I think I understood I could email comments or mail the comments on the proposed new ABN forms. I will also print and mail.

1. Sample G of the ABN form is the most user friendly
2. Like the revision to 3 Options.
3. I think keep it simple stupid is the best method-one form, do not have different forms for different services. This has always been a problem and very confusing.
4. Not using correctly is educational issue not form issue.

Billing and Collections would be much easier to understand if the "keep it simple stupid" method was applied. There would be less overpayments and less "fraud" because most of this is due to the complexity of the rules.

Thank you for your time.

NOTE: Email is quirky so please contact me via telephone if you have not heard from me in 24 hours. There are servers such as yahoo that have sending/receiving problems with AOL.
