

1010-0120
Justification for Change

We request OMB approval to make the following adjustments to ICR 1010-0120, which include:

- Consolidate the citations and burden hours of ICR for geothermal resources 1010-0169 (174 hrs, \$0; exp. 8/31/09) into ICR 1010-0120 (1,751 hrs; \$0; exp. 10/31/07), which will enable program-wide review of all information collections for solid minerals and geothermal resources. This consolidation into one collection will eliminate duplication of effort and redundancy of data.
- Move 30 CFR 218.203 (1 burden hour) from ICR 1010-0107 (total 1,220 hrs; \$0; exp. 8/31/08) into ICR 1010-0120 because this citation relates to solid minerals.

No new burden hours are being added. All burden hours are already approved. The earliest expiration date of 10/31/07 will remain with this collection.
