		Name	Description	Guidance Requirement or Goal	Universe	Combined Region/State or State-only Data?	Original Source of Data Provided by EPA	Selection Criteria Explanation	Data Pulled From	Metric Type	Notes	Your Suggestions	
		1a2. CMS major full compliance evaluation (FCE) coverage in last two complete fiscal years	sources receiving full compliance evaluations by the state in the last two fiscal years. Data	CMS sources should receive a full compliance evaluation every 2 years. If region and state negotiated less than 100% 2-year coverage, refer to 1r below.	CMS Majors *See note in Selection Criteria Explanation.	State-only (but separate combined % also provided)	AFS	Select all major CMS sources from AFS which have had at least one FCE action within the last two complete fiscal years. Compare to the universe of all active CMS majors plus other inspected CMS majors. "(Numerator counts any CMS major source with an FCE regardless of operating status/denominator counts all CMS major sources with operating status/denominator counts all CMS major sources with operating status O.T., or I, plus any other inspected CMS majors.)	IDEA	Data Quality	During the time frame of the review, states/locals will continually refine the universe of affected CMS sources. Therefore, both the AFS and CMS universes should be used for comparison purposes. Utilizing both universes allows a QA/QC review to identify any major sources that have not been included in CMS. If sources included on the list were not active for the full two years, FCE is not expected.		a
	b	CAA synthetic minor 80% sources (SM-80) FCE coverage	Percent of CAA currently active SM-80 sources with full compliance evaluations by the state in the last four -increasing to five in FY06> fiscal years. Metric will be a 5-year 100% goal when data are available.	effective since FY02, so	CAA SM- 80%s *See note in Selection Criteria Explanation.	State-only (but separate combined % also provided)	AFS	Select all CAA SM-80 sources from AFS which have had at least one FCE within four <increasing five="" fy06="" in="" to=""> complete fiscal years. Compare to the universe of all active 80% synthetic minors plus other inspected SM-80s. *(Numerator counts any CAA SM-80 source with an FCE regardless of operating status/denominator counts all CAA SM-80 sources with operating status (OT, or I, plus any other inspected SM-80s.)</increasing>	IDEA	Goal	Consistent with CMS. Current NPG document does not discuss whether regions and states can combine to meet goal. The select logic for this metric could be improved in the future when AFS "CMS category" and "automatic unknown compliance flag" data are quality tested as a way to measure inspection commitments. Note re: universe counts: OECA researching option of capturing End-of-Year universe starting with FY2005 for use where universe counts are required.		b

_	CAA-3						A State Review Framework Metr	103			Approval expires: 11/30)/08
	Name	Description	Guidance Requirement or Goal	Universe	Combined Region/State or State-only Data?	Original Source of Data Provided by EPA	Selection Criteria Explanation	Data Pulled From	Metric Type	Notes	Your Suggestions	
	1c1. FCEs and reported PCEs for currently active synthetic minors (coverage)	Informational measure provides data for all synthetic minors.	FCEs at federally reportable sources are required to be reported. PCEs that are part of a negotiated compliance monitoring plan are to be reported pursuant to the Compliance Monitoring Strategy (CMS).	AFS SMs *See note in Selection Criteria Explanation.	State-only (but separate combined % also provided)	AFS	Select all CAA SM sources from AFS which have had at least one FCE or reported PCE within the last four fiscal years <increasing five="" fy06="" in="" to="">. Compare to the universe of all active AFS SM. sources plus other inspected AFS SMs. '(Numerator counts any SM source with an FCE or reported PCE regardless of operating status/denominator counts all SM sources with operating status OT, or I, plus any other inspected SMs.)</increasing>	IDEA (Partially available in OTIS.)	Informational -only.	Although state PCEs that are not included in a negotiated CMS plan and FCEs at non-federally reportable sources are not required, they will be included for informational purposes when voluntarily reported. This metric helps provide a complete picture of state evaluation activity. Note re: universe counts: OECA researching option of capturing End-of-Year universe starting with FY2005 for use where universe counts are required. Note: state PCEs are not required but will be included for informational purposes if reported.		
