Excerpts From The Public Health Services Act

PART C -- SPECIFIC PROVISIONS RESPECTING NATIONAL RESEARCH INSTITUTES

Back to Top

Subpart 1 -- National Cancer Institute

PURPOSE OF INSTITUTE

SEC. 410. [285] The general purpose of the National Cancer Institute (hereafter in this subpart referred to as the "Institute") is the conduct and support of research, training, health information dissemination, and other programs with respect to the cause, diagnosis, prevention, and treatment of cancer, rehabilitation from cancer, and the continuing care of cancer patients and the families of cancer patients.

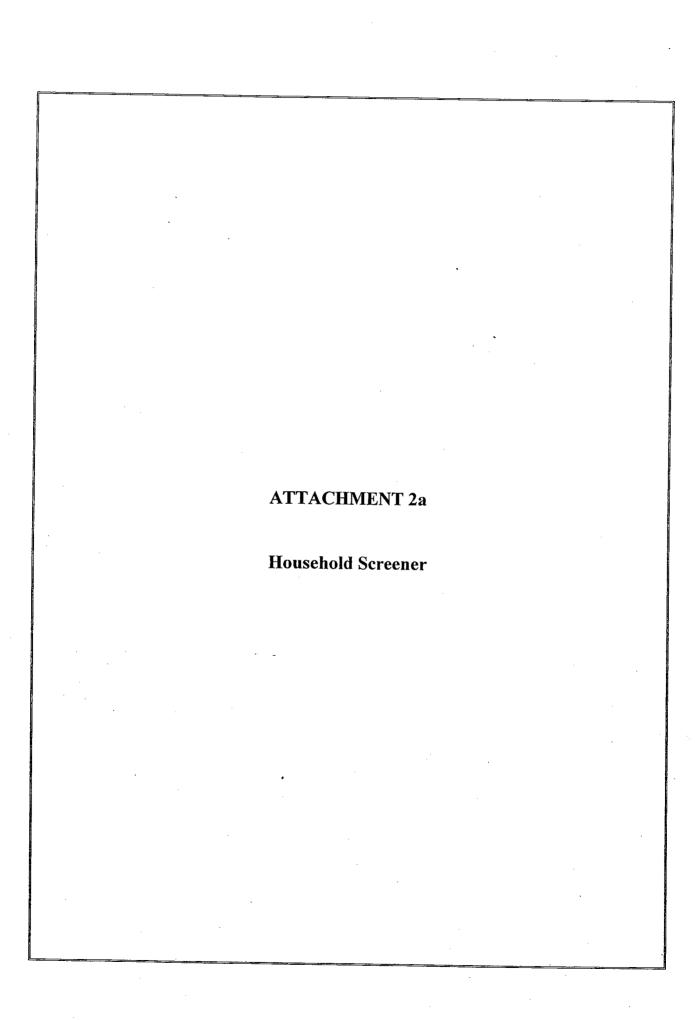

NATIONAL CANCER PROGRAM

SEC. 411. [285a] The National Cancer Program shall consist of (1) an expanded, intensified, and coordinated cancer research program encompassing the research programs conducted and supported by the Institute and the related research programs of the other national research institutes, including an expanded and intensified research program for the prevention of cancer caused by occupational or environmental exposure to carcinogens, and (2) the other programs and activities of the Institute.

CANCER CONTROL PROGRAMS

Back to Top

- SEC. 412. [285a-1] The Director of the Institute shall establish and support demonstration, education, and other programs for the detection, diagnosis, prevention, and treatment of cancer and for rehabilitation and counseling respecting cancer. Programs established and supported under this section shall include--
- (1) locally initiated education and demonstration programs (and regional networks of such programs) to transmit research results and to disseminate information respecting--
- (A) the detection, diagnosis, prevention, and treatment of cancer,
- (B) the continuing care of cancer patients and the families of cancer patients, and
- (C) rehabilitation and counseling respecting cancer, to physicians and other health professionals who provide care to individuals who have cancer;
- (2) the demonstration of and the education of students of the health professions and health professionals in-
- (A) effective methods for the prevention and early detection of cancer and the identification of individuals with a high risk of developing cancer, and
- (B) improved methods of patient referral to appropriate centers for early diagnosis and treatment of cancer; and
- (3) the demonstration of new methods for the dissemination of information to the general public concerning the prevention, early detection, diagnosis, and treatment and control of cancer and information concerning unapproved and ineffective methods, drugs, and devices for the diagnosis, prevention, treatment, and control of cancer.

HINTS II

HEALTH INFORMATION NATIONAL TRENDS SURVEY

MAIN STUDY INTERVIEW INSTRUMENT (ENGLISH)

June 2004

OMB Version

NATIONAL CANCER INSTITUTE (NCI)

The Privacy Act requires us to tell you that we are authorized to collect this information by Section 285a, 42 USC. You do not have to provide the information requested. However, the information you provide will help the National Cancer Institute's ongoing efforts to promote good health and prevent disease. There are no penalties should you choose <u>not</u> to participate in this study.

The information we collect in this study is in accordance with the clearance requirements of the paperwork Reduction Act of 1995. We may not conduct or sponsor, and you are not required to respond to, a collection of information unless it displays a valid control number from the Office of Management and Budget in the Federal Government. We estimate that it will take you between 20 and 30 minutes to answer our questions in this interview. This includes the time it takes to hear the instructions, gather the necessary facts, and complete the interview. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to: NIH, Project Clearance Branch, 6705 Rockledge Drive, MSC 7974, Bethesda, MD 20892-7974, ATTN: PRA (0925-xxxx)

HOUSEHOLD ENUMERATION (HE)

HE-0.	PHONE NUMBER]
	USE AUTODIALER
	_1] Hello, the National Cancer Institute, a Federal government agency, is conducting a nationwide survey to understand people like you may have about cancer.
HE-1.	Are you a member of this household and at least 18 years old?
	YES
HE-2.	May I speak to a member of this household who is at least 18 years old?
	AVAILABLE
HE-3.	Is this phone number used for
	home use,
You ma	TRO] The main purpose of this study is to learn what people know about cancer and how they get their information about it. have received a letter from the National Cancer Institute introducing this study. I have some questions to see whether you or ber of your household may be eligible to participate in this survey.
HE-4.	Including yourself, how many people <u>aged 18 or older</u> currently live in this household? [IF NEEDED: "Include people who <u>usually</u> stay in this household, but are temporarily away on business, vacation, or in the hospital. Do <u>not</u> include persons who are away on full-time active military duty with the armed forces, students living away from

home in their own apartment, or any other family member who may be in a nursing home or other institution."]

OF ADULT HH MEMBERS

Dear Friend:

Few things in life are as important as health. I am writing to encourage your household's participation in an important national survey sponsored by the National Cancer Institute (NCI), part of the National Institutes of Health. The survey, known as the Health Information National Trends Survey, is authorized under 42 USC, Section 285a. The survey concerns what people know, believe and do about certain aspects of their health. The results of the study will help NCI's ongoing effort to promote good health and prevent disease.

Your household was selected at random for this nationwide survey. Westat, a research firm in Rockville, Maryland, is collecting data for this study for NCI. Sometime in the next month, a Westat interviewer will call your household.

Your participation is voluntary, but we would greatly appreciate your assistance. Be assured that there will be no penalties if you decide not to respond, either to the information collection as a whole, or to any particular question. The information you provide will be kept confidential and will not be disclosed in identifiable form to anyone but the researchers conducting this study or as provided by law.

Whether you are in good health or have health problems and whether or not you or anyone in your family has ever had cancer, your input and opinions are crucial to the success of this study. Your answers, combined with those of other survey respondents, will help the National Cancer Institute better serve the information needs of the American public. We hope that when you are contacted you will agree to help. Responding to the survey will take 20 to 30 minutes, depending on your answers.

