

NASA Usability Studies Consent Form

Thank you for participating in usability testing and/or a focus group session for education-related sections or products of the NASA Web site. This is to inform you that we will be videotaping your session for the benefit of our team members who cannot be present and to enable us to review information in greater detail at a later date.

All elements of this usability test or session will be videotaped with the audio recording. Clips from the video as well as quotes from your session may be used by the team on this project as well as teams on future projects. However, your identifying information will not be associated with the clips or quotes.

We will greatly benefit from your feedback and appreciate your time. These tapes will not be released outside of the NASA network, and will only be used for reference in our research.

I understand that video and audiotape recordings will be made of my session. I grant NASA's usability test group permission to use these recordings for the purposes mentioned above, and waive my right to review or inspect the tapes prior to their dissemination and distribution.
