Table 1 specifies the standard record format to be used for electronic cost reporting. Each electronic cost report submission (file) has three types of records. The first group (type one records) contains information for identifying, processing, and resolving problems. The text used throughout the cost report for variable line labels (e.g., Worksheet A) and variable column headers (Worksheet B-1) is included in the type two records. Refer to Table 5 for cost center coding. The data detailed in Table 3 are identified as type three records. The encryption coding at the end of the file, records 1, 1.01, and 1.02, are type 4 records.

The medium for transferring cost reports submitted electronically to fiscal intermediaries is 3½" diskette. These disks must be in IBM format. The character set must be ASCII. You must seek approval from your fiscal intermediary regarding alternate methods of submission to ensure that the method of transmission is acceptable.

The following are requirements for all records:

- 1. All alpha characters must be in upper case.
- 2. For micro systems, the end of record indicator must be a carriage return and line feed, in that sequence.
  - 3. No record may exceed 60 characters.

Below is an example of a set of type 1 records with a narrative description of their meaning.

Record #1: This is a cost report file submitted by Provider 147100 for the period from November 1, 1999 (1999305) through October 31, 2000 (2000305). It is filed on FORM CMS-1728-94. It is prepared with vendor number A99's PC based system, version number 1. Position 38 changes with each new test case and/or approval and is alpha. Positions 39 and 40 remain constant for approvals issued after the first test case. This file is prepared by the home health agency on January 31, 2000 (2000031). The electronic cost report specification dated October 31, 2000 (2000305) is used to prepare this file.

#### FILE NAMING CONVENTION

Name each cost report file in the following manner:

HHNNNNNN.YYL, where

- 1. HH (Home Health Agency Electronic Cost Report) is constant;
- 2. NNNNNN is the 6 digit Medicare home health agency provider number;
- 3. YY is the year in which the provider's cost reporting period ends; and
- 4. L is a character variable (A-Z) to enable separate identification of files from home health agencies with two or more cost reporting periods ending in the same calendar year.

The type 2 records contain both the text that appears on the pre-printed cost report and any labels added by the preparer. Of these, there are three groups: (1) Worksheet A cost center names (labels); (2) column headings for stepdown entries; and (3) other text appearing in various places throughout the cost report.

A Worksheet A cost center label must be furnished for every cost center with cost or charge data anywhere in the cost report. The line and subline numbers for each label must be the same as the line and subline numbers of the corresponding cost center on Worksheet A. The columns and subcolumn numbers are always set to zero.

Rev. 10 32-505

Column headings for the General Service cost centers on Worksheets B and B-1 and Worksheets J-1 (Part III), K-5 (Part II), CM-1 (Part III), FQ-1 (Part III), and RH-1 (Part III) (lines 1-3), are supplied once. They consist of one to three records. Each statistical basis shown on Worksheet B-1 and Worksheets J-1 (Part III), CM-1 (Part III), FQ-1 (Part III), and RH-1 (Part III) is also to be reported. The statistical basis consists of one or two records (lines 4-5). Statistical basis code is supplied only to Worksheet B-1 columns and is recorded as line 6. The statistical code must agree with the statistical bases indicated on lines 4 and 5, i.e., code 1 = square footage, code 2 = dollar value, and code 3 = all others. For transportation costs, use 4 as the code for mileage. Refer to Table 2 for the special worksheet identifier to be used with column headings and statistical basis and to Table 3 for line and column references.

The following type 2 cost center descriptions are to be used for all Worksheet A standard cost center lines.

RECORD NAME: Type 4 Records - File Encryption

This type 4 record consists of 3 records: 1, 1.01, and 1.02. These records are created at the point in which the ECR file has been completed and saved to disk and insures the integrity of the file.

#### ELECTRONIC REPORTING SPECIFICATIONS FOR FORM CMS-1728-94 TABLE 2 - WORKSHEET INDICATORS

This table contains the worksheet indicators that are used for electronic cost reporting. A worksheet indicator is provided for only those worksheets for which data are to be provided.

The worksheet indicator consists of seven digits in positions 2-8 of the record identifier. The first two digits of the worksheet indicator (positions 2 and 3 of the record identifier) always show the worksheet. The third digit of the worksheet indicator (position 4 of the record identifier) is used in several ways. First, it may be used to identify worksheets for multiple HHA-based components. Alternatively, it may be used as part of the worksheet, e.g., A83. For Worksheets A-4 and A-5, if there is a need for extra lines on multiple worksheets, the fifth and sixth digits of the worksheet indicator (positions 6 and 7 of the record identifier) identify the page number. An exception is Worksheet C, Part II which is a two digit identifier (positions 5 and 6 of the worksheet indicator (6 and 7 of record identifier)) which corresponds to the two digit subscript of question 29 on Worksheet S-3 identifying the MSA in which the provider performed services during the cost reporting period. The seventh digit of the worksheet indicator (position 8 of the record identifier) represents the worksheet or worksheet part.

