Evaluation Process – These are standard requirements that HUD will expect every program manager receiving a grant to do as part of their project management.

- An evaluation process will be part of the on-going management of the program.
- Comparisons will be made between projected and actual numbers for both outputs and outcomes.
- Deviations from projected outputs and outcomes will be documented and explained.
- Analysis of data to determine the relationship of outputs to outcomes; what outputs produce which outcomes.

HUD Will Use The Following Questions To Evaluate Your Program

1. How many housing units rehabilitated will be made available to low-to-moderate-income households?
2. How many housing units constructed will be made available to low-to moderate-income households?
3. What is the average percentage change in earnings for participants who completed job training?

HUD Master Models (2007)

Rural Housing and Economic Development

4. What is the number and percent of participants who completed training and obtained a job?
5. What is the average annual estimated savings for low-income families as a result of energy efficiency improvements?
6. What increases in program accomplishments result from capacity building assistance (e.g. number of employees hired or retained, efficiency or effectiveness of services provided)?
7. What is the value of dollars and services leveraged as a result of federal or local partnership created?

Carter-Richmond Methodology

The above Management Questions developed for your program are based on the Carter-Richmond Methodology¹. A description of the Carter-Richmond Methodology appears in the General Section of the NOFA.