We know that people receive many requests to be in surveys, and that your time is valuable. We have enclosed \$2 as a token of our appreciation for your participation in the study. Thank you in advance for your cooperation. If you have any questions about the study or you would like to go ahead and schedule your interview, you may call Westat at 1-888-

Sincerely,

Brad W. Hesse, Ph.D. HINTS Project Officer Behavioral Research Program National Cancer Institute

. •

Some Frequently Asked Questions

What is the study about? What kind of questions will you be asking?

We will ask for your views and beliefs about cancer, and other health-related topics. We will also ask about your use of communication tools such as television, radio, and the Internet.

How did you get my (unlisted) phone number?

Your number was randomly selected from among all of the possible telephone numbers in the nation. It was selected using scientific sampling methods, so as to obtain a sample of people representative of the U.S. population. We do not use telephone directories to select telephone numbers. Your number was dialed at random by a computer, so if you have an unlisted number, that is why it was called. There has been no change in the listing status of your telephone number.

How did you get my address?

An independent organization matched a list of published addresses to the randomly selected list of telephone numbers. This letter was sent to addresses that were matched with a telephone number. All address information will be destroyed as soon as the study is completed.

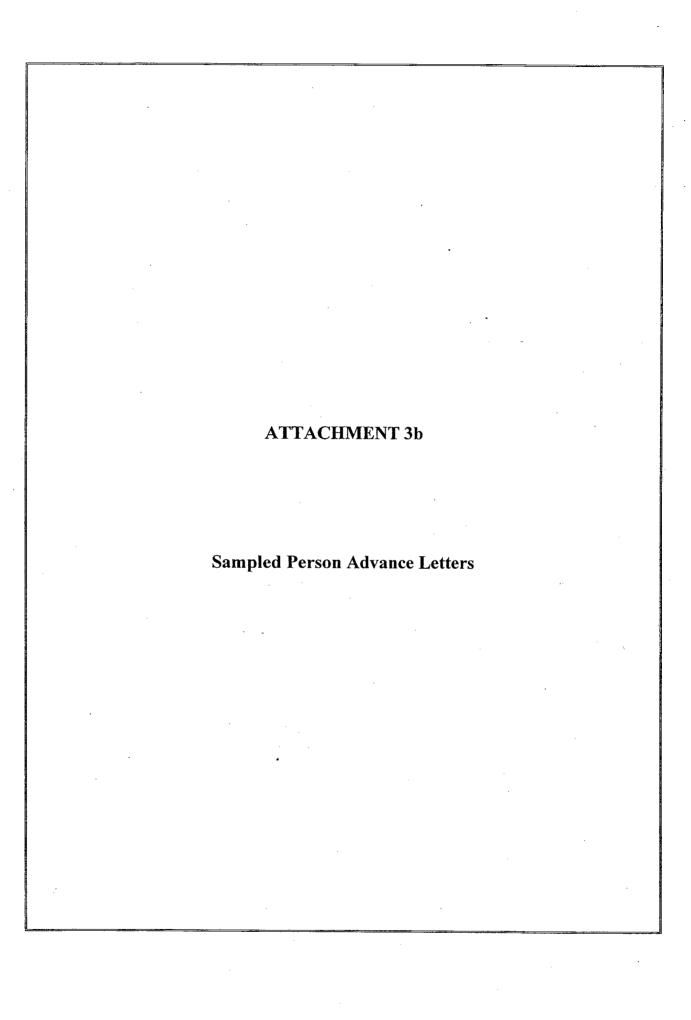

Will you keep my information confidential?

Absolutely. All Westat employees working on a study are required by Federal law to protect the confidentiality of respondents. All of the answers you provide for the survey will be kept strictly anonymous. Moreover, individual or as part of overall statistical trends.

How long will the survey take?

First, there are a few questions to see which members of your household qualify for the study and which one will be selected to participate. This takes only 2 minutes. The remaining questions usually take 20 to 30 minutes.

Dear Resident:

Recently, a research interviewer called your household about a national study being conducted for the National Cancer Institute (NCI). The NCI is part of the Department of Health and Human Services and the National Institutes of Health. Perhaps the call came at a bad time.

We know your time is valuable, but your participation in the study is important to its success. To be accurate, the results of the survey need to be based on the real views and experiences of all the people we try to call. The large number of interviews that we have done is very encouraging, but improving the accuracy of results depends upon getting answers from you and others who have not yet responded.

Whether or not you or anyone in your family has ever had cancer, your input and opinions are crucial to the success of this study. Your answers, combined with those of other survey respondents, will help the National Cancer Institute improve the way it disseminates information about cancer prevention to people in the United States.

We have asked that a telephone interviewer contact you again so that you can still participate in this very important telephone interview. If we happen to call at an inconvenient time, please suggest a time that is better for you. If you would like to begin an interview at your own convenience or if you would like to schedule an appointment, please call Westat toll free at 888-XXX-XXXX.

More information about the study is available on the back of this letter. We hope you choose to be represented in this important health study.

Sincerely,

Brad W. Hesse, Ph.D. HINTS II Project Officer Behavioral Research Program National Cancer Institute

Dear Resident:

Recently, you received a letter from the National Cancer Institute (NCI) about completing an internet survey as part of a national study. The NCI is part of the Department of Health and Human Services and the National Institutes of Health.

We know your time is valuable, but your participation in the study is important to its success. To be accurate, the results of the survey need to be based on the real views and experiences of all the people we contact. The large number of interviews that we have done is very encouraging, but improving the accuracy of results depends upon getting answers from you and others who have not yet responded.

Whether or not you or anyone in your family has ever had cancer, your input and opinions are crucial to the success of this study. Your answers, combined with those of other survey respondents, will help the National Cancer Institute improve the way it disseminates information about cancer prevention to people in the United States.

Completing the survey is easy: just go to www.XXXXXX and enter your user name and password, noted below.

User name: XXXXXXXX Password: XXXXXX

If you have any problem accessing the internet survey, please feel free to call Westat toll free at 888-XXX-XXXX for assistance.

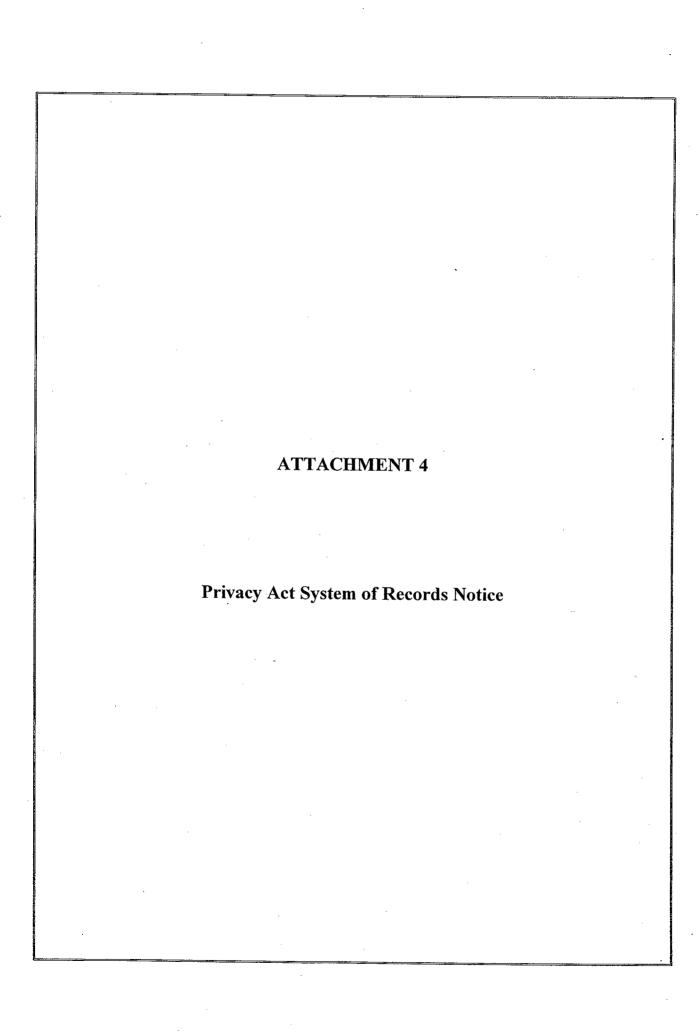

If you would prefer to complete this survey over the phone instead of the internet, we would be happy to accommodate you at whatever time is most convenient for you. Please call Westat toll free at 888-XXX-XXXX to let them know you would like to participate by telephone and to schedule an appointment for a time that would be convenient for you.

