

Evaluator Update (Year 2 and 3)

The Evaluator Updates are intended to keep the data in the Registry as current as possible. Entries that have not been updated in 18 months are eliminated, and so to encourage updates, the WWC sends the registered evaluators reminders (as described on p.8 of Part A of the Supporting Statement). Examples of information that might be updated are contact information, new studies that the evaluator has worked on, or new publications that the evaluator has authored/co-authored.
