HUD Master Models (2007)

Disabilities

ROSS-Elderly/Persons with Disabilities

The purpose of the ROSS-Elderly/Persons with Disabilities Program is to provide grants for the delivery and coordination of supportive services and other activities to improve the living conditions of elderly and/or disabled residents and support their ability to live independently.

Need Statement

There is a need for supportive services to enable disabled and elderly residents to remain living independently and/or age in place.

<u>Evaluation Process – These are standard requirements that HUD will expect every program manager receiving a grant to do as part of their project management.</u>

- An evaluation process will be part of the on-going management of the program.
- Comparisons will be made between projected and actual numbers for both outputs and outcomes.
- Deviations from projected outputs and outcomes will be documented and explained.
- Analysis of data to determine the relationship of outputs to outcomes; what outputs produce which outcomes.

HUD Will Use The Following Questions To Evaluate Your Program

- 1. What was the type and amount of supportive services used by residents receiving services?
- 2. What was the dollar amount of supportive services used by residents receiving services?
- 3. How many persons were able to live independently and/or age in place?
- 4. How many persons improved their living conditions/quality of life?
- 5. How many persons increase their income? What was the average increase?

Carter-Richmond Methodology

The above Management Questions developed for your program are based on the Carter-Richmond Methodology1. A description of the Carter-Richmond Methodology appears in the General Section of the NOFA.
