COMMUNITY CHARACTERISTICS

Instructions to Applicants: Community-wide and target population data should reflect all counties, cities, etc., in the applicant's proposed scope of the project. Community-wide data should include the total number of persons and the percent of the total population in the service area for each characteristic. Target population data is a subset of the community-wide data. Target population includes the number of persons and the percent of the total population the health center **targets** for each characteristic. Estimates are acceptable. *Please do not utilize user/patient data reported in the Uniform Data System to report target population data.*

	CHARACTERISTIC	**COMMUNITY WIDE DATA**		**TARGET POPULATION DATA**	
		#	**%**	**#**	**%**