More information about the study is available on the back of this letter. We know that your time is valuable. {As a token of our appreciation, we will provide you with (\$10/\$20) once we complete the interview.} We hope you choose to be represented in this important health study.

Sincerely,

Brad W. Hesse, Ph.D. HINTS II Project Officer Behavioral Research Program National Cancer Institute

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records are stored on paper forms in file folders and in electronic databases.

RETRIEVABILITY:

Records are retrieved by name, date of birth, type of medical staff membership, Institute/Center and licensing status.

SAFEGUARDS:

- 1. Authorized Users: Data on the computer network system is accessed by a password known only to authorized users who are NIH employees and contractor staff responsible for implementing the medical staff credentials data system. Access to information is thus limited to those with a need to know.
- 2. Physical Safeguards: Rooms where records are stored are locked when not in use. During regular business hours rooms are unlocked but entry is controlled by on-site personnel.
- 3. Procedural and Technical
 Safeguards: Access to files is strictly
 controlled by the system manager.
 Names and other identifying particulars
 are deleted when data from original
 records are encoded for analysis. Data
 stored in computers is accessed through
 a network system by use of a password
 known only to authorized users. All
 authorized users of personal
 information in connection with the
 performance of their jobs (see
 Authorized Users, above) protect
 information from public view and from
 unauthorized personnel entering an
 unsupervised office.

These practices are in compliance with the standards of Chapter 45–13 of the HHS General Administration Manual, "Safeguarding Records Contained in Systems of Records," supplementary Chapter PHS hf: 45–13, and the HHS Automated Information Systems Security Program Handbook.

RETENTION AND DISPOSAL:

Records are retained and disposed of under the authority of the NIH Records Control Schedule contained in NIH Manual Chapter 1743, Appendix 1B "Keeping and Destroying Records" (HHS Records Management Manual, Appendix B-361), item 2300-293-4, "Medical Staffs' Credential Files," which allows inactive records to be transferred to the Federal Records Center at five year intervals and to be destroyed after thirty years. Refer to the NIH Manual Chapter for specific disposition instructions.

SYSTEM MANAGER(S) AND ADDRESS:

Chief, Credentialing Services Office, Clinical Center, Building 10, Room 1N204, 10 Center Drive, Bethesda, MD 20892–1192.

NOTIFICATION PROCEDURE:

To determine if a record exists, write to the System Manager at the above address. The requester must provide tangible proof of identity (e.g., driver's license). If no identification papers are available, the requester must verify his or her identity by providing either a notarization of the request or a written certification that the requester is who he or she claims to be and understands that the knowing and willful request for acquisition of a record pertaining to an individual under false pretenses is a criminal offense under the Act, subject to a five thousand dollar fine.

RECORD ACCESS PROCEDURE:

Write to the System Manager specified above to attain access to records and provide the same information as that required under the Notification Procedures. Requesters should also reasonably specify the record contents being requested. Individuals may also request an accounting of disclosure of their records, if any.

CONTESTING RECORD PROCEDURE:

Contact the System Manager specified above and reasonably identify the record, specify the information to be contested, the corrective action sought, and your reasons for requesting the correction, along with supporting information to show how the record is inaccurate, incomplete, untimely or irrelevant. The right to contest records is limited to information which is incomplete, irrelevant, incorrect, or untimely (obsolete).

RECORD SOURCE CATEGORIES:

Subject individual.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None.

09-25-0200

SYSTEM NAME:

Clinical, Basic and Population-based Research Studies of the National Institutes of Health (NIH), HHS/NIH/ OD.

SECURITY CLASSIFICATION:

None.

SYSTEM LOCATION:

Records are located at NIH and Contractor research facilities which collect or provide research data for this system. Contractors may include, but are not limited to: Research centers, clinics, hospitals, universities, medical schools, research institutions/ foundations, national associations, commercial organizations, collaborating State and Federal Government agencies, and coordinating centers. A current list of sites, including the address of any Federal Records Center where records from this system may be stored, is available by writing to the appropriate Coordinator listed under Notification Procedure.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Adults and/or children who are the subjects of clinical, basic, or population-based research studies of the NIH. Individuals with disease. Individuals who are representative of the general population or of special groups including, but not limited to: normal controls, normal volunteers, family members and relatives; providers of services (e.g., health care and social work); health care professionals and educators, and demographic sub-groups as applicable, such as age, sex. ethnicity, race, occupation, geographic location; and groups exposed to real and/or hypothesized risks (e.g., exposure to biohazardous microbial agents).

CATEGORIES OF RECORDS IN THE SYSTEM:

The system contains data about individuals as relevant to a particular research study. Examples include, but are not limited to: name, study identification number, address, relevant telephone numbers, social security number (voluntary), driver's license number, date of birth, weight, height, sex, race; medical, psychological and dental information, laboratory and diagnostic testing results; registries; social, economic and demographic data; health services utilization; insurance and hospital cost data, employers, conditions of the work environment, exposure to hazardous substances/ compounds; information pertaining to stored biologic specimens (including blood, urine, tissue and genetic materials), characteristics and activities of health care providers and educators and trainers (including curricula vitae); and associated correspondence.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

"Research and Investigation,"
"Appointment and Authority of the
Directors of the National Research
Institutes," "National Cancer Institute,"
"National Eye Institute," "National
Heart, Lung and Blood Institute,"
"National Institute on Aging," "National

Institute on Alcohol Abuse and Alcoholism." "National Institute on Allergy and Infectious Diseases, "National Institute of Arthritis and Musculoskeletal and Skin Diseases, "National Institute of Child Health and Human Development," "National Institute on Deafness and Other Communication Disorders." "National Institute of Dental and Craniofacial Research," "National Institute of Diabetes, and Digestive and Kidney Diseases," "National Institute of Drug Abuse," "National Institute of Environmental Health Sciences, "National Institute of Mental Health," "National Institute of Neurological Disorders and Stroke," and the "National Human Genome Research Institute" of the Public Health Service Act. (42 U.S.C. 241, 242, 248, 281, 282, 284, 285a, 285b, 285c, 285d, 285e, 285f, 285g, 285h, 285i, 285j, 285l, 285m, 285n, 285o, 285p, 285q, 287, 287b, 287c, 289a, 289c, and 44 U.S.C. 3101.)

PURPOSE(S):

To document, track, monitor and evaluate NIH clinical, basic, and population-based research activities

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

1. A record may be disclosed for a research purpose, when the Department:
(A) Has determined that the use or disclosure does not violate legal or policy limitations under which the record was provided, collected, or obtained; e.g., disclosure of alcohol or drug abuse patient records will be made only in accordance with the restrictions of confidentiality statutes and regulations 42 U.S.C. 241, 42 U.S.C. 290dd-2, 42 CFR part 2, and where applicable, no disclosures will be made inconsistent with an authorization of confidentiality under 42 U.S.C. 241 and 42 CFR part 2a; (B) has determined that the research purpose (1) cannot be reasonably accomplished unless the record is provided in individually identifiable form, and (2) warrants the risk to the privacy of the individual that additional exposure of the record might bring; (C) has required the recipient to (1) establish reasonable administrative, technical, and physical safeguards to prevent unauthorized use or disclosure of the record, (2) remove or destroy the information that identifies the individual at the earliest time at which removal or destruction can be accomplished consistent with the purpose of the research project, unless the recipient has presented adequate justification of a research or health nature for retaining such information,

and (3) make no further use or disclosure of the record except (a) in emergency circumstances affecting the health or safety of any individual, (b) for use in another research project, under these same conditions, and with written authorization of the Department, (c) for disclosure to a properly identified person for the purpose of an audit related to the research project, if information that would enable research subjects to be identified is removed or destroyed at the earliest opportunity consistent with the purpose of the audit, or (d) when required by law; and (D) has secured a written statement attesting to the recipient's understanding of, and willingness to abide by, these provisions.

