

ENVIRONMENTAL PROTECTION AGENCY
Nonmaterial or Nonsubstantive Change to an Existing Approved Collection
Justification Statement
Motor Vehicle Emission and Fuel Economy Compliance: Light Duty Vehicles, Light Duty
Trucks, and Highway Motorcycles
OMB Control Number 2060-0104
EPA ICR Number 0783.53

This non-substantive change is to transfer the on-road portions of the Motor Vehicle and Engine Compliance Program Fees burden from 0783.52 (OMB 2060-0104) to ICR 2080.02 (OMB 2060-0545). The latter was a rulemaking ICR covering the addition of recently regulated "off-road" categories of engines to the MVECP fees program. Covering all the fees, both on-road and off-road, in one ICR is a logical reorganization, because all fees are in fact now processed as a single system, with the help of a single contractor, and using the same fees staff; also, the on-line fee filing form now combines both on-road and off-road categories, and the other forms, both paper and electronic, also cover both categories. This is also another step in disaggregating the large 0783 ICR into more easily analyzed and transparent units. The change for ICR 2080.02 has already been submitted to and approved by OMB.