#### ELECTRONIC REPORTING SPECIFICATIONS FOR FORM CMS-1728-94 TABLE 2 - WORKSHEET INDICATORS

#### FOOTNOTES:

- (a) Worksheets With Multiple Parts Using Identical Worksheet Indicator
  Although some worksheets have multiple parts, the lines are numbered sequentially. In these instances, the same worksheet identifier is used with all lines from this worksheet regardless of the worksheet part. This differs from the Table 3 presentation, which still identifies each worksheet and part as they appear on the printed cost report. This affects Worksheets S-3 and D and Worksheets A-8-3; C, Parts III, IV and V; J-2; J-3; CM-2; FQ-2; and RH-2.
- (b) <u>Multiple Subproviders (CORFs, CMHCs, RHCs, FQHCs, Hospices)</u>
  The third digit of the worksheet indicator (position 4 of the record) is numeric from 1 to 9 to accommodate multiple subproviders. If there is only one subprovider of that type, the default is 1. This affects Worksheets S-4; S-5; S-6; J-1, Parts I and III; J-2; J-3; J-4; CM-1, Parts I and III; CM-2; CM-3; CM-4; RH-1, Parts I and III; RH-2; FQ-1, Parts I and III; and FQ-2; K; K-1; K-2; K-3; K-4 Parts I and II; K-5 Parts I III; K-6.
- (c) <u>Multiple Worksheets for Reclassifications and Adjustments Before Stepdown</u>
  The fifth and sixth digits of the worksheet indicator (positions 6 and 7 of the record) are numeric from 01-99 to accommodate reports with more lines on Worksheets A-4 and A-5. For reports that do not need additional worksheets, the default is 01. For reports that do need additional worksheets, the first page is numbered 01. The number for each additional page of the worksheet is incremented by 1.
- (d) <u>Multiple Worksheets C, Part II for Cost Limitations Based on the MSA</u>
  The fifth and sixth digits of the worksheet indicator (positions 6 and 7 of the record) are numeric from 00-24 and correspond to the two digit subscript of line 29 on Worksheet S-3 (i.e., insert the identifier 02 for line 29.02) which identifies the 4 digit MSA code. If services are provided in only one MSA, the default is 00. Where an HHA provides services in multiple MSAs, one Worksheet C, Part II must be completed for each MSA.
- (e) Multiple Health Clinic Providers (RHCs, FQHCs)
  The third digit of the worksheet indicator (position 4 of the record) is numeric from 1 to 9 to accommodate multiple subproviders. If there is only one health clinic provider of that type, the default is 1. This affects Worksheets RF-1, RF-2, RF-3, RF-4 and RF-5. The fourth character of the worksheet indicator (position 5 of the record) indicates the health clinic provider. F indicates Federally Qualified Health Center, and R indicates Rural Health Clinic.
- (f) Multiple Worksheets A-8-3
  This worksheet is used for physical, occupational, or speech pathology therapy services furnished by outside suppliers. The fourth digit of the worksheet indicator (position 5 of the record) is an alpha character of P for physical therapy, O for occupational therapy, and S for speech pathology therapy services. Additionally, the fifth digit of the worksheet indicator (position 6 of the record) for physical therapy services furnished before April 10, 1998 is indicated by a numeric character of 0. Physical therapy services furnished on or after April 10, 1998 are indicated by a numeric character of 1 in this position.

Rev. 10 32-511

This table identifies those data elements necessary to calculate a home health agency cost report. It also identifies some figures from a completed cost report. These calculated fields (e.g., Worksheet B, column 6) are needed to verify the mathematical accuracy of the raw data elements and to isolate differences between the file submitted by the home health agency complex and the report produced by the fiscal intermediary. Where an adjustment is made, that record must be present in the electronic data file. For explanations of the adjustments required, refer to the cost report instructions.

Table 3 "Usage" column is used to specify the format of each data item as follows:

- 9 Numeric, greater than or equal to zero.
- -9 Numeric, may be either greater than, less than, or equal to zero.
- 9(x).9(y) Numeric, greater than zero, with x or fewer significant digits to the left of the decimal point, a decimal point, and exactly y digits to the right of the decimal point.
- X Character.