2. Disclosure may be made to a Member of Congress or to a Congressional staff member in response to an inquiry of the Congressional office made at the written request of the constituent about whom the record is

maintained.

3. The Department of Health and Human Services (HHS) may disclose information from this system of records to the Department of Justice when: (a) The agency or any component thereof; or (b) any employee of the agency in his or her official capacity where the Department of Justice has agreed to represent the employee; or (c) the United States Government, is a party to litigation or has an interest in such litigation, and by careful review, the agency determines that the records are both relevant and necessary to the litigation and the use of such records by the Department of Justice is, therefore, deemed by the agency to be for a purpose that is compatible with the purpose for which the agency collected the records.

4. Disclosure may be made to agency contractors, grantees, experts, consultants, collaborating researchers, or volunteers who have been engaged by the agency to assist in the performance of a service related to this system of records and who need to have access to the records in order to perform the activity. Recipients shall be required to comply with the requirements of the Privacy Act of 1974, as amended, pursuant to 5 U.S.C. 552a(m).

5. Information from this system may be disclosed to Federal agencies, State agencies (including the Motor Vehicle Administration and State vital statistics offices, private agencies, and other third parties (such as current or prior employers, acquaintances, relatives), when necessary to obtain information on morbidity and mortality experiences and to locate individuals for follow-up studies. Social security numbers, date of

birth and other identifiers may be disclosed: (1) To the National Center for Health Statistics to ascertain vital status through the National Death Index; (2) to the Health Care Financing Agency to ascertain morbidities; and (3) to the Social Security Administration to ascertain disabilities and/or location of participants. Social security numbers may also be given to other Federal agencies, and State and local agencies when necessary to locating individuals for participation in follow-up studies.

6. Medical information may be disclosed in identifiable form to tumor registries for maintenance of health statistics, e.g., for use in research

studies.
7. PHS may inform the sexual and/or needle-sharing partner(s) of a subject individual who is infected with the human immunodeficiency virus (HIV) of their exposure to HIV, under the following circumstances: (1) The information has been obtained in the course of clinical activities at PHS facilities carried out by PHS personnel or contractors; (2) The PHS employee or contractor has made reasonable efforts to counsel and encourage the subject individual to provide the information to the individual's sexual or needlesharing partner(s); (3) The PHS employee or contractor determines that the subject individual is unlikely to provide the information to the sexual or needle-sharing partner(s) or that the provision of such information cannot reasonably be verified; and (4) The notification of the partner(s) is made, whenever possible, by the subject individual's physician or by a professional counselor and shall follow

standard counseling practices.
PHS may disclose information to State
or local public health departments, to assist in the notification of the subject individual's sexual and/or needlesharing partner(s), or in the verification that the subject individual has notified such sexual or needle-sharing partner(s).

8. Certain diseases and conditions, including infectious diseases, may be reported to appropriate representatives of State or Federal Government as required by State or Federal law.

9. Disclosure may be made to authorized organizations which provide health services to subject individuals or provide third-party reimbursement or fiscal intermediary functions, for the purpose of planning for or providing such services, billing or collecting thirdparty reimbursements.

10. The Secretary may disclose information to organizations deemed qualified to carry out quality assessment, medical audits or

utilization reviews.

11. Disclosure may be made for the purpose of reporting child, elder or spousal abuse or neglect or any other type of abuse or neglect as required by State or Federal law

POLICIES AND PRACTICES FOR STORING RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

Records may be stored on index cards. file folders, computer tapes and disks (including optical disks), photography media, microfiche, microfilm, and audio and video tapes. For certain studies. factual data with study code numbers are stored on computer tape or disk, while the key to personal identifiers is stored separately, without factual data, in paper/computer files.

RETRIEVABILITY:

During data collection stages and follow-up, retrieval is by personal identifier (e.g., name, social security number, medical record or study identification number, etc.). During the data analysis stage, data are normally retrieved by the variables of interest (e.g., diagnosis, age, occupation).

SAFEGUARDS:

1. Authorized Users; Access to identifiers and to link files is strictly limited to the authorized personnel whose duties require such access. Procedures for determining authorized access to identified data are established as appropriate for each location. Personnel, including contractor personnel, who may be so authorized include those directly involved in data collection and in the design of research studies, e.g., interviewers and interviewer supervisors; project managers; and statisticians involved in designing sampling plans. Other onetime and special access by other employees is granted on a need-to-know basis as specifically authorized by the system manager. Researchers authorized to conduct research on biologic specimens will typically access the system through the use of encrypted identifiers sufficient to link individuals with records in such a manner that does not compromise confidentiality of the individual.

2. Physical Safeguards: Records are either stored in locked rooms during offduty hours, locked file cabinets, and/or secured computer facilities. For certain studies, personal identifiers and link files are separated and stored in locked files. Computer data access is limited through the use of key words known only to authorized personnel.
3. Procedural Safeguards: Collection

and maintenance of data is consistent

with legislation and regulations in the protection of human subjects, informed consent, confidentiality, and confidentiality specific to drug and alcohol abuse patients where these apply. When anonymous data is provided to research scientists for analysis, study numbers which can be matched to personal identifiers will be eliminated, scrambled, or replaced by the agency or contractor with random numbers which cannot be matched. Contractors who maintain records in this system are instructed to make no further disclosure of the records. Privacy Act requirements are specifically included in contracts for survey and research activities related to this system. The OHS project directors, contract officers, and project officers oversee compliance with these requirements. Personnel having access are trained in Privacy Act requirements. Depending upon the sensitivity of the information in the record, additional safeguard measures may be employed.

4. Implementation Guidelines: These practices are in compliance with the standards of Chapter 45-13 of the HHS General Administration Manual. "Safeguarding Records Contained in Systems of Records," supplementary Chapter PHS hf: 45-13, and the HHS Automated Information Systems Security Program Handbook.

RETENTION AND DISPOSAL:

Records are retained and disposed of under the authority of the NIH Records Control Schedule contained in NIH Manual Chapter 1743, Appendix 1– "Keeping and Destroying Records" (HHS Records Management Manual, Appendix B-361), item 3000-G-3, which allows records to be kept as long as they are useful in scientific research. Collaborative Perinatal Project records are retained in accordance with item 3000-G-4, which does not allow records to be destroyed. Refer to the NIH Manual Chapter for specific conditions on disposal or retention instructions.

SYSTEM MANAGER(S) AND ADDRESS:

See Appendix I for a listing of current System Managers. This system is for use by all NIH Institutes and Centers.

NOTIFICATION PROCEDURE

To determine if a record exists, write to the appropriate IC Privacy Act Coordinator listed below. In cases where the requester knows specifically which System Manager to contact, he or she may contact the System Manager directly (See Appendix I). Notification requests should include: individual's name; current address; date of birth; date, place and nature of participation

in specific research study; name of individual or organization administering the research study (if known); name or description of the research study (if known); address at the time of participation; and in specific cases, a notarized statement (some highly sensitive systems require two witnesses attesting to the individual's identity). A requester must verify his or her identity by providing either a notarization of the request or by submitting a written certification that the is who he or she claims to be and understands that the knowing and willful request for acquisition of a record pertaining to an individual under false pretenses is a criminal offense under the Act, subject to a five thousand dollar fine.

Individuals will be granted direct access to their medical records unless the System Manager determines that such access is likely to have an adverse effect (i.e. could cause harm) on the individual. In such cases when the System Manager has determined that the nature of the record information requires medical interpretation, the subject of the record shall be requested to designate, in writing, a responsible representative who will be willing to review the record and inform the subject individual of its contents at the representative's discretion. The representative may be a physician, other health professional, or other responsible individual. In this case, the medical/ dental record will be sent to the designated representative. Individuals will be informed in writing if the record is sent to the representative. This same procedure will apply in cases where a parent or guardian requests notification of, or access to, a child's or incompetent person's medical record. The parent or guardian must also verify (provide adequate documentation) their relationship to the child or incompetent person as well as his or her own identity to prove their relationship.

