CURRENT INDUSTRIAL REPORTS

2006 MA325G — PHARMACEUTICAL PREPARATIONS, EXCEPT BIOLOGICALS (MANUFACTURERS)

DEFINITIONS AND SPECIAL INSTRUCTIONS

1. Scope of survey

This survey covers manufacturers of pharmaceutical preparations, except biologicals, in the United States, and includes all preparations which can be dispensed in measured portions to produce the therapeutic effect for which the preparation is most commonly employed (liquids, tablets, pills, capsules, lozenges, powders, ointments, jellies, salves, inhaler tubes, etc.). Products manufactured in Puerto Rico or other U.S. possessions should be excluded.

2. Figures to be reported

Companies with more than one establishment manufacturing the products covered by this survey are requested to complete a separate report form for each location. If you have not received a separate form for each of your establishments, please call the contact listed on the report form or write to the U.S. Census Bureau for additional forms.

Operations for which data should be reported include:

Manufacturing drugs in packaged dosage form for consumer use

Manufacturing drugs in dosage form and shipping in "bulk" type containers for repackaging or for export

Compounding pharmaceutical preparations and shipping dosage forms in "bulk"

Please examine the reference list to determine which of the listed pharmaceuticals are produced by you. If you are unable to find a specific line which describes a drug product, include this product in the not elsewhere classified (n.e.c.) product category at the end of the product grouping with which it is most closely associated. In the "n.e.c." products categories, a separate line should be used to describe and report each major product. Describe each "n.e.c." product by using common commercial name, generic name, or other specific name, and enter any other name, description, or use that will help to classify the product using the "Remarks" section for additional space if necessary.

a. Value of shipments

Report total value of shipments of each pharmaceutical preparation sold, transferred to other establishments within your company, or shipped on consignment, whether for domestic or export sale. Value represents the net sales price, f.o.b. plant, to the customer or branch to which the products are shipped, net of discounts, allowances, freight charges, and returns. Shipments to your own branches should be assigned the same value as comparable sales to unaffiliated customers, i.e., the value includes an appropriate allocation of company overhead and profit.

Products bought and resold without further manufacture should not be included in shipments.

Establishments shipping dosage forms, in bulk and requiring repackaging, to other establishments of the same company, should report in column (4) a transfer value reflecting only services or operations performed including profit (or loss) normally assigned to the manufacturing establishment. For plants shipping similar products to other companies for repackaging report in column (4) dosage forms shipped in bulk at net sales value as defined above.

Commercial shipments (packaged for consumer use) Report the value of each drug product produced in dosage form, packaged for consumer use and shipped from this establishment to sales branches, warehouses of your company, wholesale or retail stores, and other commercial customers such as hospitals, institutions, etc.

Contract operations include shipments of products made for others from your own materials. Exclude receipts for capsulating and/or packaging of preparations owned by others; companies for whom such work is done should report value of shipments of these products.

b. Units of measure

Report values in thousands of dollars.

c. Columnar structure of report

When posting your figures to the original report, be sure to report the information in the correct columns.

Column 1 (Total) — Report the sum of columns 2 through 4.

Column 2 (Prescription legend) — Report the value of each drug product which by Federal Law is available only by prescription from a licensed practitioner.

Column 3 (Non-prescription) — Report the value of each non-prescription drug product shipped.

Column 4 (Bulk shipments) — Report the value of each drug product shipped in dosage forms, or in bulk, requiring only repackaging.

Note: Export shipments are to be included in these figures.

3. Definitions

The product detail for this survey, as shown in the Reference List is defined according to standard nomenclature for this industry.
