

There is no instrument for this IC. The respondent and hour burden below is calculated for two year. In this IC I calculated for one year.

Piloting of Instruments. In advance of the start of the study, we will ask a group of 6 teachers to review the newly developed instruments to insure the administration protocols are clear and that our communication through email and on-line data collection technology is functioning properly. Similarly, we will ask a group of 6 students to review the instruments to insure the administration protocols are clear. Feedback received from the teachers/students will be incorporated into revised administration protocols and help to modify some items (so the item descriptions will be clear for respondents). Table 8 lists the estimated burden for doing piloting of instruments.

Table 8. Estimated Burden for Piloting of Instruments

Task	Type of Respondent	Number	Time Estimate	Total Hours	Hourly Rate	Estimated Cost of Burden
Piloting of Teacher Instruments	Teachers	6	0.33	1.98	\$30	\$59.4
Piloting of Student Instruments	Students	6	0.33	1.98	\$10	\$19.8
TOTAL	-	12	-	3.96	-	\$79.2