If the requester does not know which

Institute or Center Privacy Act Coordinator to contact for notification purposes, he or she may contact directly the NIH Privacy Act Officer at the following address: NIH Privacy Act Officer, Office of Management Assessment, 6011 Executive Blvd., Room 601L, Rockville, MD 20852.

NIH Privacy Act Coordinators

Associate Director for Disease Prevention, Office of the Director (OD), Building 1, Room 260, 1 Center Drive, Bethesda, MD 20892. Privacy Act Coordinator, Clinical

Privacy Act Coordinator, National Institute of Nursing Research (NINR), Rockledge II, Room 710, 6701 Rockledge Drive. Bethesda. MD 20892.

RECORD ACCESS PROCEDURE

Same as Notification Procedures. Requesters should reasonably specify the record contents being sought. An individual may also request an accounting of disclosures of his/her record, if any.

CONTESTING RECORD PROCEDURE:

Contact the appropriate official at the address specified under Notification Procedure, and reasonably identify the record, specify the information being contested, and state corrective action sought, with supporting information to show how the record is inaccurate, incomplete, untimely, or irrelevant.

RECORD SOURCE CATEGORIES:

The system contains information obtained directly from the subject individual by interview (face-to-face or telephone), written questionnaire, or by other tests, recording devices or observations, consistent with legislation and regulation regarding informed consent and protection of human subjects. Information is also obtained from other sources, including but not limited to: referring medical physicians, mental health/alcohol/drug abuse or other health care providers; hospitals; organizations providing biological

specimens; relatives; guardians; schools; and clinical medical research records.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None.

Appendix I: System Manager(s) and Address(es)

Associate Director for Disease Prevention, Office of the Director (OD), Building 1, Room 260, 1 Center Drive, Bethesda, MD 20892.

guidance document entitled "Premarket Approval Applications (PMA) for Absorbable Powder for Lubricating a Surgeon's Glove" to the Division of Small Manufacturers, International, and Consumer Assistance (HFZ-220), Center for Devices and Radiological Health, Food and Drug Administration, 1350 Piccard Dr., Rockville, MD 20850. Send one self-addressed adhesive label to assist that office in processing your request, or fax your request to 301-443-8818. See the SUPPLEMENTARY

NFORMATION section for information on electronic access to the guidance.

Submit written comments concerning this guidance to the Division of Dockets Management (HFA~305), Food and Drug Administration, 5630 Fishers Lane, rm. 1061, Rockville, MD 20852. Submit electronic comments to http://www.fda.gov/dockets/ecomments. Identify comments with the docket number found in brackets in the heading of this document.

FOR FURTHER INFORMATION CONTACT: Chiu S. Lin, Center for Devices and Radiological Health (HFZ-480), Food and Drug Administration, 9200 Corporate Blvd., Rockville, MD 20850, 301-443-8913.

SUPPLEMENTARY INFORMATION:

I. Background

In the Federal Register of July 30, 1999 (64 FR 41744), FDA announced the availability of a draft guidance for comment entitled "Medical Glove Guidance Manual." (See http:// www.fda.gov/cdrh/dsma/135.html for the draft guidance.) Elsewhere in the same issue of the Federal Register (64 FR 41710), FDA proposed that the 1999 draft guidance serve as a special control for class II gloves. However, chapter 4 of the 1999 draft guidance contained a section that discussed PMAs for absorbable powder for lubricating surgeon's gloves. Because the section discussing PMAs for absorbable powder is not relevant to class II gloves, FDA is removing this section and issuing it as a separate guidance document. FDA did not receive any comments on this section of the 1999 draft guidance Because the recommendations in this section were available in draft form for comment, FDA is issuing this guidance as a final document. As with any guidance, however, you may submit comments at any time.

II. Significance of Guidance

This guidance is being issued consistent with FDA's good guidance practices regulation (21 CFR 10.115). The guidance represents the agency's current thinking on PMAs for

absorbable powder for lubricating a surgeon's glove. It does not create or confer any rights for or on any person and does not operate to bind FDA or the public. An alternative approach may be used if such approach satisfies the requirements of the applicable statute and regulations.

III. Electronic Access

To receive "Premarket Approval Applications (PMA) for Absorbable Powder for Lubricating a Surgeon's Glove" by fax machine, call the Center for Devices and Radiological Health (CDRH) Facts-On-Demand system at 800-899-0381, or 301-827-0111 from a touch-tone telephone. Press 1 to enter the system. At the second voice prompt, press 1 to order a document. Enter the document number (1230) followed by the pound sign (#). Follow the remaining voice prompts to complete your request.

Persons interested in obtaining a copy of the guidance may also do so by using the Internet. CDRH maintains an entry on the Internet for easy access to information including text, graphics, and files that may be downloaded to a personal computer with Internet access. Updated on a regular basis, the CDRH home page includes device safety alerts. Federal Register reprints, information on premarket submissions (including lists of approved applications and manufacturers' addresses), small manufacturer's assistance, information on video conferencing and electronic submissions, Mammography Matters, and other device-oriented information. The CDRH Web site may be accessed at http://www.fda.gov/cdrh. A search capability for all CDRH guidance documents is available at http:// www.fda.gov/cdrh/guidance.html. Guidance documents are also available on the Division of Dockets Management Internet site at http://www.fda.gov/ ohrms/dockets.

IV. Paperwork Reduction Act of 1995

This guidance contains information collection provisions that are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (the PRA) (44 USC 3501–3520). The collections of information addressed in the guidance document have been approved by OMB in accordance with the PRA under the regulations governing premarket approval applications (21 CFR part 814, OMB control number 0910–0231). The labeling provisions addressed in the guidance have been approved by OMB under the PRA, OMB control number 0910–0485.

V. Comments

Interested persons may submit to the Division of Dockets Management (see ADDRESSES), written or electronic comments regarding the guidance at any time. Submit a single copy of electronic comments to http://www.fda.gov/dockets/ecomments. Submit two paper copies of any mailed comments, except that individuals may submit one paper copy. Comments are to be identified with the docket number found in brackets in the heading of this document. Comments received may be seen in the Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday.

Dated: March 30, 2004.

Beverly Chernaik Rothstein,
Acting Deputy Director for Policy and
Regulations, Center for Devices and
Radiological Health.

Proposed Data Collection; Comment Request Health Information National Trends Survey (HINTS) II

SUMMARY: In compliance with the requirements of Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 for opportunity for public comment on proposed data collection projects, the National Cancer Institute (NCI), National Institutes of Health (NIH) will publish periodic summaries of proposed projects to be submitted to the Office of Management and Budget (OMB) for review and approval.

Proposed Collection: Title: Health

Information National Trends Survey (HINTS) II. Type of Information Collection Request: New. Need and Use of Information Collection: The Health Information National Trends Survey (HINTS) is a biennial survey designed to provide nationally representative, population-based data on health information for the United States. The NCI funded HINTS to assist in its effort to (1) encourage programmatic and interdisciplinary approaches to cancer communication research, and (2) accelerate development of innovative health communication models, theories, and research strategies in cancer prevention, control, and care. HINTS II. scheduled to commence in early 2005. will preserve the methodological integrity of the first cycle of HINTS by using the telephone as the primary mode of data collection as well as

retaining approximately 50% of the questionnaire content. In addition, HINTS II will experiment with alternative modes of data collection (i.e., the Internet). Data will be used (1) to understand individuals' sources of and access to cancer-related information; (2) to measure progress in improving cancer knowledge and communication to the general public; (3) to develop appropriate messages for the public

about cancer prevention, detection, diagnosis, treatment, and survivorship; and (4) to identify research gaps and guide decisions about NCI's research efforts in health promotion and health communication. Frequency of response: One-time. Affected public: Individuals. Type of Respondents: U.S. Adults, Pilot Survey, Screeners and Interview. The annual reporting burden is as follows: Estimated Number of Respondents:

10,389; Estimated Number of Responses per Respondent: 1; Average Burden Hours per Response: .37; and Estimated Total Annual Burden Hours Requested: 3,836. The annualized cost to respondents is estimated at \$38,360. There are no Capital Costs to report. There are no Operating or Maintenance Costs to report.

