Fugitive Felon Report Data Format

Please remember that all fugitive felon files submitted to 88A must be in a standard ASCII text file format (i.e. tab delimited with CRILF between records); that is, the file should contain fixed-length records. Bending fugitive felon data in an Excel spreadsheat or Word document will cause the upload to the 68A maintainer to be aborted. Review this layout below to ensure that you are submitting a good file.

Format for Fugitive Felon eData Files

eData is SSA's new Internet based method of submitting fugitive felon reports to SSA. This program permits safe, encrypted transmission of the prepared fugitive felon file. However, eData does not actually prepare the report. The file must first be created in the specific format for SSA fugitive felon reporting. The specifications and format is detailed below.

Reporters should attempt to provide as many of the optional data elements as possible to enable SSA and law enforcement to have a comprehensive record on the wanted individual.

<u>Social Security Number</u>—the Social Security number of the wanted individual. This field must <u>not</u> be left blank. If the Social Security number is unknown, this field must be filled with zeros. (M)

DUMMY FILE FORMAT FOR SUBMITTING "ZERO" REPORT

(For reporters who agreed to submit files monthly)

All current fugitive felon and parole/probation violation records should be submitted each month (even though many will be duplicates from previous reports).

SSA has an automated database which tracks for the timely submission of monthly reports by all reporters. This database produces an alert for SSA personnel to contact the reporter anytime 45 days have elapsed since the last report. For SSA's monitoring purposes, if there are **NO** fugitive felons/parole probation violators in the monthly reporting period, reporters should submit a MONTHLY "ZERO" report. Filing this "zero" report will enable SSA to properly credit the reporter with the submission of a timely report.

THE FILE SHOULD BE FORMATTED AS FOLLOWS:

...referring to the original input format on the first page

The SSN field should be all 9's.

The entry in the LAST NAME field should be "DUMMY"
The entry in the FIRST NAME field should be "RECORD"

The DATE OF BIRTH field should be all ZEROS.

All other data should be the same as for a regular report.

NOTE: NO OUTPUT (FEEDBACK) FILES WILL BE SENT BACK TO THE REPORTER VIA eDATA AT THIS TIME.
