

2007 Deceased Donor Registration Changes for OMB Clearance

SECTION	FIELD	MODIFICATION/ADDITION	RATIONALE
Organ Recovery	New	For DCD, add Date and time of withdrawal of support.	Additional data necessary to develop transplant, donation and allocation policies.
	New	For DCD, add Date and time agonal phase begins (systolic BP < 80 or o2 sat. < 80%).	Additional data necessary to develop transplant, donation and allocation policies.
	New	For DCD, Date and time of cardiac death.	Additional data necessary to develop transplant, donation and allocation policies.
	New	Add Was this a consented DCD donor that progressed to brain death?	Additional data necessary to develop transplant, donation and allocation policies.
	New	For DCD, add Date and time of abdominal aorta cannulation.	Additional data necessary to develop transplant, donation and allocation policies.
	New	For DCD, add Date and time of thoracic aorta cannulation.	Additional data necessary to develop transplant, donation and allocation policies.
	New	For DCD, add Date and time of pulmonary artery cannulation.	Additional data necessary to develop transplant, donation and allocation policies.
	New	For DCD, add Date and time of portal vein cannulation.	Additional data necessary to develop transplant, donation and allocation policies.
	New	For DCD, add Total urine output during OR recovery phase.	Additional data necessary to develop transplant, donation and allocation policies.
	New	For DCD, add serial data Date and time of measures (between agonal phase and cardiac death).	Additional data necessary to develop transplant, donation and allocation policies.
	New	For DCD, add serial data systolic blood pressure (between agonal phase and cardiac death).	Additional data necessary to develop transplant, donation and allocation policies.
	New	For DCD, add serial data diastolic blood pressure (between agonal phase and cardiac death).	Additional data necessary to develop transplant, donation and allocation policies.

2007 Deceased Donor Registration Changes for OMB Clearance

SECTION	FIELD	MODIFICATION/ADDITION	RATIONALE
	New	For DCD, add serial data mean arterial pressure (between agonal phase and cardiac death).	Additional data necessary to develop transplant, donation and allocation policies.
	New	For DCD, add serial data O2 saturation (between agonal phase and cardiac death).	Additional data necessary to develop transplant, donation and allocation policies.
Organ Dispositions	New	For DCD, add Date and time right kidney recovered/removed from donor.	Additional data necessary to develop transplant, donation and allocation policies.
	New	For DCD, add Date and time left kidney recovered/removed from donor.	Additional data necessary to develop transplant, donation and allocation policies.
	New	For DCD, add Date and time double/en-bloc kidney recovered/removed from donor.	Additional data necessary to develop transplant, donation and allocation policies.
	New	For DCD, add Date and time whole pancreas recovered/removed from donor.	Additional data necessary to develop transplant, donation and allocation policies.
	New	For DCD, add Date and time pancreas segment 1 recovered/removed from donor.	Additional data necessary to develop transplant, donation and allocation policies.
	New	For DCD, add Date and time pancreas segment 2 recovered/removed from donor.	Additional data necessary to develop transplant, donation and allocation policies.
	New	For DCD, add Date and time whole liver recovered/removed from donor.	Additional data necessary to develop transplant, donation and allocation policies.
	New	For DCD, add Date and time liver segment 1 recovered/removed from donor.	Additional data necessary to develop transplant, donation and allocation policies.

2007 Deceased Donor Registration Changes for OMB Clearance

SECTION	FIELD	MODIFICATION/ADDITION	RATIONALE
	New	For DCD, add Date and time liver segment 2 recovered/removed from donor.	Additional data necessary to develop transplant, donation and allocation policies.
	New	For DCD, add Date and time whole intestine recovered/removed from donor.	Additional data necessary to develop transplant, donation and allocation policies.
	New	For DCD, add Date and time intestine segment 1 recovered/removed from donor.	Additional data necessary to develop transplant, donation and allocation policies.
	New	For DCD, add Date and time intestine segment 2 recovered/removed from donor.	Additional data necessary to develop transplant, donation and allocation policies.
	New	For DCD, add Date and time heart recovered/removed from donor.	Additional data necessary to develop transplant, donation and allocation policies.
	New	For DCD, add Date and time right lung recovered/removed from donor.	Additional data necessary to develop transplant, donation and allocation policies.
	New	For DCD, add Date and time left lung recovered/removed from donor.	Additional data necessary to develop transplant, donation and allocation policies.
	New	For DCD, add Date and time double/en-bloc lung recovered/removed from donor.	Additional data necessary to develop transplant, donation and allocation policies.
