

This document was created in an effort to submit an initial action to have future change requests recognized as generic requests.

FDA wants to have the ability to submit future generic requests. I am requesting expedited review of this request so that future generic requests can be sent and reviewed by OMB. We currently have one generic change request waiting for your review, which cannot be submitted until this request is acted upon.

This IC is being sent to have future IC request sent forward under this control number viewed as generic change requests.

Please contact Seleda Perryman at 404-498-1511, if you have any questions, comments, or concerns.

Thanks in advance.
