ELECTRONIC REPORTING SPECIFICATIONS FOR FORM CMS-265-94
TABLE 1 - RECORD SPECIFICATIONS

Table 1 specifies the standard record format to be used for electronic cost reporting. Each electronic cost report submission (file) has three types of records. The first group (type one records) contains information for identifying, processing, and resolving problems. The text used throughout the cost report for variable line labels (e.g., Worksheet A) and variable column headers (Worksheet B-1) is included in the type two records. Refer to Table 5 for cost center coding. The data detailed in Table 3 are identified as type three records. The encryption coding at the end of the file, records 1, 1.01, and 1.02, are type 4 records.

The medium for transferring cost reports submitted electronically to fiscal intermediaries is 3½" diskette. These disks must be in IBM format. The character set must be ASCII. You must seek approval from your fiscal intermediary regarding alternate methods of submission to ensure that the method of transmission is acceptable.

The following are requirements for all records:

1. All alpha characters must be in upper case.
2. For micro systems, the end of record indicator must be a carriage return and line feed, in that sequence.
3. No record may exceed 60 characters.

Below is an example of a set of type 1 records with a narrative description of their meaning.

Record #1: This is a cost report file submitted by Provider 279999 for the period from January 1, 2004 (2004001) through December 31, 2004 (2004366). It is filed on FORM CMS-265-94. It is prepared with vendor number A99's PC based system, version number 1. Position 38 changes with each new test case and/or approval and is alpha. Positions 39 and 40 remain constant for approvals issued after the first test case. This file is prepared by the independent renal dialysis facility on January 31, 2005 (2005031). The electronic cost report specification dated December 31, 2004 (2004366) is used to prepare this file.

FILE NAMING CONVENTION

Name each cost report file in the following manner:

RDNNNNNN.YYL, where

1. RD (Independent Renal Dialysis Facility Electronic Cost Report) is constant;
2. NNNNNN is the 6 digit Medicare independent renal dialysis facility provider number;
3. YY is the year in which the provider's cost reporting period ends; and
4. L is a character variable (A-Z) to enable separate identification of files from independent renal dialysis facility with two or more cost reporting periods ending in the same calendar year.

9. Labels/Headings				
a. Line Labels	36	X	25-60	Alphanumeric, left justified
b. Column Headings Statistical Basis & Code	10	X	21-30	Alphanumeric, left justified

The type 2 records contain both the text that appears on the pre-printed cost report and any labels added by the preparer. Of these, there are three groups: (1) Worksheet A cost center names (labels); (2) column headings for stepdown entries; and (3) other text appearing in various places throughout the cost report.

A Worksheet A cost center label must be furnished for every cost center with cost or charge data anywhere in the cost report. The line and subline numbers for each label must be the same as the line and subline numbers of the corresponding cost center on Worksheet A. The columns and subcolumn numbers are always set to zero.

TABLE 1 - RECORD SPECIFICATIONS

Column headings for the General Service cost centers on Worksheets B and B-1 are supplied once. They consist of one to three records. Each statistical basis shown on Worksheet B-1 is also to be reported. The statistical basis consists of one or two records (lines 4-5). Statistical basis code is supplied only to Worksheet B-1 columns and is recorded as line 6. The statistical code must agree with the statistical bases indicated on lines 4 and 5, i.e., code 1 = square footage, code 2 = dollar value, and code 3 = all others. Refer to Table 2 for the special worksheet identifier to be used with column headings and statistical basis and to Table 3 for line and column references.

The following type 2 cost center descriptions are to be used for all Worksheet A standard cost center lines.

RECORD NAME: Type 4 Records - File Encryption

This type 4 record consists of 3 records: 1, 1.01, and 1.02. These records are created at the point in which the ECR file has been completed and saved to disk and insures the integrity of the file.

**ELECTRONIC REPORTING SPECIFICATIONS FOR FORM CMS-265-94
TABLE 2 - WORKSHEET INDICATORS**

This table contains the worksheet indicators that are used for electronic cost reporting. A worksheet indicator is provided for only those worksheets for which data are to be provided.

The worksheet indicator consists of seven digits in positions 2-8 of the record identifier. The first two digits of the worksheet indicator (positions 2 and 3 of the record identifier) always show the worksheet. The third digit of the worksheet indicator (position 4 of the record identifier) is always 0. For Worksheets A-1 and A-2, if there is a need for extra lines on multiple worksheets, the fifth and sixth digits of the worksheet indicator (positions 6 and 7 of the record identifier) identify the page number. The seventh digit of the worksheet indicator (position 8 of the record identifier) represents the worksheet or worksheet part.

