

Hi John,

The revised package 0990-0271 CCOE Data collection for the Identification of Comparison Groups for the National Community Centers of Excellence in Women's Health Program was submitted to me on 10/26/2006. At your recommendation that it needed to be revised to include an additional component in the study design. Also, you suggested that they have the COE's be a comparison for the CCOE. You stated that once this change had been made that OMB will waive the 60 and 30 day FRN public notice and comment period.

After reviewing the revised collection, I made some changes to the supporting statement to reflect the correct burden hours. If you have anymore question, call me.