С	1c2. FCEs and reported PCEs for CMS synthetic minors (coverage)	Informational measure provides data for all synthetic minors.	FCEs at federally reportable sources are required to be reported. PCEs that are part of a negotiated compliance monitoring plan are to be reported pursuant to the CMS.	CMS SMs *See note in Selection Criteria Explanation.	State-only, (but separate combined % would also be provided)	AFS	Select all CMS SM sources from AFS which have had at least one FCE or reported PCE within the last four fiscal years cincreasing to five in FY06>. Compare to the universe of all active CMS SM sources plus other inspected CMS SMs. *(Numerator counts any CMS SM source with an FCE or reported PCE regardless of operating status/denominator counts all CMS SM sources with operating status O.T., or I, plus any other inspected CMS SMs.)	IDEA	Informational -only	Although state PCEs that are not included in a negotiated CMS plan and FCEs at non-federally reportable sources are not required, they will be included for informational purposes when voluntarily reported. This metric helps provide a complete picture of state evaluation activity. Also, during the time frame of the review, states/locals will continually refine the universe of affected CMS sources. Therefore, both the AFS and CMS universes should be used for comparison purposes. Utilizing both universes allows a QA/QC review to identify any SM sources that have not been included in CMS. Note: state PCEs are not required but will be included for informational purposes if reported.		С
d	FCEs and reported PCEs at minor sources (coverage)	Informational measure provides data for all minor sources.	Although not all minor source activity or PCEs are required to be reported, this metric provides useful information on the overall health of the compliance monitoring program.	AFS minor sources *See note in Selection Criteria Explanation.	State-only	AFS	Select all CAA minor sources from AFS which have had at least one FCE or reported PCE within the last four FYs <increasing five="" fy06="" in="" to="">. Compare to the universe of all active AFS minors plus other inspected AFS minors. *(Numerator counts any AFS minor source with an FCE or reported PCE regardless of operating status/denominator counts all AFS minor sources with operating status O,T, or I, plus any other inspected AFS minors.)</increasing>	IDEA	Informational -only	Some state/locals have either negotiated or expressed interest in substituting minors for larger sources, or evaluate them in addition to the CMS sources. Although not all minor source activity is reportable, this metric provides useful information on the overall health of the compliance monitoring program. OECA will output the CMS flag, which states may use to reflect negotiated minors into their CMS plans. Note: state PCEs are not required but will be included for informational purposes if reported.		đ

(CAA-4					CAA	State Review Framework Metri	CS			Approval expires: 11/3	.0/08
	Name	Description	Guidance Requirement or Goal	Universe	Combined Region/State or State-only Data?	Original Source of Data Provided by EPA	Selection Criteria Explanation	Data Pulled From	Metric Type	Notes	Your Suggestions	
e	Investigations at CAA stationary sources	Informational measure provides information on this type of activity consistent with CMS.	Required pursuant to the current Air Facility System (AFS) Information Collection Request (ICR). Category of compliance monitoring activity recognized by CMS.	Active AFS	State-only	AFS	Select all active sources from AFS which have had at least one investigation conducted (e.g., achieved date) within the last four fiscal years <increasing five="" fy06="" in="" to="">.</increasing>	IDEA	Informational -only	Investigations are a category of compliance monitoring activity recognized by CMS. They are more resource-intensive than the other compliance monitoring activities, and provide useful information on the overall health of		е
f	Review of self- certifications completed	% of self certifications received by state in fiscal year that have been reviewed.	CMS recommends all self-certifications to be reviewed. Goal = 100%.	All active majors with Title V Air Program Code 'active', and cert due, rec'd or rev'd.	State-only	AFS	Select all active CAA Title V sources from AFS which have had at least one "Compliance Certification State Review" action within the fiscal year. Compare to the universe of active CAA Title V sources with any certification due/received or reviewed action within the FY.	OTIS CAA Extended Management Reports (one state at a time)	Goal	High percentages shown (that is 100%) may be significantly affected by incomplete reporting of certification due/received MDR actions by the regions or states (if negotiated). Percentage is also affected by the fact that some reviews are for certs received in the previous FY. All majors supposed to have Title V permit by 2006.		f
g	Number of sources with unknown compliance status	AFS is designed to convert compliance status to unknown based upon the FCE frequency negotiated between the region and state. Frequency is variable, thus this measure may more precisely track whether commitments are completed.	CMS provides for flexibility in FCE frequency, which is tracked using AFS.	All majors and SM-80s with CMS (refer to 12j)	Combined	AFS	Select all sources where the <u>current</u> source compliance status is "unknown" as automatically generated by AFS.	OTIS CAA query	Review Indicator	Will pull current data.		g
