

Submission Report

Section: Main Menu

Welcome

Welcome to the CDRH Electronic Submissions Software (CeSub)

This software application is intended to automate the current paper submission process. This software contains a number of data capturing tools and helpful dialog boxes to reduce redundant responses for you, and to allow us to capture data in a more useful, structured format. These benefits will enable CDRH to improve our review process and reduce lengthy review times.

For your convenience, an email account has been established to support any questions that you may have regarding the use of this software. Please email any questions or comments to the CeSub team at: **cdrhesub@cdrh.fda.gov**. Please be sure to include your name, company name and contact information in the email.

Thank you again for using our electronic product reporting software. We look forward to hearing from you soon.

What type of product is this submission referring to? *

Radiation Emitting Product (OMB No. 0910-0025; Expiration Date: December 31, 2006)

Section: Manufacturer Data

Introduction

Electronic Product Radiation Safety Reporting Form

This software application is intended to automate the hard copy product reporting forms in the effort of the Center for Devices and Radiological Health (CDRH) to become capable of accepting electronic submissions from industry and to improve our review process. This CDRH Electronic Submission (CeSub) software is the next version of the application the CDRH is developing to allow us to accept all Radiological Health reports and other submissions electronically and improve the ability of CDRH to accomplish its mandated product and industry evaluations in a timely and efficient manner.

We have already received many electronic submissions and are looking forward to receiving more in the future. With this new release of the software we have updated our procedures for packaging a submission to make this a smoother process for all. All electronic reports (your new CD-ROMs) and any other documents you are submitting in hard copy because they cannot be provided in an acceptable electronic format must be mailed to CDRH. A signed hard copy of the submittal letter generated by the submission software, should be printed out and included with your electronic submission. This printed documentation will provide the Document Control Room with enough information to log the submission. The electronic submissions should be sent directly to the Document Control room, which is the same process for the standard paper

submission.

The submission must be addressed to:

Electronic Product Document Control (HFZ-309), Attn: CeSub Team, Center for Devices and Radiological Health, 2094 Gaither Road, Rockville, MD 20850

After sending your submission to the Document Control Room, please send an email to the cdrhesub@cdrh.fda.gov email account so we will know that your submission is forthcoming. Please remember that all correspondence concerning your submission **MUST** be sent to the Electronic Product Document Control (HFZ-309), at the above letterhead address. Correspondence sent to any address other than the one above will not be considered as part of your official notification submission. Please refer to this guidance for information on current fax and e-mail practices at www.fda.gov/cdrh/ode/a02-01.html. You should also be familiar with the regulatory requirements for radiological products at www.fda.gov/cdrh/comp/eprc.html and medical devices available at Device Advice www.fda.gov/cdrh/devadvice/.

If you have specific questions regarding the software, please contact the CeSub team by email at: **cdrhesub@cdrh.fda.gov**.

Thank you for using our electronic product reporting software. Please communicate your comments and criticisms to the CeSub team as often as you like.

Thank you for your continued support of the CDRH eSubmission Pilot Program.

General Information

General Information for Radiological Health Products

Manufacturers of products subject to performance standards under the Federal Food, Drug, and Cosmetic Act (FFDCA), Chapter V, Subchapter C - Electronic Product Radiation Control are required to furnish various reports to the Center for Devices and Radiological Health (CDRH).

The Radiological Health staff, CDRH developed this software application for the Product and Annual reports. This application will assist manufacturers of electronic products that emit radiation in providing adequate reporting of radiation safety testing and compliance with federal performance standards. Title 21 of the Code of Federal Regulations (CFR), Parts 1002 and 1003 specify Reporting and Notification requirements 1,2,3.

Reports submitted on radiation safety of electronic products must follow the appropriate

form (21 CFR 1002.7). This software application serves the same report responsibility, so long as the submitter or manufacturer prints out the cover letter and sends it in along with the CD containing the report files. The submitter of the report will receive an acknowledgment letter (or email message) with the accession number that CDRH assigns to the report. Please reference this accession number in the future when providing additional information about this model family in either a supplement or the annual report. If a report is incomplete or inadequate CDRH may reject it and return it for completion. CDRH will not enter a rejected report into our database.

CDRH DOES NOT APPROVE THESE REPORTS OR THE PRODUCTS BEING REPORTED. It is the manufacturer's responsibility to certify that their products comply with all applicable standards (21 CFR 1010 - 1050), based on a testing program in accordance with good manufacturing practices. Prior to the shipment of products in interstate commerce, 21 CFR 1002 requires the manufacturer to submit the product and Annual Reports and to comply with all applicable importation requirements (21CFR 1005). If there are deficiencies, CDRH may disapprove the firm's quality control and testing program, determine that the product contains a radiation defect, or determine that the product fails to comply with a standard. CDRH will notify the manufacturer if we make such a determination. CDRH may require the manufacturer to cease introduction into U.S. commerce until deficiencies are corrected, and to initiate a corrective action program (21CFR 1003 - 1004) for products already introduced into commerce.

