

## 2007 Thoracic Follow-up 6 Month Changes for OMB Clearance

SECTION	FIELD	MODIFICATION/ADDITION	RATIONALE
		A 6-month follow-up reporting period will be added for thoracic transplant recipients.	
Recipient Information	Name	This data will be populated from previously entered data.	The additional reporting period is to determine member specific performance.
	Date of birth	This data will be populated from previously entered data.	The additional reporting period is to determine member specific performance.
	SSN	This data will be populated from previously entered data.	The additional reporting period is to determine member specific performance.
	Gender	This data will be populated from previously entered data.	The additional reporting period is to determine member specific performance.
	HIC	This data will be populated from previously entered data.	The additional reporting period is to determine member specific performance.
	Transplant Date	This data will be populated from previously entered data.	The additional reporting period is to determine member specific performance.
	Previous Follow-up	This data will be populated from previously entered data.	The additional reporting period is to determine member specific performance.
	Previous Patient Status Date	This data will be populated from previously entered data.	The additional reporting period is to determine member specific performance.
	Transplant Discharge Date	This data will be populated from previously entered data.	The additional reporting period is to determine member specific performance.
	State of Permanent Residence		The additional reporting period is to determine member specific performance.
	ZIP Code		The additional reporting period is to determine member specific performance.
Patient Status	Date last seen, retransplanted or death		The additional reporting period is to determine member specific performance.

## 2007 Thoracic Follow-up 6 Month Changes for OMB Clearance

SECTION	FIELD	MODIFICATION/ADDITION	RATIONALE
	Patient Status		The additional reporting period is to determine member specific performance.
	Primary Cause of Death		The additional reporting period is to determine member specific performance.
	Contributory Cause of Death		The additional reporting period is to determine member specific performance.
	Contributory Cause of Death		The additional reporting period is to determine member specific performance.
Clinical Information	Graft status		The additional reporting period is to determine member specific performance.
	Date of graft failure		The additional reporting period is to determine member specific performance.
	Primary cause of graft failure		The additional reporting period is to determine member specific performance.
	New	For pediatric recipients 2 years old or younger and status 1 at listing and received a heart with incompatible ABO and death or graft failure is reported and 6 month follow-up add: Current B titer and sample date when ABO is A, Current A titer and sample date when ABO is B and Current titer A, sample date, Current titer B and sample date when ABO is O.	Additional data necessary to develop transplant policies.
