BILLING CODE 6750-01-M

**DEPARTMENT OF HEALTH AND
HUMAN SERVICES**

**Centers for Disease Control and
Prevention**

[60Day-06-0479]

**Proposed Data Collections Submitted
for Public Comment and
Recommendations**

In compliance with the requirement
of section 3506(c)(2)(A) of the
Paperwork Reduction Act of 1995 for
opportunity for public comment on
proposed data collection projects, the
Centers for Disease Control and
Prevention (CDC) will publish periodic
summaries of proposed projects. To
request more information on the
proposed projects or to obtain a copy of
the data collection plans and
instruments, call 404-639-4766 and
send comments to Seleda Perryman,
CDC Assistant Reports Clearance

Officer, 1600 Clifton Road, MS-D74,
Atlanta, GA 30333 or send an e-mail to
omb@cdc.gov.

Comments are invited on: (a) Whether
the proposed collection of information
is necessary for the proper performance
of the functions of the agency, including
whether the information shall have
practical utility; (b) the accuracy of the
agency's estimate of the burden of the
proposed collection of information; (c)
ways to enhance the quality, utility, and
clarity of the information to be
collected; and (d) ways to minimize the
burden of the collection of information
on respondents, including through the
use of automated collection techniques
or other forms of information
technology. Written comments should
be received within 60 days of this
notice.

Proposed Project

Automated Management Information
System (MIS) for Diabetes Control
Programs (OMB No. 0920-0479)—
Revision—National Center for Chronic
Disease Prevention and Health
Promotion (NCCDPHP), Centers for
Disease Control and Prevention (CDC).

Background and Brief Description

The Division of Diabetes Translation
(DDT) within the National Center for
Chronic Disease Prevention and Health
Promotion, Centers for Disease Control
and Prevention (CDC), has implemented
a Management Information System
(MIS) and Federally sponsored data
collection requirement from all CDC
funded Diabetes Prevention and Control

Programs. Diabetes is the sixth leading
cause of death in the United States
contributing to more than 224,000
deaths each year. An estimated 14.6
million people in the United States have
been diagnosed with diabetes and an
estimated 6.2 million people have
undiagnosed diabetes. The Division of
Diabetes Translation provides funding
to health departments of States and
territories to develop, implement, and
evaluate systems-based Diabetes
Prevention and Control Programs
(DPCPs). DPCPs are population-based,
public health programs that design,
implement and evaluate public health
prevention and control strategies that
improve access to and quality of care for
all, and reach communities most
impacted by the burden of diabetes (e.g.,
racial/ethnic populations, the elderly,
rural dwellers and the economically
disadvantaged). Support for these
programs is a cornerstone of the DDT's
strategy for reducing the burden of
diabetes throughout the nation. The
Diabetes Control Program is authorized
under sections 301 and 317(k) of the
Public Health Service Act [42 U.S.C.
sections 241 and 247b(k)].

In accordance with the original OMB
approval (0920-0479) and the first
extension (August 14, 2003) for this
project, this requested 3 years OMB
revision will continue to expand and
enhance the technical reporting capacity
of the MIS. MIS is a web-based,
password access protected repository/
technical reporting system that replaced
an archaic paper reporting system. MIS
allows the accurate, uniform, and

complete collection of diabetes program progress information using the Internet.

The number of hours that DPCPs users spend with the system usage has increased since compared to the initial baseline proposed in the last OMB approval three years ago. This increase in burden does not directly translate into a greater reporting burden, but facilitates better monitoring and tracking of their programs and helps create an organizational memory. Consequently, they are using the System to a great extent as an integral part of their program compared to previous years. DPCPs add updates about their work plans and other activities into the System on an ongoing basis. The hour-burden estimates include the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Based on input provided by a representative sample for DPCPs, the total annualized response burden increased from 4 to 96 hours, changing the total burden hours from 236 to 5,664. Even though there has been an

increase in the burden hours the number of responses remains at one (1), because the DPCPs are only required to report annually to CDC.