CDRH can now accept and process 'CeSub' electronic submissions at this time, if all attachments are PDF files only, and the cover letter is printed out and included with a real signature. Translate any text that appears in a language other than English into English in a complete and accurate manner. Keep a copy (save a copy to your hard drive) of the completed report in your records.

We are providing our new software applications for the old reporting forms upon request during this beta testing period of development in Spring, 2005. Other regulatory information is still available on the Internet under <http://www.fda.gov/cdrh/comp/eprc.html>. No copyright exists for these forms.

Reproduce these forms as needed. If you would like to comment on the reporting forms, website, or future electronic submissions, you may direct the comments to the address below.

A complete Product Report is required for each product model or model family. Product Reports are now more generally referred to as Radiation Safety Reports to distinguish the Radiological Health submissions from medical device submissions. CDRH suggests that a complete report on one model of a family be submitted, with a separate Supplemental Report for each of the other models in the family. The Supplemental Report should respond in detail to the parts of the form where there are differences to report, referencing the number of the affected item. Items that are unchanged will still appear in the supplement from the original report.

When new models of a product are introduced, if the models satisfy the criteria for an established reporting exemption or if the new models do not involve changes in radiation emission or performance requirements, then the manufacturer need not report the models prior to introduction into commerce. Rather, the manufacturer is only required to identify them in the annual report, or in quarterly updates to the annual report. Quarterly updates to annual reports may be submitted using the Annual Report software included in this application. [See 21 CFR 1002.13(c).]

All symbols, units, and unusual terms in the report must be adequately defined and consistently used. Please use the terms as defined in Section 1040.10(b) and in the IEEE Standard Dictionary of Electrical and Electronic Terms (IEEE Std. 1001972 and ANSI C42.1001972).

Definitions

Definitions for Rad Health Products

Manufacturers

Manufacturer is any person or organization engaged in the business of manufacturing, assembling, or importing of electronic products (21 CFR1000.3(n)). Manufacturers of electronic products subject to 21CFR1000-1050 must:

- Design and manufacture their products to be in compliance with applicable performance standards;
- Test their products to assure compliance;
- Certify compliance of their products;
- Maintain test and distribution records and a file of correspondence concerning radiation safety, safety complaints, and inquiries;
- Use the published reporting forms or electronic software application to submit reports to CDRH, including Product reports describing the manner of compliance of the product design and testing program and Annual Reports summarizing their compliance testing;
- Report accidental radiation occurrences (i.e., possible, suspected, or known exposures);
- Report any radiation defects or noncompliances; and
- Recall (i.e., repair, replace, or refund the purchase price of) defective or noncompliant products.

Accidental Radiation Occurrences

An accidental radiation occurrence means a single event or series of events that has/have resulted in injurious or potentially injurious exposure of any person to electronic product

radiation as a result of the manufacturing, testing, or use of an electronic product.

Importers

Importer is any person or organization engaged in the business of importing electronic products. An importer is considered to be a manufacturer. The requirements for Manufacturers given above also apply to importers if the requirements have not been done by the foreign manufacturer.

United States Agent for Foreign Manufacturers

Every manufacturer of electronic products, prior to offering such product for importation into the United States, shall designate a permanent resident of the United States as the manufacturer's agent upon whom service of all processes, notices, orders, decisions, and requirements may be made for and on behalf of the manufacturer as provided in section 536(d) of the Radiation Control for Health and Safety Act of 1968 (21U.S.C. 360mm(d)) and this section. The agent maybe an individual, a firm, or a domestic corporation. For purposes of this section, any number of manufacturers may designate the same agent.

From The Federal Food, Drug, and Cosmetic Act

Sec 536 [21 U.S.C. 360mm](d) Designation of agent for purposes of service

It shall be the duty of every manufacturer offering an electronic product for importation into the United States to designate in writing an agent upon whom service of all administrative and judicial processes, notices, orders, decisions, and requirements may be made for and on behalf of said manufacturer, and to file such designation with the Secretary, which designation may from time to time be changed by like writing, similarly filed. Service of all administrative and judicial processes, notices, orders, decisions, and requirements may be made upon said manufacturer by service upon such designated agent at his office or usual place of residence with like effect as if made personally upon said manufacturer, and in default of such designation of such agent, service of process, notice, order, requirement, or decision in any proceeding before the Secretary or in any judicial proceeding for enforcement of this part or any standards prescribed pursuant to this part may be made by posting such process, notice, order, requirement, or decision in the Office of the Secretary or in a place designated by him by regulation.