TABLE 2 - WORKSHEET INDICATORS

FOOTNOTES:

(a) Multiple Worksheets for Reclassifications and Adjustments Before Stepdown

The fifth and sixth digits of the worksheet indicator (positions 6 and 7 of the record) are numeric from 01-99 to accommodate reports with more lines on Worksheets A-1. For reports that do not need additional worksheets, the default is 01. For reports that do need additional worksheets, the first page is numbered 01. The number for each additional page of the worksheet is incremented by 1.

b) Multiple ESRD Payment Rates

The sixth digit of the worksheet indicator (position 7 of the record) is numeric from 1 to 9 to accommodate two or more payment rates in effect during one cost reporting period. If there is only a single payment rate, the default is 1. This applies only to Worksheet C. *NOTE: For cost reporting periods beginning on or after April 1, 2005, the sixth digit of the worksheet indicator (position 7 of the record) will always default to 1, as Worksheet C is no longer subscriptable.*

TABLE 3 - LIST OF DATA ELEMENTS WITH WORKSHEET, LINE, AND COLUMN
DESIGNATIONS

This table identifies those data elements necessary to calculate a independent renal dialysis cost report. It also identifies some figures from a completed cost report. These calculated fields (e.g., Worksheet B, column 8) are needed to verify the mathematical accuracy of the raw data elements and to isolate differences between the file submitted by the independent renal dialysis facility and the report produced by the fiscal intermediary. Where an adjustment is made, that record must be present in the electronic data file. For explanations of the adjustments required, refer to the cost report instructions.

Table 3 "Usage" column is used to specify the format of each data item as follows:

9	Numeric, greater than or equal to zero.
-9	Numeric, may be either greater than, less than, or equal to zero.
9(x).9(y)	Numeric, greater than zero, with x or fewer significant digits to the left of the decimal point, a decimal point, and exactly y digits to the right of the decimal point.
X	Character.

Consistency in line numbering (and column numbering for general service cost centers) for each cost center is essential. The sequence of some cost centers does change among worksheets.

Table 3 refers to the data elements needed from a standard cost report. When a standard line is subscripted, the subscripted lines must be numbered sequentially with the first subline number displayed as "01" or " 1" (with a space preceding the 1) in field locations 14-15. It is unacceptable to format in a series of 10, 20, or skip subline numbers (i.e., 01, 03), except for skipping subline numbers for prior year cost center(s) deleted in the current period or initially created cost center(s) no longer in existence after cost finding. Exceptions are specified in this manual. For Other (specify) lines, i.e., Worksheet settlement series, all subscripted lines should be in sequence and consecutively numbered beginning with subscripted line number 01. Automated systems should reorder these numbers where providers skip or delete a line in the series.

Drop all records with zero values from the file. Any record absent from a file is treated as if it were zero.

All numeric values are presumed positive. Leading minus signs may only appear in data with values less than zero that are specified in Table 3 with a usage of "-9". Amounts that are within preprinted parentheses on the worksheets, indicating the reduction of another number, are reported as positive values.

TABLE 5 - COST CENTER CODING

INSTRUCTIONS FOR PROGRAMMERS

Cost center coding is required because there are thousands of unique cost center names in use by providers. Many of these names are peculiar to the reporting provider and give no hint as to the actual function being reported. Using codes to standardize meanings makes practical data analysis possible. The method to accomplish this must be rigidly controlled to assure accuracy.

For any added cost center names (the preprinted cost center labels must be precoded), preparers must be presented with the allowable choices for that line or range of lines from the lists of standard and nonstandard descriptions. They then select a description that best matches their added label. The code associated with the matching description, including increments due to choosing the same description more than once, will then be appended to the user's label by the software.

Additional guidelines are:

- Do not allow any pre-existing codes for the line to be carried over.
- Do not precode all Other lines.
- For cost centers, the order of choice must be standard first, then specific nonstandard, and finally the nonstandard "Other . . ."
- For the nonstandard "Other . . .", prompt the preparers with, "Is this the most appropriate choice?," and then offer the chance to answer yes or to select another description.
- Allow the preparers to invoke the cost center coding process again to make corrections.
- For the preparers' review, provide a separate printed list showing their added cost center names on the left with the chosen standard or nonstandard descriptions and codes on the right.
- On the screen next to the description, display the number of times the description can be selected on a given report, decreasing this number with each usage to show how many remain. The numbers are shown on the cost center tables.
- Do not change standard cost center lines, descriptions and codes. The acceptable formats for these items are listed on page 34-524 of the Standard Cost Center Descriptions and Codes. The proper line number is the first two digits of the cost center code.

