clerks, patient registration and scheduling clerks, and clinic staff at military treatment facilities (MTFs) from military retirees, all dependents, and others seeking medical care at the MTF at the time of outpatient visit and/or admission to the MTF. It will help the local MTF commander identify circumstances in which a claim for services may be submitted to a proper third-party payer and facilitate the collection of reasonable charges from that payer.

3. Improved Information Techniques

The information collected on this form will be entered into the Composite Health Care System (CHCS) database, which must be updated on a regular basis to ensure that the information is current and accurate. The form itself will serve as documentation that the requirements of the law have been satisfied. Since the information requested is readily available to the respondent, we feel the completion of the form is not unduly burdensome. The form may be stored in hard copy or electronically.

4. Duplication and Similar Information

This information is not being collected by any other agency or component nor is it currently available in any other format. This form simplifies and standardizes the process for collecting the required information. Duplication of information to be collected has been eliminated.

5. Small Business

No small business or other small entities are involved in this collection of information.

¹ The Manual is in the final stages of revision; however, the sections of the Manual addressing the need to collect this information have not been changed substantively.

6. Less Frequent Collections

Currently, this form is the only way to identify potential third-party payers. This information must be collected at least annually from each individual seeking medical care in the MTF. It is crucial to collect the most up-to-date information on potential third-party payers. Therefore, data cannot be collected on a less frequent basis.

7. Special Circumstances

There are no special circumstances that require the collection to be conducted in a manner inconsistent with the guidelines in 5 CFR 1320.5(d)(2).

8. Federal Notice and Consultations

The Federal Register Notice for this collection of information was published August 21, 2006 (Vol. 71, No. 161, pp. 48540-48541). Copy attached. No public comments to the notice were received. This collection is being conducted in accordance with the guidelines outlined in 5 CFR 1320.8

9. Payment/Gift to Respondents

There will be no payment or gifts furnished to respondents.

10. Confidentiality

A Privacy Act Statement is provided on the form. The specific uses for the information are stated on the form. The form also states that disclosure is required and lists the consequences of non-disclosure and/or submitting false information.

11. Sensitive Questions

Questions of a sensitive nature are not asked.

12. Burden Estimate

There has been a significant increase in the number of beneficiaries seeking treatment at MTFs over the past several years. Some of this is due to increase in retirees. Of the 9.2 million TRICARE beneficiaries, it is expected that only 2,807,212 beneficiaries will be asked to complete the form.

To document program compliance, all patients must complete at least a portion of the questionnaire, which is entered into the medical record. We estimate that it will take no more than an average three minutes to complete the form. In many cases, that time will diminish if the beneficiary has his insurance card, since the front and back of the card can then be photocopied and stapled to the form, thereby relieving the beneficiary from having to write all of the information. The estimated annual burden is 140,361.

The cost to the respondent for providing the information is negligible and beyond our ability to calculate.

13. Cost of Respondents

None.

14. Cost of the Federal Government

The average annualized costs are itemized as follows:

(printing = \$.05 X 2,807,212)	\$ 140,361
(clerical costs = \$.69 ² X 2,807,212)	\$ 1,936,976

TOTAL ANNUAL COST	\$ 2,077,377

15. Changes

The administration has placed an increased emphasis upon recovery under the Federal Medical Care Recovery Act. In addition, there are now a multitude of insurance policies and types to which a single individual/family can subscribe. This revised form attempts to capture as much information about all of the possible applicable policies as possible. Completion of this form, while increasing the total burden hours, will aid in increasing revenues (O&M dollars) services, and operating efficiency and effectiveness within the MHS.

16. Publication/Tabulation

There are no plans to publish or tabulate the information collected.

17. Expiration Date

Approval is not sought for avoiding the display of the expiration date for OMB approval.

18. Certification Statement

There are no exceptions in the certification statement identified in Item 19, "Certification for Paperwork Reduction Act Submissions," of OMB Form 83-i.

B. Collections of Information Employing Statistical Methods

Statistical methods are not employed for collection of this information.

² Prorated salary based on GS-5, step 5, admissions clerk.