Consistency in line numbering (and column numbering for general service cost centers) for each cost center is essential. The sequence of some cost centers does change among worksheets.

Table 3 refers to the data elements needed from a standard cost report. When a standard line is subscripted, the subscripted lines must be numbered sequentially with the first subline number displayed as "01" or "1" (with a space preceding the 1) in field locations 14-15. It is unacceptable to format in a series of 10, 20, or skip subline numbers (i.e., 01, 03), except for skipping subline numbers for prior year cost center(s) deleted in the current period or initially created cost center(s) no longer in existence after cost finding. Exceptions are specified in this manual. For Other (specify) lines, i.e., Worksheet settlement series, all subscripted lines should be in sequence and consecutively numbered beginning with subscripted line number 01. Automated systems should reorder these numbers where providers skip or delete a line in the series.

Drop all records with zero values from the file. Any record absent from a file is treated as if it were zero.

All numeric values are presumed positive. Leading minus signs may only appear in data with values less than zero that are specified in Table 3 with a usage of "-9". Amounts that are within preprinted parentheses on the worksheets, indicating the reduction of another number, are reported as positive values.

- \* In each column using accumulated costs as the statistical basis for allocating costs, identify each cost center that is to receive no allocation with a negative 1 (-1) placed in the accumulated cost column. Providers may elect to indicate total accumulated cost as a negative amount in the reconciliation column. However, there should never be entries in both the reconciliation column and accumulated column simultaneously. For those cost centers that are to receive partial allocation of costs, provide only the cost to be excluded from the statistic as a negative amount on the appropriate line in the reconciliation column. If line 5 is fragmented, line 5 must be deleted and subscripts of line 5 must be used.
- ▲ For each cost center with associated A&G service costs applicable to contracted services (see §3214), the amount entered in column 0 reduces the net expenses for allocation dollar for dollar. After all general service costs have been allocated on Worksheet B and column 6 totaled, but before any amounts are transferred to from Worksheet B to Worksheet C, add back the contracted A&G service cost adjustment amount to the corresponding cost center.

#### ELECTRONIC REPORTING SPECIFICATIONS FOR FORM CMS 1728-94 TABLE 5 - COST CENTER CODING

#### INSTRUCTIONS FOR PROGRAMMERS

Cost center coding is required because there are thousands of unique cost center names in use by providers. Many of these names are peculiar to the reporting provider and give no hint as to the actual function being reported. Using codes to standardize meanings makes practical data analysis possible. The method to accomplish this must be rigidly controlled to assure accuracy.

For any added cost center names (the preprinted cost center labels must be precoded), preparers must be presented with the allowable choices for that line or range of lines from the lists of standard and nonstandard descriptions. They then select a description that best matches their added label. The code associated with the matching description, including increments due to choosing the same description more than once, will then be appended to the user's label by the software.

### Additional guidelines are:

- Do not allow any pre-existing codes for the line to be carried over.
- Do not precode all Other lines.
- For cost centers, the order of choice must be standard first, then specific nonstandard, and finally the nonstandard AOther . . ."
- For the nonstandard "Other . . . ", prompt the preparers with, "Is this the most appropriate choice?," and then offer the chance to answer yes or to select another description.
- Allow the preparers to invoke the cost center coding process again to make corrections.
- For the preparers' review, provide a separate printed list showing their added cost center names on the left with the chosen standard or nonstandard descriptions and codes on the right.
- On the screen next to the description, display the number of times the description can be selected on a given report, decreasing this number with each usage to show how many remain. The numbers are shown on the cost center tables.
- Do not change standard cost center lines, descriptions and codes. The acceptable formats for these items are listed on page 32-535 of the Standard Cost Center Descriptions and Codes. The proper line number is the first two digits of the cost center code.

#### INSTRUCTIONS FOR PREPARERS

#### **Coding of Cost Center Labels**

Cost center coding standardized the meaning of cost center labels used by health care providers on the Medicare cost reporting forms. The use of this coding methodology allows providers to continue to use their labels for cost centers that have meaning within the individual institution.

The four digit codes that are required to be associated with each label provide standardized meaning for data analysis. Normally, it is necessary to code only added labels because the preprinted standard labels are automatically coded by CMS approved cost report software.