INSTRUCTIONS FOR PREPARERS

Coding of Cost Center Labels

Cost center coding standardized the meaning of cost center labels used by health care providers on the Medicare cost reporting forms. The use of this coding methodology allows providers to continue to use their labels for cost centers that have meaning within the individual institution.

The four digit codes that are required to be associated with each label provide standardized meaning for data analysis. Normally, it is necessary to code only added labels because the preprinted standard labels are automatically coded by CMS approved cost report software.

Additional cost center descriptions have been identified. These additional descriptions are hereafter referred to as the nonstandard labels. Included with the nonstandard descriptions is an "Other . . ." designation to provide for situations where no match in meaning can be found. Refer to Worksheet A, line 17 or 26.

ELECTRONIC REPORTING SPECIFICATIONS FOR FORM CMS 265-94
TABLE 5 - COST CENTER CODING

Both the standard and nonstandard cost center descriptions along with their cost center codes are shown on Table 5. The "use" column on that table indicates the number of times that a given code can be used on one cost report. You are required to compare your added label to the descriptions shown on the standard and nonstandard tables for purposes of selecting a code. Most CMS approved software provides an automated process to present you with the allowable choices for the line/column being coded and automatically associates the code for the selected matching description with your label.

Additional Guidelines

Categories

Make a selection from the proper category such as general service description for general service lines, nonreimbursable cost center descriptions for nonreimbursable cost center lines, etc.

Use of a Cost Center Coding Description More Than Once

Often a description from the "standard" or "nonstandard" tables applies to more than one of the labels being added or changed by the preparer. In the past, it was necessary to determine which code was to be used and then increment the code number upwards by one for each subsequent use. This was done to provide a unique code for each cost center label. Now, most approved software associate the proper code, including increments as required, once a matching description is selected. Remember to use your label. You are matching to CMS's description only for coding purposes.

Cost Center Coding and Line Restrictions

Use cost center codes only in designated lines in accordance with the classification of cost center(s), e.g., lines 22 through 26 may only contain cost center codes within the nonreimbursable services cost center category of both standard and nonstandard coding. Refer to Table 1 for Type 2 cost center descriptions.

ELECTRONIC REPORTING SPECIFICATIONS FOR FORM CMS-265-94
TABLE 6 - EDITS

Medicare cost reports submitted electronically must be subjected to various edits, which are divided into two categories: Level I and level II edits. These include mathematical accuracy edits, certain minimum file requirements, and other data edits. Any vendor software that produces an electronic cost report file for Medicare ESRD must automate all of these edits. Failure to properly implement these edits may result in the suspension of a vendor's system certification until corrective action is taken. The vendor's software should provide meaningful error messages to notify the home health agency of the cause of every exception. The edit message generated by the vendor systems must contain the related 4 digit and 1 alpha character, where indicated, reject/edit code specified below. Any file containing a level I edit will be rejected by your fiscal intermediary without exception.

Level I edits (1000 series reject codes) test that the file conforms to processing specifications, identifying error conditions that would result in a cost report rejection. These edits also test for the presence of some critical data elements specified in Table 3. Level II edits (2000 series edit codes) identify potential inconsistencies and/or missing data items that may have exceptions and should not automatically cause a cost report rejection. Resolve these items and submit appropriate worksheets and/or data supporting the exceptions with the cost report. Failure to submit the appropriate data with your cost report may result in payments being withheld pending resolution of the issue(s).

The vendor requirements (above) and the edits (below) reduce both intermediary processing time and unnecessary rejections. Vendors should develop their programs to prevent their client home health agencies from generating either a hard copy substitute cost report or electronic cost report file where level I edits exist. Ample warnings should be given to the provider where level II edit conditions are violated.

NOTE: Dates in brackets [] at the end of an edit indicate the effective date of that edit for cost reporting periods ending on or after that date. Dates followed by a "b" are for cost reporting periods beginning on or after the specified date. Dates followed by an "s" are for services rendered on or after the specified date unless otherwise noted.

