

Technical Assistance Needs Assessment Questionnaire For State Vocational Rehabilitation (VR) Agencies

The Rehabilitation Services Administration (RSA) of the U.S. Department of Education has awarded a contract to Development Associates, Inc. to assess the technical assistance needs of State VR agencies and State Rehabilitation Councils (SRCs) and to determine the most effective means of providing assistance to address those needs. This questionnaire is designed to gather the opinions of staff members of State VR agencies on these questions. The results of this needs assessment will be used by RSA to design a technical assistance system that best meets technical assistance needs within existing resources.

The questionnaire consists of five modules. The first four modules are designed to assess the technical assistance needs of State VR agencies, while the fifth module is designed to assess the technical assistance needs of SRCs. These modules are designed to be completed by different members of the State VR agency. An additional sixth module is designed to assess the technical assistance needs of the SRCs and is to be completed by the SRC Chairperson.

- Module 1: State Agency Director
- Module 2: Director of Financial Management for VR
- Module 3: Director of Human Resources for VR
- Module 4: Director of Field Services/ Counselor Supervision for VR
- Module 5: Liaison to the State Rehabilitation Council

The State Agency Director should determine who will complete each of the modules based on individuals' knowledge and experience with the topics addressed in the module. The goal is to have at least four different respondents providing responses. While there will be different respondents to the various modules, the State Agency Director should be sure that all of the questionnaire's modules are submitted at the same time to Development Associates, and that this occurs within two weeks following this questionnaire's receipt.

Paperwork Burden Statement