Additional cost center descriptions have been identified. These additional descriptions are hereafter referred to as the nonstandard labels. Included with the nonstandard descriptions is an "Other . . ." designation to provide for situations where no match in meaning can be found. Refer to Worksheet A, line 23.

Rev. 5 32-533

#### ELECTRONIC REPORTING SPECIFICATIONS FOR FORM CMS 1728-94 TABLE 5 - COST CENTER CODING

Both the standard and nonstandard cost center descriptions along with their cost center codes are shown on Table 5. The "use" column on that table indicates the number of times that a given code can be used on one cost report. You are required to compare your added label to the descriptions shown on the standard and nonstandard tables for purposes of selecting a code. Most CMS approved software provides an automated process to present you with the allowable choices for the line/column being coded and automatically associates the code for the selected matching description with your label.

#### **Additional Guidelines**

#### **Categories**

Make a selection from the proper category such as general service description for general service lines, special purpose cost center descriptions for special purpose cost center lines, etc.

## <u>Use of a Cost Center Coding Description More Than Once</u>

Often a description from the "standard" or "nonstandard" tables applies to more than one of the labels being added or changed by the preparer. In the past, it was necessary to determine which code was to be used and then increment the code number upwards by one for each subsequent use. This was done to provide a unique code for each cost center label. Now, most approved software associate the proper code, including increments as required, once a matching description is selected. Remember to use your label. You are matching to CMS's description only for coding purposes.

### Cost Center Coding and Line Restrictions

Use cost center codes only in designated lines in accordance with the classification of cost center(s), e.g., lines 15 through 23 may only contain cost center codes within the nonreimbursable services cost center category of both standard and nonstandard coding.

#### Administrative and General Cost Centers

A&G can either be shown as one cost center with a code of 0500 or fragmented by one of two distinct methods. If A&G is fragmented, do not use line 5 or cost center code 0500. Elect one of the following options to allocate fragmented A&G service costs, but do not use both.

Option 1: Fragment the A&G service cost center into HHA shared costs, HHA 100% reimbursable costs, and HHA 100% nonreimbursable costs, in this order only:

Cost Center Description	Line Numbers	Cost Center Codes
A&G Shared costs A&G Reimbursable costs	5.01 5.02	0523 0521
A&G Nonreimbursable costs	5.03	0522

#### Option 2: Standard A&G service cost center fragmentation:

## ELECTRONIC REPORTING SPECIFICATIONS FOR FORM CMS-1728-94 TABLE 6 - EDITS

Medicare cost reports submitted electronically must be subjected to various edits, which are divided into two categories: Level I and level II edits. These include mathematical accuracy edits, certain minimum file requirements, and other data edits. Any vendor software that produces an electronic cost report file for Medicare home health agencies must automate all of these edits. Failure to properly implement these edits may result in the suspension of a vendor's system certification until corrective action is taken. The vendor's software should provide meaningful error messages to notify the home health agency of the cause of every exception. The edit message generated by the vendor systems must contain the related 4 digit and 1 alpha character, where indicated, reject/edit code specified below. Any file containing a level I edit will be rejected by your fiscal intermediary without exception.

Level I edits (1000 series reject codes) test that the file conforms to processing specifications, identifying error conditions that would result in a cost report rejection. These edits also test for the presence of some critical data elements specified in Table 3. Level II edits (2000 series edit codes) identify potential inconsistencies and/or missing data items that may have exceptions and should not automatically cause a cost report rejection. Resolve these items and submit appropriate worksheets and/or data supporting the exceptions with the cost report. Failure to submit the appropriate data with your cost report may result in payments being withheld pending resolution of the issue(s).

The vendor requirements (above) and the edits (below) reduce both intermediary processing time and unnecessary rejections. Vendors should develop their programs to prevent their client home health agencies from generating either a hard copy substitute cost report or electronic cost report file where level I edits exist. Ample warnings should be given to the provider where level II edit conditions are violated.

**NOTE:** Dates in brackets [ ] at the end of an edit indicate the effective date of that edit for cost reporting periods ending on or after that date. Dates followed by a "b" are for cost reporting periods beginning on or after the specified date. Dates followed by an "s" are for services rendered on or after the specified date unless otherwise noted. [10/31/2000]

## II. Level II Edits (Potential Rejection Errors)

These conditions are usually, but not always, incorrect. These edit errors should be cleared when possible through the cost report. When corrections on the cost report are not feasible, provide additional information in schedules, note form, or any other manner as may be required by your fiscal intermediary (FI). Failure to clear these errors in a timely fashion, as determined by your FI, may be grounds for withholding payments.
