Oklahoma Project to Learn about ADHD in Youth (OK PLAY)

PROCEDURES TO BE FOLLOWED FOR REPORTABLE EVENTS:

- 1. Assessment staff will process DISC and check for 1) diagnosis 2) reportable injury and 3) suicidal thoughts. If any of the above three are present, assessment staff will follow triage protocol as outlined in the triage protocol for VOICE DISC IV document.
- 2. If participants volunteer information about self harm or abuse during the course of the other assessments, in particular, the injury section of the Health Risk Behavior Survey, assessment staff will also follow the triage protocol. Detailed steps are contained in the triage protocol document.
- 3. For any case that requires immediate report to a mental health provider or child protective services, assessment staff will immediately notify principal investigators.
- 4. Site principal investigators will send an email report to CDC principal investigators within 24 hours for serious issues requiring immediate report, and within 2 weeks for other less serious issues.

OK Play Triage Protocol for VOICE DISC IV

The consent form states that the assessment process might uncover emotional or behavioral symptoms/diagnoses. At the end of the interview, explain to the parent that the team psychiatrist will review the interview results and a letter of findings (if there are any) will be sent to them within three weeks. The family and youth may already have a psychiatrist or other mental health professional treating the youth. Staff should state they are not clinicians and should NOT discuss findings with the parent and youth. Staff should look at the parent completed history questionnaire and/or go to the DISC IV reconstruction report to see the youth report of service use. The following protocol outlines how project staff will handle certain situations:

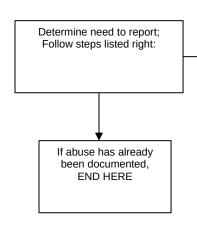

OK Play Triage Protocol for PTSD Module

POST TRAUMATIC STRESS DISORDER MODULE

Youth Reports Yes to question(s) #3, #4 and/or 4a

(see full questions at bottom of page)

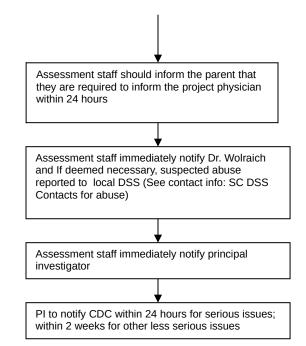

Assessment staff instructions to follow when youth reports yes to one or more questions:

- 1. Show the child the reconstruction report and read the yes question(s) out loud.
- 2. Ask the youth "Do you remember how you answered this guestion?"
 - 3. If they understand that they answered yes, probe "Could you tell me a little more about why you answered yes?
 - 4. Ask further open ended questions to gain sense of what happened to determine if it is a reportable situation.
 - 5. If you feel that the information shared was a possible reportable situation; follow flow diagram

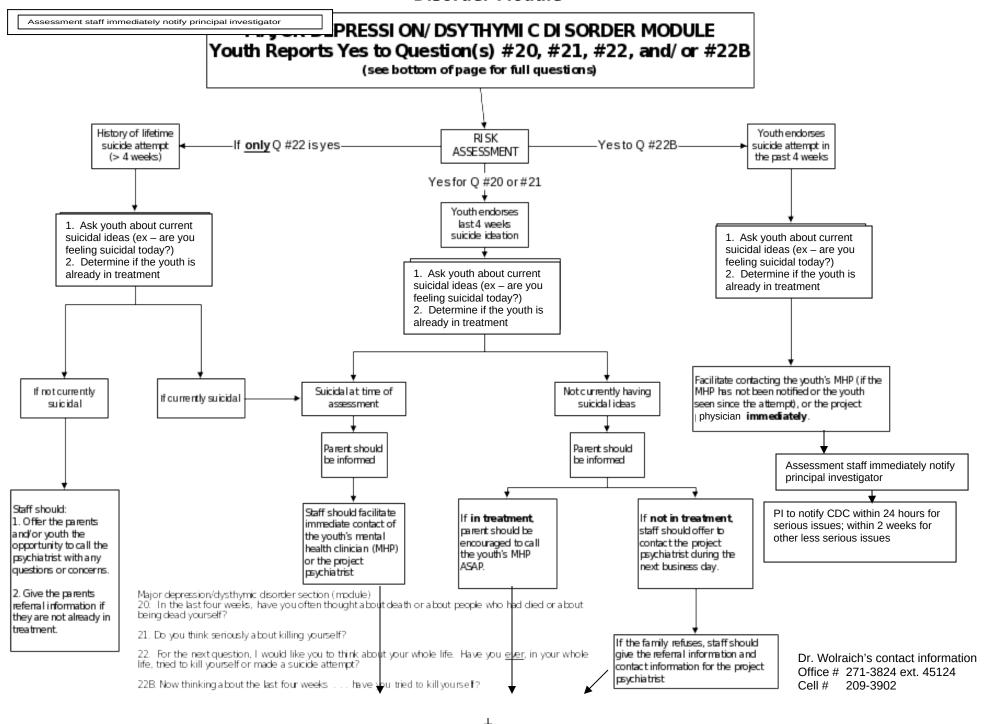

Post Tramatic Stress Disorder Section (module) Have you ever been attacked by somebody...or badly beaten?

