Monitoring Priority: Early Intervention Services In Natural Environments		
1. Percent of infants and toddlers with IFSPs who receive the early intervention services on their IFSPs in a timely manner. (20 U.S.C. 1416(a)(3)(A) and 1442)	<p>Data Source: Data to be taken from monitoring or State data system and must be based on actual, not an average, number of days. Include the State's criteria for "timely" receipt of early intervention services, i.e., time period from parent consent to IFSP services initiation date.</p> <p>Measurement: Percent = [# of infants and toddlers with IFSPs who receive the early intervention (EI) services on their IFSPs in a timely manner) divided by the (total # of infants and toddlers with IFSPs)] times 100. Indicate the range of delays and reasons for untimely receipt of services due to causes other than documented exceptional family circumstances.</p>	<p><i>When data is taken from State monitoring, States must describe the method used to select EIS programs for monitoring.</i></p> <p>Targets must be 100%.</p> <p>Describe the results of the calculations and compare the results to the target. Include the timely initiation of new early intervention services from both initial IFSPs and subsequent IFSPs.</p> <p>States are not required to include in their calculation the number of children for whom the State has identified the cause for the delay as exceptional family circumstances documented in the child's record. If a State chooses to include in its calculation children for whom the State has identified the cause for the delay as exceptional family circumstances documented in the child's record, these numbers are to be included in the numerator and denominator. Include in the discussion of the data, the numbers the State used to determine its calculation under this indicator and report separately the number of documented delays attributable to family circumstances.</p> <p>Provide detailed information about the timely correction of noncompliance as noted in OSEP's review of the previous APR. If the State did not correct the previous noncompliance, provide information regarding the nature of the continuing noncompliance, improvement activities completed (e.g., review of policies and procedures, technical</p>