MIS has improved upon the old data collection system by:

- Improving accountability.
- Shortening the information cycle.
- Eliminating non-standard reporting.
- Minimizing unnecessary duplication of data collection and entry.
- Reducing the reporting burden on small state organizations.
- Using plain, coherent, and unambiguous terminology that is understandable to respondents.
- Implementing a consistent system for progress reporting and record keeping processes.
- Identifying the retention periods for record keeping requirements.
- Utilizing modern information technology for data collection and transfer.
- Significantly reducing the amount of paper reports that diabetes prevention and control programs are required to submit.

MIS has allowed CDC to more rapidly respond to outside inquiries concerning

a specific diabetes control activity occurring in the state diabetes prevention and control programs. The data collection requirement has formalized the format and the content of diabetes data reported from the DPCPs and provides an electronic means for efficient collection and transmission to the CDC headquarters.

MIS has facilitated the staff's ability at CDC to fulfill its obligations under the cooperative agreements; to monitor, evaluate, and compare individual programs; and to assess and report aggregate information regarding the overall effectiveness of the DCP program. It has also supported DDT's broader mission of reducing the burden of diabetes by enabling DDT staff to more effectively identify the strengths and weaknesses of individual DPCPs and to disseminate information related to successful public health interventions implemented by these organizations to prevent and control diabetes. Implementation of MIS has provided for efficient collection of state-level diabetes program data. The respondent's average Internet cost is \$1,080 per year.

ESTIMATED ANNUALIZED BURDEN TABLE

Respondents	Number of respondents	Number of responses per respondent	Average burden per response (in hrs.)	Total burden (hours)
State Program Control Officers	59	1	96	5664

Dated: January 10, 2006.

Joan F. Karr,

Acting Reports Clearance Officer, Centers for Disease Control and Prevention.

BILLING CODE 4163-18-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

National Institute for Occupational Safety and Health Advisory Board on Radiation and Worker Health

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), the Centers for Disease Control and Prevention (CDC) announces the following committee meeting:

Correction: This notice was published in the **Federal Register** on January 3, 2006, volume 71, Number 1, Page 120-121. The meeting times/dates and "matters to be discussed" have been changed.

Subcommittee Meeting Time and

Date: 9 a.m.-2 p.m., January 24, 2006.

Committee Meeting Times and Dates:

2:30 a.m.-5 p.m., January 24, 2006. 8:30 a.m.-5 p.m., January 25, 2006. 8:30 a.m.-4:30 p.m., January 26, 2006.

Matters to be Discussed: The agenda for the Subcommittee meeting includes Task 3 review; review of Bethlehem Steel, Rocky Flats, and Y-12 site profiles; and individual dose reconstruction reviews. The agenda for the Board meeting includes Reports from the Subcommittee and Working Groups; Pacific Proving Grounds Special Exposure Cohort (SEC) Evaluation Report and Supplement; Site Profiles for Bethlehem Steel, Rocky Flats, Y-12, Hanford, Nevada Test Site, and Savannah River Site; Letter from Steel Workers; SEC Rule rewrite; Task 3 review of SC&A Contract; Conflict of Interest issues; Dose Reconstruction Reviews; an update on Science Issues which will include but not be limited to Lymphoma—Dose Reconstruction Target Organ Selection; future schedules; procedures for the Board to use in reviewing SEC petitions

(including a discussion of the Y-12 SEC Petition). The evening public comment sessions are scheduled for January 24 from 5:30 p.m.-6:30 p.m. and January 25 from 7 p.m.-8:30 p.m.

For Further Information Contact: Dr. Lewis V. Wade, Executive Secretary, NIOSH, CDC, 4676 Columbia Parkway, Cincinnati, Ohio 45226, telephone 513-533-6825, fax 513-533-6826.

The Director, Management Analysis and Services Office, has been delegated the authority to sign **Federal Register** notices pertaining to announcements of meetings and other committee management activities for both CDC and the Agency for Toxic Substances and Disease Registry.

Dated: January 9, 2006.

Alvin Hall,

Director, Management Analysis and Services Office, Centers for Disease Control and Prevention.