I. Level I Edits (Minimum File Requirements)

<u>Reject Code</u>	<u>Condition</u>
1000	The first digit of every record must be either 1, 2, 3, or 4 (encryption code only). [12/31/2004]
1005	No record may exceed 60 characters. [12/31/2004]
1010	All alpha characters must be in upper case. This is exclusive of the encryption code, type 4 record, record numbers 1, 1.01, and 1.02. [12/31/2004]
1015	For micro systems, the end of record indicator must be a carriage return and line feed, in that sequence. [12/31/2004]
1020	The independent renal dialysis facility provider number (record #1, positions 17-22) must be valid and numeric. [12/31/2004]
1025	All dates (record #1, positions 23-29, 30-36, 45-51, and 52-58) must be in Julian format and legitimate. [12/31/2004]
1030	The fiscal year beginning date (record #1, positions 23-29) must be less than the fiscal year ending date (record #1, positions 30-36). [12/31/2004]

<u>Reject Code</u>	<u>Condition</u>
1035	The vendor code (record #1, positions 38-40) must be a valid code. [12/31/2004]
1050	The type 1 record #1 must be correct and the first record in the file. [12/31/2004]
1055	All record identifiers (positions 1-20) must be unique. [12/31/2004]
1060	Only a Y or N is valid for fields which require a Yes/No response. [12/31/2004]
1075	Cost center integrity must be maintained throughout the cost report. For subscripted lines, the relative position must be consistent throughout the cost report. [12/31/2004]
1080	For every line used on Worksheets A, there must be a corresponding type 2 record. [12/31/2004]
1090	Fields requiring numeric data (charges, treatments, costs, FTEs, etc.) may not contain any alpha character. [12/31/2004]
1100	In all cases where the file includes both a total and the parts that comprise that total, each total must equal the sum of its parts. [12/31/2004]
1005S	The cost report ending date (Worksheet S, column 2, line 4) must be on or after December 31, 2004. [12/31/2004]
1015S	The cost report period beginning date (Worksheet S, column 1, line 5) must precede the cost report ending date (Worksheet S, column 2, line 5). [12/31/2004]
1020S	The independent renal dialysis facility name, address, provider number, and certification date (Worksheet S, line 1, column 1; line 1.01, column 1; line 1.02, columns 1, 2, & 3; and line 1.03, column 1) must be present and valid. [12/31/2004]
<i>1021S</i>	<i>The type of control (Worksheet S, line 6, column 1) must be present and a valid code of 1 thru 11. [4/1/2005]</i>
1025S	The independent renal dialysis total number of hours per work week must be greater than zero (0) (Worksheet S-1, line 20, column 0). [12/31/2004]
1030S	The total number FTEs for Social Workers must be greater than zero (0) (Worksheet S-1, line 25, sum of columns 1 and 2). [12/31/2004]
1000A	All amounts reported on Worksheet A, columns 1-3, line 27, must be greater than or equal to zero. [3/31/1997]
1020A	For reclassifications reported on Worksheet A-1 the sum of all increases (column 4) must equal the sum of all decreases (column 7). [12/31/2004]
1025A	For each line on Worksheet A-1, if there is an entry in columns 3, 4, 6, or 7, there must be an entry in column 1. There must be an entry on each line of column 4 for each entry in column 3 (and vice versa), and there must be an entry on each line of column 7 for each entry in column 6 (and vice versa). [12/31/2004]
1040A	For Worksheet A-2 adjustments on lines <i>1,3-6,8,9,11</i> , and <i>12</i> , and if either columns 2 or 4 has an entry, then both columns 2 and 4 must have entries, and if any one of columns 0, 1, 2, or 4 for lines 17-20 and subscripts thereof has an entry, then all columns 0, 1, 2, and 4 must have entries. Only valid line numbers may be used in column 4. [12/31/2004]

II. Level II Edits (Potential Rejection Errors)

These conditions are usually, but not always, incorrect. These edit errors should be cleared when possible through the cost report. When corrections on the cost report are not feasible, provide additional information in schedules, note form, or any other manner as may be required by your fiscal intermediary (FI). Failure to clear these errors in a timely fashion, as determined by your FI, may be grounds for withholding payments.

<u>Edit</u>	<u>Condition</u>
2000	All type 3 records with numeric fields and a positive usage must have values equal to or greater than zero (supporting documentation may be required for negative amounts). [12/31/2004]
2005	Only elements set forth in Table 3, with subscripts as appropriate, are required in the file . [12/31/2004]
2010	The cost center codes (positions 21-24) (type 2 records) must be a code from Table 5, and each cost center code must be unique. [12/31/2004]
2015	Standard cost center lines, descriptions, and codes should not be changed. (See Table 5.) This edit applies to the standard line only and not subscripts of that code. [12/31/2004]
2020	All standard cost center codes must be entered on the designated standard cost center line and subscripts thereof as indicated in Table 5. [12/31/2004]
2025	Only nonstandard cost center codes within a cost center category may be placed on standard cost center lines of that cost center category. [12/31/2004]
2030	The standard cost centers listed below must be reported on the lines as indicated and the corresponding cost center codes may only appear on the lines as indicated. No other cost center codes may be placed on these lines or subscripts of these lines, unless indicated herein. [12/31/2004]