Have you ever been very upset by someone forcing you to do something sexual that you didn't want to do?

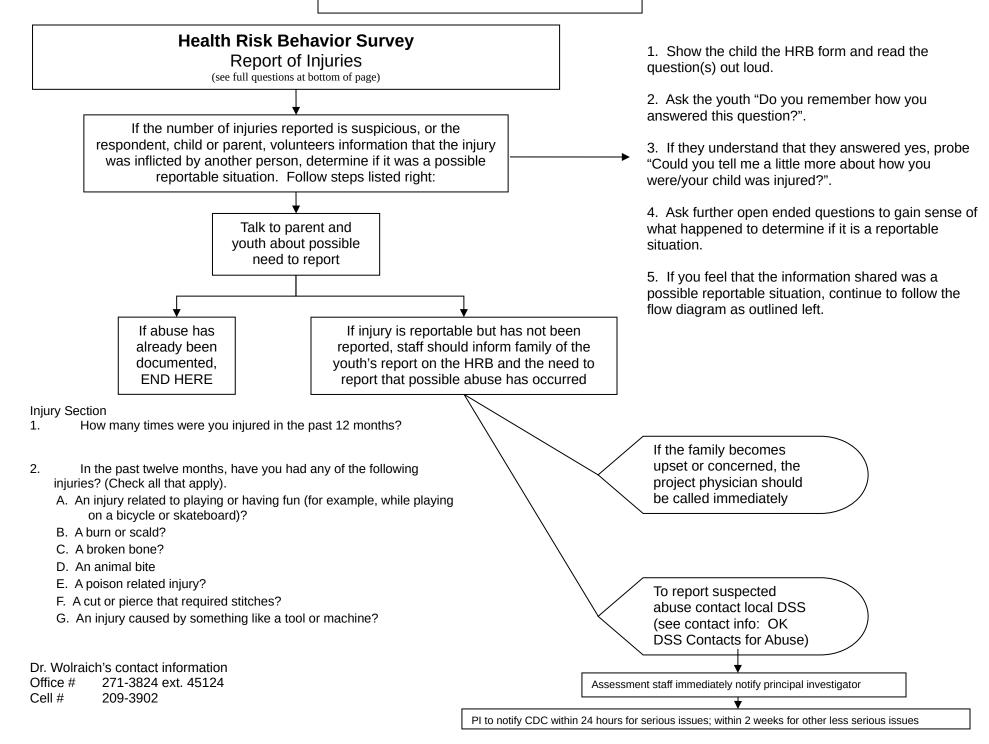

a. Have you ever been raped?

OK Play Triage Protocol for Major Depression/Dysthymic Disorder Module

OK Play Triage Protocol for HRBS

Health Risk Behavior Survey

Donort of Colf Harm

(Have you ever tried to intentionally hurt yourself?)

- 1. Show the child the HRB form and read the question(s) out loud.
- 2. Ask the youth "Do you remember how you answered this question?"
- 3. If they understand that they answered yes, ask something like "Could you tell me a little more about what you told me when you answered the question?"
- 4. Ask further open ended questions to gain sense of what happened to determine if the self harm was potentially suicidal in nature.

If the child volunteers information about the nature of the selfharm that indicates a potential suicide attempt, follow the steps outlined on the Major Depression/Dysthymic Module for "If only Q#22 is yes"

OK Play Triage Protocol for Parents'

Parents' Questionnaire

If the parent reports "Yes" to questions #1-#6:

Staff should:

- 1. Show the parent the Parents' Questionnaire and point out the question(s) that were answered "Yes."
- 2. Ask the parent if they have any concern(s) about the specific mental health issue(s) and offer the parents referral information if they are not already in treatment. For example, "Are you feeling concerned about "Feeling generally anxious for 6 months or more?" (Question #2b) And, "Would you be interested in receiving a referral sheet which contains several options for where you may go for help?"
- 3. Offer the parents the opportunity to call the project physician with any questions or concerns.

Assessment staff will notify project physician if the parent discusses any concerns with mental health issues or asks for referrals. Dr. Wolraich's contact information Office # 271-3824 ext. 45124 Cell # 209-3902
