

**JUSTIFICATION FOR NO MATERIAL/NONSUBSTANTIVE CHANGE**

MOTOR VEHICLE AND ENGINE COMPLIANCE PROGRAM FEES  
OMB CONTROL NUMBER 2060-0545  
EPA ICR NUMBER 2080.02

This non-substantive action is to adjust the baseline for this ICR to reflect the transfer of the fees program burden for light duty vehicles from 0783.47 (2060-0104) to this ICR in an accompanying non-substantive ROCIS "83-C type" submissions. This will allow subsequent renewals of the fees program to be considered and adjusted in one ICR, 2080.02 (2060-0545), which expires March 31, 2007, rather than two. Adjustments to this combined burden will be presented against this baseline in the upcoming renewal, 2080.03. This is appropriate because the fees program is, in fact, administered as a single program covering both on-road and off-road vehicles and engines.