r	Percent of planned FCEs/negotiated PCEs completed	(i.e., FCE, PCE or inves		ossible, AFS sh			vary with respect to the universe of sou progress with these alternative plans.			quencies, and/or the type of evaluation es/locals must still provide sufficient		r
2. [Degree to which inspe	ction (Compliance	Monitoring) reports	document in	spection findings	, including	accurate description of what v	vas observed	to sufficier	ntly identify violations.		2
а	Percentage of Compliance Monitoring Reports adequately documented in the files.	Evaluation of documentation in the flie that is based on the elements in the EPA Compliance Monitoring Strategy.			State-only				Review Indicator			
3. [Degree to which inspe	ction (Compliance	Monitoring) reports	are complet	ed in a timely ma	nner, includ	ling timely identification of vio	olations.				3
a	Percentage of Compliance Monitoring Reports which identify potential violations in the file within a given time frame established by the Region and state, within 60 days.	Evaluation of documentation in the file that is based on the elements in the EPA Compliance Monitoring Strategy.			State-only				Review Indicator			

(CAA-5					CAA	State Review Framework Metr	ics			OMB Control No.: 2020- 0 Approval expires: 11/3	
	Name	Description	Guidance Requirement or Goal	Universe	Combined Region/State or State-only Data?	Original Source of Data Provided by EPA	Selection Criteria Explanation	Data Pulled From	Metric Type	Notes	Your Suggestions	
4. [Degree to which signi	ficant violations (e.	g., significant nonco	mpliance ar	nd high priority vi	olations) an	d supporting information are	accurately id	lentified an	d reported to EPA national data	bases in a timely manner.	4
a	High priority violation discovery rate - (per FCE coverage at majors)	New HPVs identified in fiscal year by the state divided by the number of sources with state FCEs performed in the fiscal year.	File review recommended for regions/states below 1/2 of the national average. (HPV policy)	Majors	State-only (with Regional-only provided)	AFS/ IDEA	Select major sources with new HPVs identified in the FY. Compare to the number of major sources with State FCEs conducted (onsite or offsite) within the FY.	IDEA	Goal	Regional-only numbers will show the HPV discovery rate for regional inspections within each state. Accurate HPV identification is important for timeliness tracking under the HPV policy, the Watch List, award program screening, and public access to the data.		a
b	High priority violation discovery rate (per source universe - major)	New HPVs identified in fiscal year by the State divided by the number of major sources.	File review recommended for regions/states below 1/2 of the national average. (HPV policy)	Majors	State-only (with Regional-only provided)	AFS	Select major sources with new HPVs identified in the FY. Compare to the number of active major sources.	IDEA	Review Indicator	Assists region in selecting files for review when there is a possible issue.		b
С	No activity indicator - HPV	No HPVs identified by the state in the fiscal year.	HPV policy	All AFS	State-only	AFS	Select sources with new State HPVs identified in the FY.	OTIS Management Reports	Review Indicator	Assists region in selecting files for review when there is a possible issue. Region should examine state enforcement cases to determine whether HPVs were not identified.		С
d	HPV reporting indicator at majors (formal enforcement only)	Metric computes the % of formal actions taken at major sources during the FY that received a prior HPV listing, and benchmarks it to national average.	Targeted file review, in addition to SRF random selection, recommended for regions/states less than half of the national average.	Majors with formal actions	State-only	IDEA or AFS	Select the universe of major CAA sources that received a formal enforcement action within the FY. Compare to the subset of these that were designated as an HPV (source flag, not pathway) within the same FY or the two quarters prior to that FY.	IDEA	Review Indicator	Assists region in selecting files for review when there is a possible issue; for example, if a low percentage of actions received an HPV listing, the region should review files at facilities without such HPV listing.		d
5. 1	he degree to which s	tate enforcement a	ctions include requi	red correctiv	ve or complying a	ctions (inju	nctive relief) that will return s	ources to co	mpliance in	a specific time frame.		5
a	Percentage of formal state enforcement actions that contain a compliance schedule of required actions or activities designed to return the source to compliance. This can be in the form of injunctive relief or other complying actions.	Evaluated based on file reviews protocol using EPA or equivalent state penalty policies for setting injunctive relief.			State-only				Review Indicator			
b	Percentage of formal or informal enforcement responses that return sources to compliance.	Evaluated basd on file review.			State-only				Review Indicator			

	CAA-6					CAA	State Review Framework Metr	ics			OMB Control No.: 2020- 0 Approval expires: 11/3	
	Name	Description	Guidance Requirement or Goal	Universe	Combined Region/State or State-only Data?	Original Source of Data Provided by EPA	Selection Criteria Explanation	Data Pulled From	Metric Type	Notes	Your Suggestions	
6. [Degree to which a sta	te takes timely and	appropriate enforce	ment action	s, in accordance	with policy	relating to specific media.					6
