Housing Counseling Programs

HC Housing Counseling Program

This program supports the delivery of a wide variety of housing counseling services to homebuyers, homeowners, low- to moderate-income renters, and the homeless. The primary objectives of the program are to expand homeownership opportunities and improve access to affordable housing. Counselors provide guidance and advice to help families and individuals improve their housing conditions and meet the responsibilities of tenancy and homeownership. Counselors also help borrowers avoid inflated appraisals, unreasonably high interest rates, unaffordable repayment terms, and other conditions that can result in a loss of equity, increased debt, default, and eventually foreclosure. Program participants may also provide Home Equity Conversion Mortgage HECM counseling to elderly homeowners who seek to convert equity in their homes into income that can be used to pay for home improvements, medical costs, living expenses, or other expenses.

Evaluation Process – These are standard requirements that HUD will expect every program manager receiving a grant to do as part of their project management.

- An evaluation process will be part of the on-going management of the program.
- Comparisons will be made between projected and actual numbers for both outputs and outcomes.
- Deviations from projected outputs and outcomes will be documented and explained.

- Analysis of data to determine the relationship of outputs to outcomes; what outputs produce which outcomes.

HUD Will Use The Following Management Questions To Evaluate Your Program

Choose the questions applicable to the proposed work plan.

1. How many households received pre-purchase counseling that will purchase a home?
2. What is the estimated average mortgage savings as a result of improved credit scores?
3. What was the estimated difference in the average value of homes that persons counseled qualified to purchase before and after counseling?
4. What is the estimated amount of additional taxes paid to the community as a result of new home ownership?
5. How many households do you estimate lowered their mortgage payments as a result of counseling?
6. How many estimated dollars were realized as a result of the average reduction in mortgage payment per family?
7. How many estimated households increased their disposable income through refinancing?
8. What is the estimated dollar amount of increased disposable income through refinancing?
9. How many estimated households increased their disposable income through a reverse mortgage?
10. What is the estimated average dollar amount of increased monthly disposable income through a reverse mortgage?
11. What was the estimated savings as a result of increased energy efficiency?
12. What was the dollar amount leveraged in conjunction with this award?

Carter-Richmond Methodology

The above Management Questions developed for your program are based on the Carter-Richmond Methodology¹. A description of the Carter-Richmond Methodology appears in the General Section of the NOFA.
