## **Changes to EDEN Data Categories for 2006-07**

As with the EDEN data groups, ED seeks to minimize the number of changes to EDEN data categories from one year to the next. The changes described in the following pages are deemed necessary based on the discussions with ED program offices and state EDEN coordinators described at the beginning of this document. Additionally, some of the changes are required in order to align EDEN with the existing CCD data collections.

### **New Data Categories**

The following table describes the data categories that are new to EDEN for 2006-07. For the most part, these data categories are those required for the new data groups described in the previous pages. There are a small number of new data categories that do not have any associated data groups. These were added because a new summary category was needed. For example, through 2005-06 EDEN only had one data category for sex that allowed Male and Female as the only possible codes. As part of the CCD-EDEN merger, EDEN has added a new data category Sex (Graduates) that can only be used with data group 306 Graduates/Completers Table. All other data groups use Sex (Membership).

### Dropped Data Categories

As part of the program office meetings that took place as input for the 2006-07 EDEN data set, the EDEN team determined that a number of existing EDEN data categories do not meet program office needs and will therefore be dropped from EDEN for 2006-07. The following table shows the 30 data categories proposed for elimination.

### Data Category Changes

The changes shown in the following pages are the result of input from two important sources: state EDEN coordinators and program offices in ED. The EDEN team strives to minimize the number of changes to data categories from one year to the next but at the

same time recognizes that program office reporting needs change and that refinements may be necessary to existing data groups in order to ensure consistent reporting from one state to the next and maximize the number of states able to provide data.

The following pages show each data category that has a significant change. Data categories with changes that are exclusively editorial are not included in this section. The left side of the page shows the data category as approved for the 2005-06 EDEN reporting cycle. The right side of the page shows the proposed data category for 2006-07. There are check boxes to the right of each element of the data category – Category Name, Definition, Code Set, EDEN Data Groups. Additional notes regarding the change(s) are provided in the far right column of each page.