a	Timely action taken to address HPV sources	HPVs that were in unaddressed (no action) status for greater than 270 days. The region should evaluate how the state compares to the national average. Counts sources with at least one HPV month in the last full FY.	HPVs should be addressed with a formal action within 270 days of day zero. Region should determine possible concern based upon state data. (HPV policy)	Sources with HPVs within fiscal year (use last full fiscal year)	State-only (with Regional-only provided)	AFS	Select the total number of flagged unaddressed HPVS (not pathways) during the FY. Compare to the subset of those that have ten or more continuous months (>270 days) of unaddressed HPV status, starting with the first HPV month within the FY.	IDEA	Review Indicator			a
b	Timely action to address individual HPV pathways	HPV entry (6a is source-based) from the AFS "653" report. The	HPVs should be addressed with a formal action within 270 days of day zero (HPV determination date). Region should determine possible concern based upon state data. (HPV policy)	HPV occurrences within fiscal year that have had at least 270 days for response	State-only (with Regional-only provided)	AFS 653 Report	Using the AFS 653 Report, select the total number of unaddressed HPV pathways during the FY. Compare to the subset of those pathways where "DAYS USED TO ADRS" is >270 or "UNADR DAYS" is >270.	AFS	Review Indicator			b
С	No activity indicator - actions	No actions were taken by the state in the fiscal year.	HPV policy	All AFS	State-only	AFS	Select all state formal enforcement actions taken during the FY.	OTIS Management Reports	Review Indicator			С
7. [Degree to which a sta	te includes both gra	avity and economic I	benefit calcu	ılations for all pe	nalties, app	ropriately using the BEN mod	lel or similar	state model	(where in use and consistent v	with national policy).	7
a	Percentage of formal enforcement actions that include calculation for gravity and economic benefit consistent with applicable policies.	File review based on file review protocol using national program policy or applicable state penalty policy.			State-only				Goal			
8. 7	The degree to which p	penalties in final en	forcement actions in	clude econo	omic benefit and	gravity in ac	ccordance with applicable per	alty policies.				8
а	No activity indicator - penalties	No penalties assessed by the state during the fiscal year.	HPV policy	All AFS	State-only	AFS	Select all state formal enforcement actions with penalties taken during the FY.	OTIS Management Reports	Review Indicator			a

	CAA-7					CAA	. State Review Framework Metri	CS			Approval expires: 11/3	.0/08
	Name	Description	Guidance Requirement or Goal	Universe	Combined Region/State or State-only Data?	Original Source of Data Provided by EPA	Selection Criteria Explanation	Data Pulled From	Metric Type	Notes	Your Suggestions	
b	Penalties normally included with formal enforcement actions at HPVs	Percent of enforcement actions taken at HPVs that carry any penalty. This metric does not measure appropriateness of penalties, but does flag when additional review is necessary.	Additional review necessary if state is below 80% actions against HPVs with penalty. HPV policy assumes it is an exception that an HPV receives no penalty.	All state actions at sources that were previously HPVs	State-only	AFS	Select joint, state, or undetermined- lead HPVs in last FY with state formal enforcement actions in last FY. Compare to those with a penalty amount greater than zero.	IDEA	Review Indicator	The 80% figure is based on reality. Guidance does not provide a set cut-off, but expects penalties unless there is an extenuating circumstance. This metric may not be useful if state has identified few HPVs.		b
9.	Degree to which enfor	cement commitme	nts in the PPA/PPG/	categorical	grants (written ag	reements to	o deliver a product/project at	a specified ti	me), if they	exist, are met and any product	s or projects are completed.	9
a	State agreements (PPA/PPG/SEA, etc.) contain enforcement and compliance commitments that are met.	Review of PPAs, PPGs, SEAs, or other documents that list enforcement and compliance commitments.			State-only				Review Indicator			
10	Degree to which the	Minimum Data Req	uirements are timely	·.								10
а	Integrity of HPV data (timely entry)	Percent of HPVs that are entered to AFS more than 60 days after the HPV designation (day zero). Measures the 'lag' between the date of HPV designation, and the actual reporting of the HPV designation to AFS.	Timely and Appropriate Enforcement Response to High Priority Violations policy document states that the data should be entered promptly after the designation is made. HPV entry should not be withheld until the action is completed.	All HPVs	State-only	IDEA using AFS data	IDEA compares the new HPVs that are reported into AFS each month, and compares the date that these HPVs became known to EPA to the HPV designation date that is entered into AFS. Examines the last four quarters of data.	IDEA	Review Indicator	If a problem exists in this area, it negatively impacts timeliness tracking under the HPV policy, the Watch List, award program screening, and public access. For 2005 reviews, all HPVs newly entered after Nov. 2004 are counted; eventually this will change to measuring the last four quarters of data.		a
b	HPV being entered in a timely manner (normally 45 days froi inspection/file review)	The average number of days between the activity that triggered HPV (inspection, review, etc.) and the HPV determination.	HPV determinations are normally required within 45 days, however, extensions are acceptable in certain circumstances. Region should determine if state significantly departs from national averages.		State-only				Informational Metric/Revie w Indicator.			