Type of respondent	Estimated num- ber of respond- ents	Frequency of response	Average hours per response	Annual hour burden
Pilot Survey HINTS II Screener HINTS II Interview*	150 10,239 7,004	1 1 1	.4167 .0833 .4167	63 854 2,919
Totals				3,836

^{*}HINTS II interview respondents are a subset of the screener respondents (N = 10,389).

Request For Comments: Written comments and/or suggestions from the public and affected agencies are invited on one or more of the following points: (1) Whether the proposed collection of information is necessary for the proposed performance of the functions of the agency, including whether the information shall have practical utility; (2) The accuracy of the estimate of the burden of the proposed collection of information including the validity of the methodology and assumptions used; (3) Ways to enhance the quality, utility, and clarity of the information to be collected; and (4) Ways to minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology. FOR FURTHER INFORMATION CONTACT: To request more information on the proposed project or to obtain a copy of the data collection plans and instruments, contact Bradford W. Hesse, Ph.D., Project Officer, National Cancer Institute, NIH, EPN 4068, 6130 Executive Boulevard MSC 7365 Bethesda, Maryland 20892-7365, or call non-toll-free number (301) 594-9904, or FAX your request to (301) 480-2198, or E-mail your request, including your address, to hesseb@mail.nih.gov.

Comments Due Date: Comments

Comments Due Date: Comments regarding this information collection are best assured of having their full effect if received within 30-days of this notice.

Dated: April 1, 2004.

Rachelle Ragland-Greene,
OMB Cleannee Liaison, National Cancel
Institute, National Institutes of health.

Government-Owned Inventions; Availability for Licensing

AGENCY: National Institutes of Health, Public Health Service, DHHS. ACTION: Notice.

summary: The inventions listed below are owned by an agency of the U.S. Government and are available for licensing in the U.S. in accordance with 35 U.S.C. 207 to achieve expeditious commercialization of results of federally-funded research and development. Foreign patent applications are filed on selected inventions to extend market coverage for companies and may also be available for licensing.

ADDRESSES: Licensing information and copies of the U.S. patent applications listed below may be obtained by writing to the indicated licensing contact at the Office of Technology Transfer, National Institutes of Health, 6011 Executive Boulevard, Suite 325, Rockville, Maryland 20852–3804; telephone: 301/496–7057; fax: 301/402–0220. A signed Confidential Disclosure Agreement will be required to receive copies of the patent applications.

Query Tool for Accurate Protein Identification

Rodney L. Levine (NHLBI)
U.S. Patent Application No. 10/446,865
filed 29 May 2003 (DHHS Reference
No. E-306-2002/0-US-01)
Licensing Contact: Michael

Licensing Contact: Michael Shmilovich; 301/435–5019; shmilovm@mail.nih.gov.

PHS seeks a commercial developer for the following software database query tool: A data-mining tool (software based query generator) that provides a script that identifies an isolated protein by using physical properties of the protein and submitting the query into a protein database (e.g., SWISS-PROT). The inventors identified that by combining an accurate determination of the ratio of at least one amino acid per molecule and at least one physical parameter of the protein; an accurate and unique match can be made by the query results. Parameters include the ratios of amino acids to others (e.g., C/F, W/C, C/Y etc.), the molecular weight, the ratio of positively to negatively charged moieties, and/or the isoelectric point.

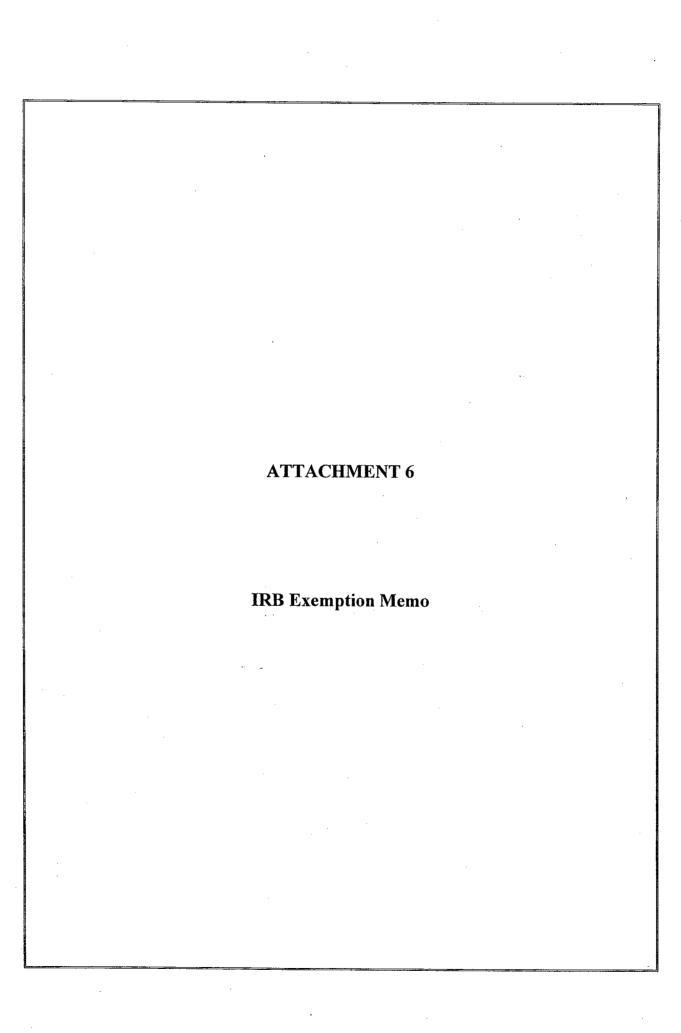

Bromotyrosine-Derived Inhibitors of Mycothiol-S-Conjugate Amidase

Carole A. Bewley et al. (NIDDK)

FROM:

Thomas W. McKenna

Chairman, Institutional Review Board

SUBJECT:

IRB Review and Approval

Health Information National Trends Survey II

Contract N02-PC-3523 Project 7845

FWA 5551

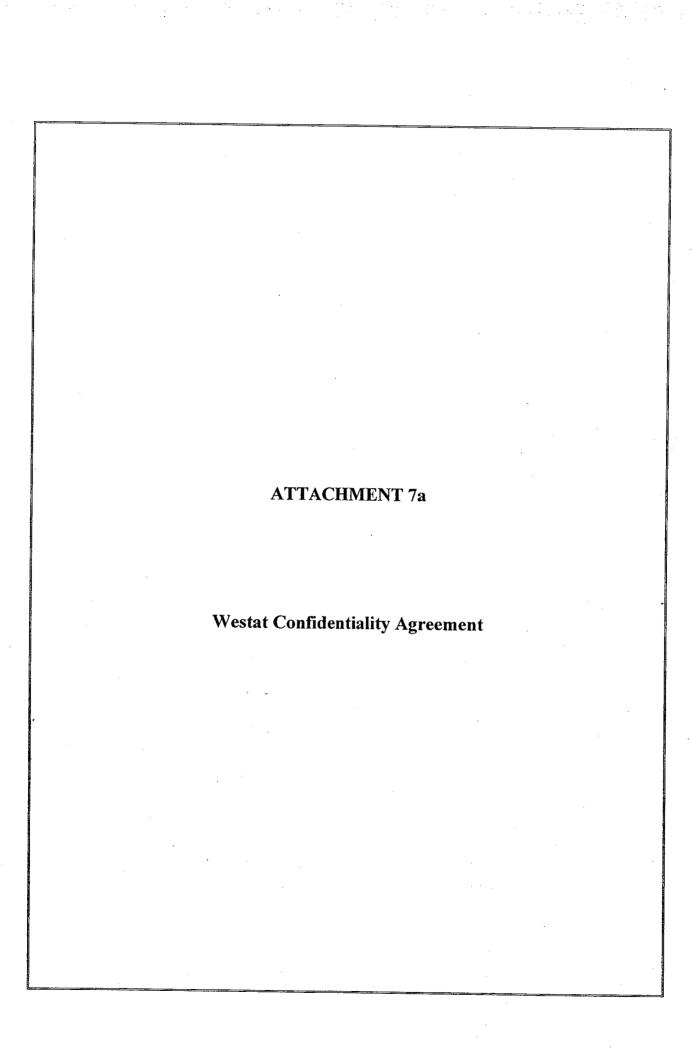

As Chairman of the Westat Institutional Review Board, I have reviewed the materials submitted for the following: Health Information National Trends Survey II, Contract N02-PC-3523, Project 7845. Westat's Institutional Review Board (IRB) reviews all studies involving human research before activities may begin under 45 CFR pt 46.