Sec. 531 [21 U.S.C. 360hh] (1) the term "**electronic product radiation**" means:

- (A) any ionizing or non-ionizing electromagnetic or particulate radiation, or
- (B) any sonic, infrasonic, or ultrasonic wave, which is emitted from an electronic product as the result of the operation of an electronic circuit in such product.

Sec. 531 [21 U.S.C. 360hh](2) the term "**electronic product**" means:

(A) any manufactured or assembled product which, when in operation, (i) contains or acts as part of an electronic circuit and (ii) emits (or in the absence of effective shielding or other controls would emit) electronic product radiation, or

(B) any manufactured or assembled article which is intended for use as a component, part, or accessory of a product described in clause (A) and which when in operation emits (or in the absence of effective shielding or other controls would emit) such radiation.

Burden to Industry

Paperwork Reduction Act Statement

Public reporting burden for this collection of information is estimated to average 24 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, completing, and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to:

Food and Drug Administration CDRH (HFZ-240)
1350 Piccard Drive Rockville, MD 20850

Please DO NOT RETURN this application to this address.

"An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number."

Manufacturer Responsible for Product Compliance

Note: This is the firm that takes responsibility for certification that the product meets the performance standard. This firm develops and maintains the quality control and testing program that is the basis for the certification of this product. Additionally, this firm usually is the owner of the product design and manufacturing process design.

Additional Information

Is there any other relevant information or additional comments that would help expedite the review of this submission? Click the Add... button below to attach any supporting files.

File Attachment

Details

Private Labeling

Is the product sold by other companies under different brand names? *

Medical Devices

Provide the premarket 510(k), IDE, HDE, PDP, or PMA filing numbers related to this medical product, if one of these numbers has been assigned by FDA yet.

If it has not been assigned yet, provide an explanation and submit it as soon as you receive such a filing number.

Electromagnetic Compatibility and Interference

Note:

Electromagnetic Compatability (EMC) and Electromagnetic Interference (EMI) description: This question concerns the evaluation of your product's susceptibility to EMI and/or freedom from causing EMI. For additional information on EMC and EMI please refer to the FDA website at: <http://www.fda.gov/cdrh/emc/emc-in-hcf.html>

Electromagnetic Compatibility with other Products

Provide description of analysis and indicate any shielding you have for your product to protect other products from EMI:

Susceptibility to EMI from other Products

Provide description of analysis and indicate any protective shielding your product has to protect it from EMI:

Section: Sunlamp Product

Part 1 Product Type and Identification

| | |
|---|--|
| Is this a report on products that incorporate sunlamps/ultraviolet lamps? * | |
| Is the product type a: | |
| If "Other" has been selected, please specify further. | |
| Is this a report on an ultraviolet lamp? * | |
| Is the product type a: | |
| If "Other" has been selected, please specify further. | |

Part 2 Sunlamp Product Description

Attach a description of the sunlamp product. The description must include the following:

- (1) exterior and interior structures of the assembled product;
- (2) description and manufacturer's specification for the reflector, timer, filters, ultraviolet lamps, ballasts, etc.;
- (3) photographs and diagrams which include parts identification;
- (4) electrical circuit diagram

Ultraviolet Lamp Labeling

Submit a copy or facsimile of the following labels required by the performance standard. a. Certification label (21 CFR 1010.2) b. Identification label (21 CFR 1010.3) c. Warning label [21 CFR 1040.20(d)(2)] See <http://www.fda.gov/cdrh/radhth/sunlamp.html> (see Notices to Industry) Click on the Add... button below to attach the files.

| | |
|-----------------|--|
| File Attachment | |
| Details | |

Identify the location of each required label on the product and packaging.

Certification Label:

| | |
|----------------------|--|
| Location on product: | |
|----------------------|--|

| | |
|------------------------|--|
| Location on packaging: | |
|------------------------|--|

Identification Label:

| | |
|----------------------|--|
| Location on product: | |
|----------------------|--|

| | |
|------------------------|--|
| Location on packaging: | |
|------------------------|--|

Warning Label:

| | |
|----------------------|--|
| Location on product: | |
|----------------------|--|

| | |
|------------------------|--|
| Location on packaging: | |
|------------------------|--|

User Instructions

User instructions [21 CFR 1040.20(e)(2)]:

Submit a copy of the user instructions that you provide to the users.