r	Regions should evaluate what is maintained in AFS by the State and ensure that all minimum data required fields are properly tracked and entered according to accepted schedules, not to exceed 90 days.	Based on quarterly reporting.										b

	CAA-8					CAA	State Review Framework Metri	CS			OMB Control No.: 2020- (Approval expires: 11/3	
	Name	Description	Guidance Requirement or Goal	Universe	Combined Region/State or State-only Data?	Original Source of Data Provided by EPA	Selection Criteria Explanation	Data Pulled From	Metric Type	Notes	Your Suggestions	
11.	Degree to which the I	Minimum Data Req	uirements are accur	ate.								11
a	Indicator of accurate violation/noncompliance data entry		Data quality review triggered if the number of noncompliant sources is lower than the number of HPV sources, i.e., ratio > 100%. (MDRs)	Majors	Combined	AFS	Select all major CAA sources with violations within the FY. Compare to the number of sources: # HPVs / # sources in non-compliance	IDEA	Data Quality	IDEA does not support state-only pull. During file reviews, any violations noted in files should be checked against violation data in AFS.		a
b	Stack test results at	11b1. % of stack tests conducted and reviewed without pass/fail results code entered to AFS	0% (CMS/ICR/MDR)	All stack tests conducted at Fed-Rep Sources	State-only	AFS	Select Total Number of State Stack Tests for active majors, SM, and NESHAP minors in last FY per CAA Management Reports. Compare to the subset of stack tests without a result code of passed or failed.	OTIS Extended CAA Management Reports	Goal			
b	federally-reportable sources	11b2. Number of sources with stack test failures at federally- reportable sources	100% of failures should be reported to AFS.	Same as above	State-only	AFS	Select the Total Number of State Stack Tests (including OWNER/OPERATOR-CONDUCTED SOURCE TEST) for active majors, SM, and NESHAP minors in last FY with a result code of failed.	IDEA	Data Quality	Regions should ensure that states agree with the sources that failed. Regions may want to review HPV/compliance status of these sources to ensure proper data tracking has occurred in AFS. Stack test failures often may trigger an HPV determination (see HPV policy for details).		b
12.	Degree to which the	minimum data requ	irements are compl	ete, unless o	otherwise negotia	ted by the re	egion and state or prescribed	by a nationa	l initiative.			12
	For the following elements to determine the source of					eb site and ens	ure the state agrees with these counts	. If there is disag	greement, addi	tional evaluation should be conducted		
		12a1. AFS operating majors	Region and state should agree on universe count.		N/A	AFS	Select all operating major sources from AFS.	IDEA	Data Quality			
a	Title V universe	12a2. AFS operating majors w/ air program code = V	Region and state should agree on universe count.		N/A	AFS	Select all operating major sources from AFS that have an Air Program Code for Title V (APC1 = V).	IDEA	Data Quality	The region and state should coordinate with Title V permit personnel to ensure accurate Title V universe counts. For TOPS, managed by OAQPS, see http://ttnww.rtpnc.epa.gov/tops/home.cfm (for EPA Intranet users).		a

L. C	egree to which s	tate program has co	mpleted the universe	e of planned i	nspections (add	ressing core i	requirements and federal, stat	e, and regiona	al priorities).				1
а	Inspection coverage for operating Treatment, Storage, and Disposal Facilities (TSDFs)	Per RCRA, region/state should inspect all operating TSDFs within two years; however, if facilities included on the list were not operating for the full two years, inspection is not expected.	Operating TSDFs should be inspected every 2 years.	Operating TSDFs	State-only (but separate combined % also provided)	RCRAInfo	Select all operating TSDFs in RCRAInfo that have been inspected during the past two FYs. Count each facility once regardless of inspection frequency within the timeframe.	IDEA	NPG	Goal	Note re: universe counts: OECA saving End-of-Year universe starting with FY2005 for use where universe counts are require; researching possible enhancements to allow for this on Web site. Trade agreements that are negotiated under national guidance should be tracked using metric 1r below.		а
b	Annual inspection coverage - Active Large Quantity Generators	National measure guidance calls for 20% annual coverage. If the region/state falls into an exception based on regional commitments, the region should fill in reserved items under 1r to indicate actual commitments or agreements.	20% annual inspection coverage for LQGs.	Active LQGs	State-only (but separate combined % also provided)	RCRAInfo	Select all LQGs in RCRAInfo that have been inspected during last full FY. Count each site once regardless of inspection frequency within the timeframe.	IDEA	NPG	Goal	The denominator makes use of the RCRAInfo Version 3 activity status flag. The March 21, 2005 Site ID Guidance document (RCRA Subtitle C EPA Identification Number, Site Status, and Site Tracking Guidance), posted in RCRAInfo, contains detailed activity status information. Regions and states should have their RCRA active universe defined in RCRAInfo. Trade agreements that are negotiated under national guidance should be tracked using 17 below. Note re: universe counts: OECA researching option of using end-of-year universe where universe counts are required.		b

	Name	Description	Guidance Requirement or Goal	Universe	Combined Region/State or State-only Data?	Original Source of Data Provided by EPA	Selection Criteria Explanation	Data Can Be Pulled From		Metric Type	Notes	Your Suggestions	N N