The study is a national probability survey of adult respondents sampled from the general U.S. household population. The survey will focus on the extent that the general population understands cancer prevention messages, to enable NCI to develop more effective educational programs. Respondents will be asked questions about their health, health-related risk behaviors, medical conditions and treatment, and alcohol consumption. Respondents' names and addresses will be collected for purposes of mailing incentive payments; however, the risk to respondents from disclosure of this information may be considered minimal risk.

The regulations exempt research involving the use of survey or interview procedures without identifying information. 45 CFR §46.101(b)(2). Information collected in this survey is not sensitive, and no risks to subjects are anticipated.

I am therefore granting permission to begin performance under the contract. You must inform the Office of Research Administration if the design or content of the above study changes, to ensure that the study remains exempt from IRB approval. Additionally, you are responsible for notifying the ORA as soon as possible if you encounter any injuries or problems relating to human subjects.

WESTAT

EMPLOYEE OR CONTRACTOR'S ASSURANCE OF CONFIDENTIALITY OF SURVEY DATA

Statement of Policy

Westat is firmly committed to the principle that the confidentiality of individual data obtained through Westat surveys must be protected. This principle holds whether or not any specific guarantee of confidentiality was given at time of interview (or self-response), or whether or not there are specific contractual obligations to the client. When guarantees have been given or contractual obligations regarding confidentiality have been entered into, they may impose additional requirements which are to be adhered to strictly.

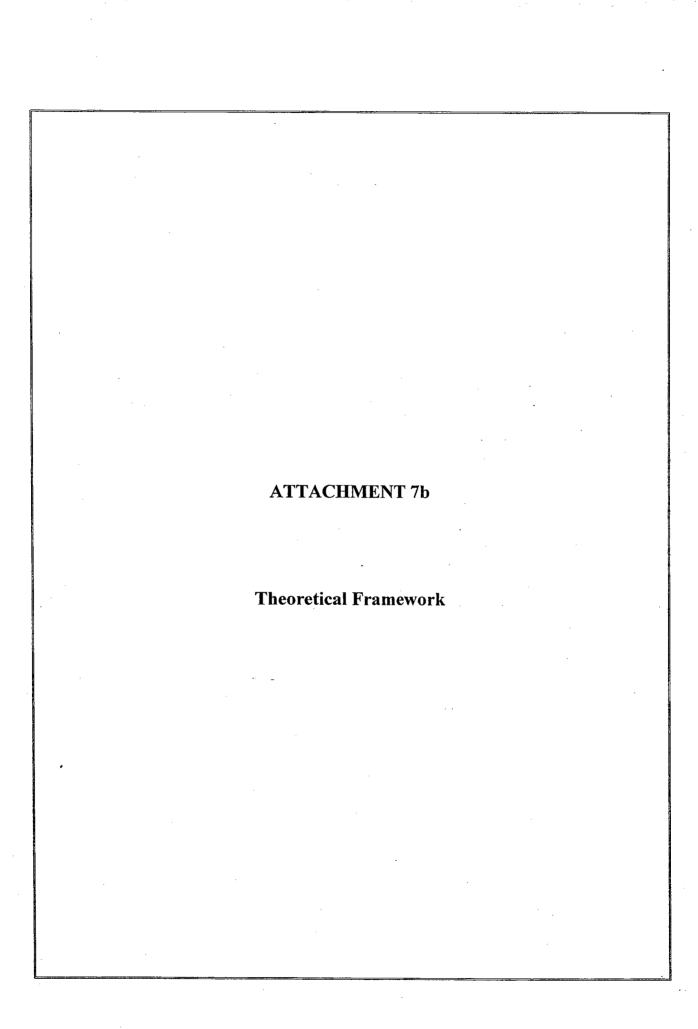

Procedures for Maintaining Confidentiality

- All Westat employees and field workers shall sign this assurance of confidentiality. This assurance may be superseded by another assurance for a particular project.
- Field workers shall keep completely confidential the names of respondents, all information or opinions collected in the course of interviews, and any information about respondents learned incidentally during field work. Field workers shall exercise reasonable caution to prevent access by others to survey data in their possession.
- 3. Unless specifically instructed otherwise for a particular project, an employee or field worker, upon encountering a respondent or information pertaining to a respondent that s/he knows personally, shall immediately terminate the activity and contact her/his supervisor for instructions.
- 4. Survey data containing personal identifiers in Westat offices shall be kept in a locked container or a locked room when not being used each working day in routine survey activities. Reasonable caution shall be exercised in limiting access to survey data to only those persons who are working on the specific project and who have been instructed in the applicable confidentiality requirements for that project.
 - Where survey data have been determined to be particularly sensitive by the Corporate Officer in charge of the project or the President of Westat, such survey data shall be kept in locked containers or in a locked room except when actually being used and attended by a staff member who has signed this pledge.
- Ordinarily, serial numbers shall be assigned to respondents prior to creating a machine-processible record and identifiers such as name, address, and Social Security number shall not, ordinarily, be a part of the machine record. When identifiers are part of the machine data record, Westat's Manager of Data Processing shall be responsible for determining adequate confidentiality measures in consultation with the project director. When a separate file is set up containing identifiers or linkage information which could be used to identify data records, this separate file shall be kept locked up when not actually being used each day in routine survey activities.
- 6. When records with identifiers are to be transmitted to another party, such as for keypunching or key taping, the other party shall be informed of these procedures and shall sign an Assurance of Confidentiality form.
- 7. Each project director shall be responsible for ensuring that all personnel and contractors involved in handling survey data on a project are instructed in these procedures throughout the period of survey performance. When there are specific contractual obligations to the client regarding confidentiality, the project director shall develop additional procedures to comply with these obligations and shall instruct field staff, clerical staff, consultants, and any other persons who work on the project in these additional procedures. At the end of the period of survey performance, the project director shall arrange for proper storage or disposition of survey data including any particular contractual requirements for storage or disposition. When required to turn over survey data to our clients, we must provide proper safeguards to ensure confidentiality up to the time of delivery.
- 8. Project directors shall ensure that survey practices adhere to the provisions of the U.S. Privacy Act of 1974 with regard to surveys of individuals for the Federal Government. Project directors must ensure that procedures are established in each survey to inform each respondent of the authority for the survey, the purpose and use of the survey, the voluntary nature of the survey (where applicable) and the effects on the respondents, if any, of not responding.