| | |
|-----------------|--|
| File Attachment | |
| Details | |

Part 4 Emission Characteristics

Spectral characteristics:

| | |
|----------|--|
| Message: | <i>Description of procedures for spectroradiometric measurement.</i> |
|----------|--|

| | |
|---|--|
| At what distance from the product were the spectral irradiance measurements made? (in meters) | |
|---|--|

| | |
|----------|--|
| Message: | <i>What spectral irradiance standards were used?</i> |
|----------|--|

| | | |
|---|---------------------|--|
| - | Source of standard: | |
|---|---------------------|--|

| | | |
|---|-----------------------|--|
| - | When last calibrated: | |
|---|-----------------------|--|

| | | |
|---|--------------|--|
| - | Uncertainty: | |
|---|--------------|--|

| | |
|--|--|
| At what wavelengths was the spectral irradiance of the product measured? | |
|--|--|

Attach a graphical plot of the spectral irradiance from the product in the 200-710 nm wavelength range. Plot should be on a semilog graph with the spectral irradiance on the logarithmic scale.

| | |
|-----------------|--|
| File Attachment | |
| Details | |

Irradiance Values

Provide the irradiance values per nanometer (Watt/cm²/nm) over the wavelength range of 200 to 400 nm. See <http://www.fda.gov/cdrh/radhth/sunlamp.html> for Spectroradiometric Measurement, Testing Procedures, and Policy on Maximum Timer Interval and Exposure Schedule for Sunlamp Products. This document provides the formula and weighting factors to determine the exposure schedule and maximum recommended exposure time.

| | |
|-----------------|--|
| File Attachment | |
| Details | |

Irradiance ratio [21 CFR 1040.20(c)(1)] :

| | |
|---|--|
| Watts per cm ² (200-260 nm) divided by Watts per cm ² (260-320 nm): | |
|---|--|

| | |
|---|--|
| Watts per cm ² (260-320 nm) divided by Watts per cm ² (320-400 nm): | |
|---|--|

Describe the equipment and procedures used for spectral irradiance measurements. Include diagrams of light path, position, make, model, and type of various optical equipment and electronics used.

| | |
|-----------------|--|
| File Attachment | |
| Details | |

Provide the uncertainties for the spectroradiometric measurements in the wavelength range of 200 to 400 nm.

| | |
|-----------------|--|
| File Attachment | |
| Details | |

Describe how you estimated the uncertainties within the specified wavelength range.

| | |
|-----------------|--|
| File Attachment | |
| Details | |

Part 5 Quality Control Testing

| | |
|--------------|--|
| <i>Note:</i> | <i>NOTE: Section 21 CFR 1010.2(c) requires that certification be based on tests in accordance with the standard or on a testing program in accordance with good manufacturing practices (21 CFR 820). Failure to maintain an adequate testing program will result in disapproval of the program by CDRH.</i> |
|--------------|--|

Preproduction and incoming parts test:

Describe all design and engineering tests conducted on the product.

| | |
|-----------------|--|
| File Attachment | |
| Details | |

Describe all tests and/or checks made on incoming parts, including filters, reflectors, timers, ballasts, and lamps, prior to their acceptance to ensure that the final product complies with the performance standard for sunlamp products (21 CFR 1040.20). Click on the Add... button below to attach the files.

| | |
|-----------------|--|
| File Attachment | |
| Details | |

Quality control tests or checks made during and after manufacture:

Describe the tests or checks conducted during or after manufacture that ensure compliance with the standard for the following: (a) timer functioning and accuracy (at multiple intervals, including maximum); (b) irradiance ratio; (c) protective eyewear transmittance; (d) means to terminate exposure; (e) warning label; (f) identification label; (g) certification label; (h) user instructions - adequacy and presence; (i) presence and quantity of protective eyewear; (j) other. Include detailed descriptions of all sampling plans, instrumentation (including calibration), test procedures (including in-process and finished product quality control

| | |
|---|--|
| inspections), and rejection criteria used. Click on the Add... button below to attach the files. | |
| File Attachment | |
| Details | |
| Submit copies of all written quality control test procedures and check sheets (demonstrating actual test results) used for incoming component tests, manufacturing tests, and final acceptance tests. Click on the Add... button below to attach the files. | |
| File Attachment | |
| Details | |

Part 6 Life and Reliability Testing

| | |
|---|--|
| Attach information for all life and reliability tests on the product and its components, as required by 21CFR 1002.30(a)(3). If any life tests are done on an accelerated aging basis, so indicate and provide details of the procedures and the formula or factors used in the accelerated tests. Provide this information (including results, data and/or condition of component at each inspection or test interval) for the following tests: (a) timer; (b) irradiance ratio; (c) protective eyewear; (d) means to terminate emission control; (e) warning label; (f) certification label; (g) identification label; (h) mechanical durability; (i) electrical durability; (j) filters; (k) reflectors; (l) others. Click on the Add... button below to attach the files. | |