С	coverage - Active Large Quantity	National guidance calls for 100% inspection coverage of LQGs over 5 years.	All LQGs should be inspected within 5 years, though if below the 100%, some may be attributed to universe changes or other reasons.	Active LQGs	State-only (but separate combined % also provided)	RCRAInfo	Select all LQGs in RCRAInfo that have been inspected during past five FYs. Count each site once regardless of inspection frequency within the timeframe.	IDEA	NPG	Goal	The denominator makes use of the RCRAInfo Version 3 activity status flag. The March 21, 2005 Site ID Guidance document (RCRA Subtitle C EPA Identification Number, Site Status, and Site Tracking Guidance), posted in RCRAInfo, contains detailed activity status information. Regions and states should have their RCRA active universe defined in RCRAInfo. Trade agreements that are negotiated under national guidance should be tracked using 1r below. Note re: universe counts: OECA researching option of using end-of-year universe where universe counts are required.		O
d		This is an informational metric showing the percent coverage.	None	Active SQGs	State-only (but separate combined % also provided)	RCRAInfo	Select all SQGs in RCRAInfo that have been inspected during past five FYs. Count each site once regardless of inspection frequency within the timeframe.	IDEA		Informationa I-only	Inspection presence at smaller sites is important, and this metric provides information to regional reviewers. The denominator makes use of the RCRAInfo Version 3 activity status flag. The March 21, 2005 Site ID Guidance document (RCRA Subtitle C EPA Identification Number, Site Status, and Site Tracking Guidance), posted in RCRAInfo, contains detailed activity status information. Regions and states should have their RCRA active universe defined in RCRAInfo. Note reuniverse counts: OECA researching option of using end-of-year universe where universe counts are required.		đ
е	Inspections performed at sites other than those listed in 1a-d in last five years	This is an informational metric showing the number of other inspections performed.	None	All sites other than those listed in 1a-d (using active universe)	State-only (but separate combined # also provided)	RCRAInfo	Select all sites other than those listed in 1a-d that have been inspected during the past five FYs. Count each site once regardless of inspection frequency within the timeframe.	IDEA		Informationa I-only	This metric helps provide a complete picture of state evaluation activity.		е
r	Percent of planned inspections completed	Regions can track yearly	commitments or multi-yea	r plans. Reserve	ed for inspection plan	targets negotiate	d between the region and state.				If states have better active universe numbers than EPA provides in 1a-1d, state-derived results can be put in 1r, however, the region should ensure that the states update and maintain the RCRAInfo active universe. Also, trade agreements that are negotiated under national guidance should be tracked here.		r
2. 1	Degree to which in	spection reports an	d compliance review	s document i	nspection findin	gs, including	accurate description of what	was observed	l to sufficiently	y identify v	olation.		2
а	Percentage of inspection reports that are adequately documented in files.	Evaluated based on file review protocol.			State-only					Goal			
3. I	Degree to which in	spection reports are	completed in a time	ely manner, ir	ncluding timely id	dentification (of violations.						3

4. De	gree to which s	ignificant violations	(e.g., significant nor	ncompliance)	and supporting	information a	re accurately identified and re	ported to EP	A national data	abases in a	timely and accurate manner	' .	4	
	SNC identification ate	This measure assesses whether the region/state are actively identifying SNC problems from evaluations. Numerator=new SNCs in last FY, Denominator=evaluated sites in last FY.	Further discussion recommended for regions/states below 1/2 of the national average.	All sites	State-only (but separate combined % also provided)	RCRAInfo	Select all sites identifed as new SNCs in last full FY. Compare as a percentage to the number of sites inspected during last full FY.	OTIS Management Reports	ERP	Goal	This is a pointer to increased file review. When below half of the national average, it is recommended to review previous enforcement actions and cases in the pipeline to determine whether SNC did occur but was not reported.		а	
	imely SNC	% of SNC determinations (SNY date) completed within 150 days of "Day Zero" (first day of inspection) in last FY.	Goal is 100%	All SNCs	State-only	RCRAInfo	Will be programmed after a year of data is in RCRAInfo Version 3 (FY07).	IDEA	ERP and Data Appendix	Goal	2003 RCRA ERP calls for all SNC deteminations to be made within 150 days of day zero. Data flow in RCRAInfo Version 3. EPA will develop analytic approach to handle SVs converted to SNCs, and discuss the possible need for RCRAInfo to require secondary violator designation.		b	
	now SNCs	No SNCs identified by the state in the fiscal year.	If SNC determinations are not being made, the region should evaluate whether the ERP is being followed.	All sites	State-only	RCRAInfo	Select all sites identified by the state as new SNCs in last FY.	OTIS Management Reports	ERP	Review Indicator	Region should examine state enforcement cases to determine whether SNCs were not identified.		С	