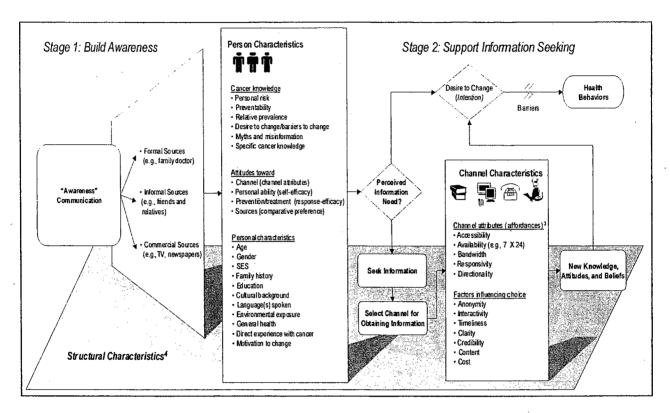

<u>PLEDGE</u>

I hereby certify that I have carefully read and will cooperate fully with the above procedures. I will keep completely confidential all information arising from surveys concerning individual respondents to which I gain access. I will not discuss, disclose, disseminate, or provide access to survey data and identifiers except as authorized by Westat. In addition, I will comply with any additional procedures established by Westat for a particular contract. I will devote my best efforts to ensure that there is compliance with the required procedures by personnel whom I supervise. I understand that violation of this pledge is sufficient grounds for disciplinary action, including dismissal. I also understand that violation of the privacy rights of individuals through such unauthorized discussion, disclosure, dissemination, or access may make me subject to criminal or civil penalties. I give my personal pledge that I shall abide by this assurance of confidentiality.

EXPECTED DISTRIBUTION OF TELEPHONE NUMBERS IN WAVE 1

We are carrying out a randomized experiment in Wave 1 of HINTS II, randomly assigning one-third of the telephone numbers to a telephone-interview-only branch, one-third of the numbers to a web-survey-only branch, and one-third of the numbers to a telephone-Internet respondent choice branch. Figures A-1, A-2, and A-3 show our expectations as to the distribution of respondents and nonrespondents in the various relevant subgroups of interest.

A very important dichotomization is between households which have Internet access, and households which do not have Internet access. The most recent Current Population Survey Computer Use and Internet Supplement (September 2001) indicates that roughly 60 percent of U.S. households have Internet access. The percentage is probably increasing, and will be larger in 2005, but we will use the 60 percent figure (this will be conservative with regard to estimating expected Internet interviews). For the Internet-only group, we will ask all of the Internet-access households to do the interview via Internet. For the telephone-Internet respondent-choice group, we will give them a choice to do the interview by Internet or by telephone. For the telephone-only group, we will ask all households to do the interview by telephone. Households without Internet access will all do the interviews by telephone (whatever their assigned mode branch).

A second dichotomization within the households with Internet access is households which give us access information (e.g., their email address). Without this access information, we will be obliged to ask them to log on to our web site themselves to complete the Internet interview. We expect 70 percent of Internet-access households to give us Internet access information, which will give us the chance to email to them follow-up prompts.

Figure A-1 presents our expectations as to the telephone-only branch. The breakout into households with and without Internet access (60% in the former group and 40% in the latter group) is not directly relevant to the fielding of the telephone-only branch, but is relevant to making comparisons between the telephone-only branch and the two Internet branches. Any mode comparison of telephone interview vs. Internet interviews is best restricted to households with Internet access, as households without Internet access may be a different population, and there can be no Internet interviews in these households. We will be asking all of the households (in all branches) whether or not they have Internet access, for the purpose of this necessary subgrouping for mode comparisons.

We assume an overall 71 percent response rate for telephone interviews in the telephone-only branch, expecting a 71 percent response rate for the non-Internet-access households, a 75 percent response rate for the Internet-access households which give access information, and a 61.7 percent response rate for the Internet-access households which do not give access information. A difference in the response rates for the two Internet-access household groups is likely, as households willing to give us Internet access information are certainly more likely to be cooperative for the telephone interview than the complement group, though we don't know to what degree. The 75 percent vs. 61.7 percent difference is our assumed difference (note that this averages to 71%: the overall assumed rate, averaging over the assumed 70 percent in the access-providing group and the 30 percent in the complement group). Note that we plan to invite final refusals to complete the survey by Internet. We expect a small percentage will cooperate. This is not reflected in Figure A-1.

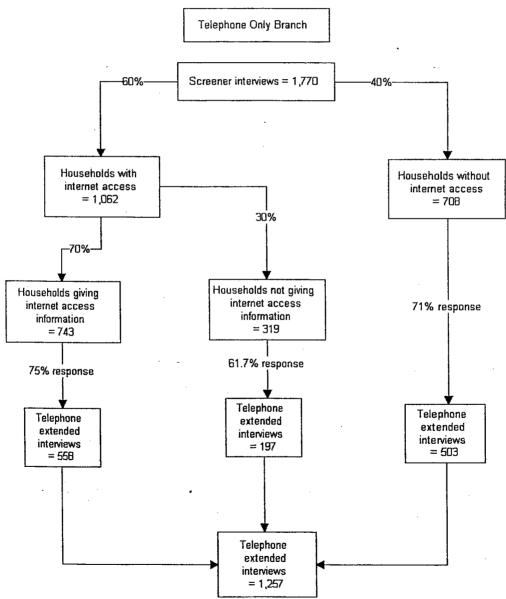

Figure A-1. Telephone-only branch

Figure A-2 provides our expected breakdown for the Internet-only branch. The households without Internet access have an identical result as for the telephone-only branch (they are all interviewed by telephone, with an expected 71% response rate). The households with Internet access split into those giving Internet access information (assumed 70%) and those not giving Internet access information (30%). For those households not giving Internet access information, we will request that they log in themselves to our web site and complete the interview. We expect only a small proportion (15%) to do this. Of those who do give us access information, we expect a 35 percent response rate for a final Internet interview.

We will also follow up any of those who do not complete an Internet interview by attempting to complete a telephone interview. We expect to pick up 22 percent of the access-providing group by followup telephone interview, and 35 percent of the non-access-providing group (for a total response rate Internet or telephone of 57 percent for the access-providing households and 50 percent for the non-access-providing households).

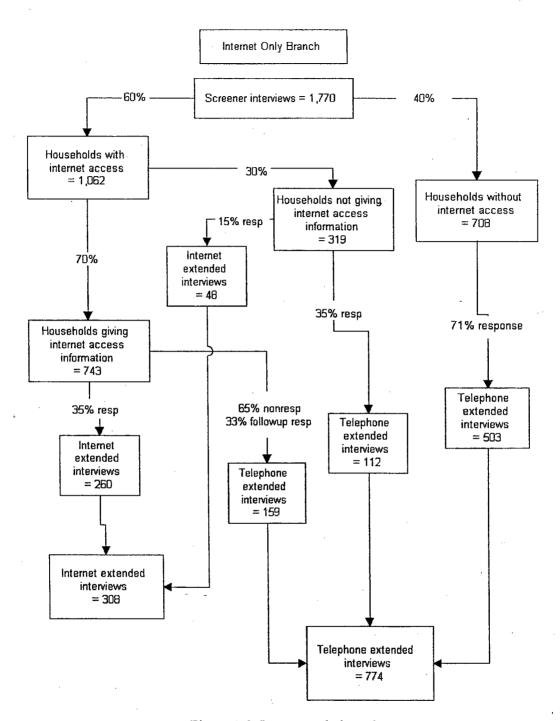

Figure A-2. Internet-only branch

Figure A-3 provides the expected breakdown for the telephone-Internet respondent choice branch. The households without Internet access are identical to those of the telephone-only or Internet-only branches: they are recruited to do telephone interviews with the same expected recruitment rates. The households with Internet access are asked whether or not they wish to do the interview by telephone or by Internet. We expect 50 percent to choose Internet, and 50 percent telephone (given the lack of available data, these percentages are only rough approximations).

The next dichotomization is by whether the households provide Internet access information (the 'access-provider' group and the 'nonaccess-provider' group). We expect 70 percent of Internet access households to be access providers (as assumed in Figures A-1 and A-2). In this case, though, we expect a much larger percentage of those who choose the Internet as their interview mode to also be access providers (85%). We expect only 55 percent of the telephone preference group to be access providers. The remaining branches and percentages in Figure A-3 are self-explanatory, mirroring similar calculations for the telephone-only and Internet-only groups.
