

UNIVERSITY OF NORTH CAROLINA AT GREENSBORO

Principal Interview

CONSENT TO ACT AS A HUMAN PARTICIPANT

Project Title: The Evaluation of the Alabama Math, Science and Technology Initiative

Co-PIs: Dr. Denis Newman, Dr. Harold Wenglinsky

Participant's Name: _____

DESCRIPTION AND EXPLANATION OF PROCEDURES: The purpose of the evaluation is to assess, through a randomized controlled experiment, whether AMSTI has a positive effect on classroom practice and student test scores. The participant will be involved in a principal interview. The principal interview consists of open-ended questions about the principal, the school, the community and the role of AMSTI. The interview should take no more than 20 minutes.

RISKS AND DISCOMFORTS: It is not anticipated that there will be any risk or discomfort associated with the interview.

POTENTIAL BENEFITS: The principal interview will give the principal the opportunity to reflect on his or her role as an instructional leader. This increased reflectivity thus may be a positive benefit. In addition, a sense that the system cares enough about what principals are doing with AMSTI to send an evaluator is probably reassuring to administrators. And, in general, the interview will permit AMSTI researchers to understand the implementation of AMSTI from a principal's perspective, and specifically fidelity to the policy and program goals of AMSTI.

COMPENSATION/TREATMENT FOR INJURY: There is no risk of injury as a result of the interview.

CONSENT: By signing this consent form, the participant agrees that he/she understands the procedures and any risks and benefits involved in this research. He/she is free to refuse to participate or to withdraw consent to participate in this research at any time without penalty or prejudice; participation is entirely voluntary. He/she is also free to ask any questions, either before or after the interview. His/her privacy will be protected because his/her identity will not be disclosed, except to researchers involved in the project, and any reports or publications that result from the study will be written to prevent his/her being identifiable or his/her school being identifiable. All individually identifiable data will be stored in a secure location for a maximum of ten years and then destroyed by shredding.

The University of North Carolina at Greensboro Institutional Review Board, which insures that research involving people follows federal regulations, has approved the research and this consent form. Questions regarding participant rights in this project can

be answered by calling Mr. Eric Allen at (336) 256-1482. Questions regarding the research itself will be answered by calling Denis Newman at 1-888-486-8886 x 127 or Harold Wenglinsky at (212) 367-4615. Any new information that develops during the project will be provided to the participant if the information might affect his/her willingness to continue participation in the project.

Signing this form constitutes agreement to participate in the project described by

_____.