d ir	ndicator (actions eceiving SNC	Metric computes the % of formal actions taken during the Fy that received a prior SNC listing, and benchmarks it to national average.	The RCRA ERP discusses the criteria for listing SNC. SNC normally requires a formal action. Some formal actions are taken at non-SNC, so there is not an expectation that 100% of sites with actions had SNC. File review recommended for regions/states below 1/2 of the national average.	All sites with actions	State-only	RCRAInfo	This measure gives the percentage of state formal enforcement actions taken during the fiscal year at facilities that were in SNC in the fiscal year or in the six months prior. (After this info populated in RCRAInfo V.3, this can look for all enforcement actions without a populated "Addressed SNC Dated" field.)	IDEA	ERP	Review Indicator	Review is recommended for states below half of the national average, though other states appear to have problems in this area, yet are not at half below the national average. There may be legitimate circumstances for sites to make this list; for example, if states take formal actions against all SVs. Metric will assist region when selecting files for review. Corrective action excluded.		d

	Name	Description	Guidance Requirement or Goal	Universe	Combined Region/State or State-only Data?	Original Source of Data Provided by EPA	Selection Criteria Explanation	Data Can Be Pulled From		Metric Type	Notes	Your Suggestions	
5. T	he degree to whic	ch state enforcemen	t actions include req	uired correct	ive or complying	actions (inju	nctive relief) that will return fa	cilities to con	npliance in a s	specific tim	e frame.		5
a	Percentage of formal state enforcement actions that contain a compliance schedule of required actions or activities designed to return the source to compliance. This can be in the form of injunctive relief or other complying actions.	Evaluated based on file review protocol using EPA equivalent state penalty for assessing injunctive relief.			State-only					Review Indicator			
b	Percentage of actions or responses other than formal enforcement that return source to compliance.	Evaluated based on file review.			State-only					Review Indicator			
6. D	egree to which a	state takes timely ar	nd appropriate enfor	cement actio	ns, in accordanc	e with policy	relating to specific media.						6
а	Timely action taken to address SNC	number of SNC sites NOT exceeding 360 days from day zero over number of total SNCs in	actions taken within the fiscal year at SNC sites, 80% of SNC sites	SNC sites	State-only (but separate combined % also provided)	RCRAInfo	Will be programmed after a year of data is in RCRAInfo Version 3.	IDEA	ERP	Review Indicator	Data provided in reviews after RCRAInfo Version 3 in production for one year (FY07). The ERP provides 150 days for informal action, 240 days for an initial formal action, and 360 days for final formal action or referral to the State AG. ERP is effective for all civil activities initiated after it went into effect in 2003. Corrective action excluded.		а
b	No activity indicator - formal actions	No formal actions taken by state in fiscal year.		All sites	State-only	RCRAInfo	Select all state formal enforcement actions in last FY.	OTIS Management Reports	ERP	Review Indicator	If this indicates no actions, then look to see if state takes other sanctions for these violations. Corrective action excluded.		b
7. D	egree to which a	state includes both	gravity and economi	c benefit cal	culations for all p	enalties, usin	g the BEN model or similar st	ate model (wi	here in use an	d consiste	nt with national policy).		7
a	actions that include calculation for gravity and economic benefit	File Review based on national program policy and BEN model or state models in use and consistent with national policy.			State-only					Goal			
8. T	he degree to which	ch penalties in final e	enforcement actions	include ecor	nomic benefit and	d gravity in ac	cordance with applicable pen	alty policies.					8
а		No penalties taken by state in fiscal year.		All sites	State-only	RCRAInfo	Select and sum the dollar amount of all penalties (final assessed penalties and SEP credits) at state enforcement actions (in 200,239 or in 250,339 or in 350,539 or in 550,799) in last FY.	OTIS Management Reports	Required data field in RCRAInfo	Review Indicator	If this indicates no penalties, then look to see if state takes other sanctions for these violations. Corrective action excluded.		a

	RCRA-25 RCRA State Review Framework Metrics OMB Control No. 2020 Appropriate Control No. 2020 Appropria									100			
	Name	Description	Guidance Requirement or Goal	Universe	Combined Region/State or State-only Data?	Original Source of Data Provided by EPA		Data Can Be Pulled From	Guidance	Metric Type	Notes	Your Suggestions	
	Penalties normally	8b1. % of formal enforcement actions that carry any penalty in last FY.	Program review necessary if state is below one half of the national average for % of actions with penalty.	All sites with state formal actions	State-only	RCRAInfo	Select all state formal enforcement actions (in 200,239 or in 250,339 or in 350,539 or in 350,739) with penalties (final assessed penalties and SEP credits) in last FY. Compare to the total number of state formal enforcement actions in last FY.	IDEA		Review Indicator	This metric does not measure appropriateness of penalties, but does flag when additional review is necessary. If no penalties, then look to see if state takes other sanctions for these violations. Note		
b	included with formal enforcement actions	8b2. % of final formal enforcement actions that carry any penalty in last FY.	Program review necessary if state is below one half of the national average for % of actions with penalty.	All sites with state final formal actions	State-only	RCRAInfo	Select all state final formal enforcement actions (in 300,339 or in 350,399 or in 550,699) with penalties (final assessed penalties and SEP credits) in last FY. Compare to the total number of state final formal enforcement actions in last FY.	IDEA		Review Indicator	that under the RCRA ERP not all non-SNC-related actions require a penalty. The action may include other sanctions depending on the situtation and may not include a monetary penalty. Corrective action excluded.		b
9.	Degree to which e	nforcement commitm	nents in the PPA/PP	G/ categorica	l grants (written	agreements to	o deliver a product/project at a	specified tin	ne) are met an	d any prod	ucts or projects are complet	ed.	9
a	State agreements (PPA/PPG/SEA, etc.) contain enforcement and compliance commitments that are met.	Review of PPAs, PPGs, SEAs, etc.			State-only					Review Indicator			
10	. Degree to which t	the Minimum Data R	equirements are time	ely.									10
а	Integrity of SNC data (timely entry)	Percent of SNCs that are entered to RCRAInfo more than 60 days after the determination. Measures the "lag" between the date of SNC determination and the actual reporting of the SNC determination to RCRAInfo.	ERP states that the data should be entered when the determination is made. SNC entry should not be withheld until the action is completed. EPA expects SNC data to be entered more quickly than 60 days, so this metric provides some "cushion".		State-only	IDEA using RCRAInfo data	When a new SNC is seen by IDEA, it is known that the data was entered since the previous monthly RCRAInfo extract (does not provide the exact date). For analytic purposes, it is assumed that newly reported SNCs were put into RCRAInfo on the date of the previous extract. This date is compared to the date entered into RCRAInfo as the SNC (SNY) determination date.	IDEA	ERP and Data Appendix	Review Indicator	If a problem exists in this area, it negatively impacts timeliness tracking under the ERP, the Watch List, award program screening, and public access. There may be legitimate circumstances for sites to make this list, but the region should examine this issue to determine these reasons are valid. Minor additional time lags may occur for translator states.		a
is	Percent of inspections, enforcement actions, or other compliance or enforcement related activities for which there is a Nationally Required Data Element, that are entered into RCRA INFO in a timely manner.	File review	Regions should evaluate what is maintained in RCRAInfo by the State and ensure that all nationally required data elements are properly tracked and entered according to accepted schedules.		State-only								b

11.	Degree to which	Minimum Data Requi	irements are accurat	e.									11	
		11a1. Measures "closeness" between SNC determination and formal enforcement action. Shows the number of sites that were "SNC determined" on same day as formal action.	ERP states that the data should be entered when the determination is made SNC entry should not be withheld until the action is completed.	All SNCs that have reached formal action	State-only	IDEA using RCRAInfo data	This measure compares the date of the SNC with the date of the first formal action that came after the SNC. This method does make some assumptions (e.g., that the action taken doesn't address a previous SNC).	IDEA	ERP and Data Appendix	Review Indicator	If a problem exists in this area, it negatively impacts timeliness tracking under the ERP, the Watch List, award program screening, and public access. There may be legitimate circumstances for sites to make this list, but the region should examine this issue to determine these reasons are valid.			
a		11a2. Measures "closeness" between SNC determination in last FY and formal enforcement action. Shows the number of sites with SNC determination within one week of formal action.	ERP states that the data should be entered when the determination is made SNC entry should not be withheld until the action is completed.	All SNCs that have reached formal action	State-only	IDEA using RCRAInfo data	This measure compares the date of the SNC with the date of the first formal action that came after the SNC. This method does make some assumptions (e.g., that the action taken doesn't address a previous SNC).	IDEA	ERP and Data Appendix	Review Indicator	If a problem exists in this area, it negatively impacts timeliness tracking under the ERP, the Watch List, award program screening, and public access. There may be legitimate circumstances for sites to make this list, but the region should examine this issue to determine these reasons are valid.		a	
b		Number of sites in violation for greater than 3 years. This measure is designed to ensure that violations are given an end date.	The ERP states that sites designated as secondary violators should be re-designated as SNC if the violator does not return to compliance in 240 days.	All sites	Combined	IDEA using RCRAInfo data	Select RCRA sites in violation greater than three years, but not currently in significant noncompliance.	OTIS RCRA interface (select facilities in violation greater than 3 years and not SNC)	Mandatory Data Elements in RCRAInfo	Data Quality	The region should review the site list and determine whether data quality issues exist that need to be addressed or whether SNC designations need to be made. This uses 3 years because that matches the OTIS data pull; however, quidance has a tighter 240-day standard.		b	
12.	Degree to which	to which the minimum data requirements are complete, unless otherwise negotiated by the region and state or prescribed by a national initiative.									12			
			provide the counts to the s repancy and develop an ac				ics site and ensure the state agrees w	ith these counts.	If there is disagre	ement, additio	onal evaluation should be			
		12a1. Number of operating TSDFs in RCRAInfo	Region and state should agree on operating universe count.		State-only	RCRAInfo	Select all operating TSDFs in RCRAInfo. Uses the current RCRAInfo definition of operating TSDF.	IDEA	Required data field in RCRAInfo	Data Quality				
a	Active site universe counts accurate	12a2. Number of active LQGs in RCRAInfo	Region and state should agree on active universe count.		State-only	RCRAInfo	Select all active LQGs in RCRAInfo.
