

**SUPPORTING STATEMENT FOR REQUESTS FOR APPROVAL UNDER
THE PAPERWORK REDUCTION ACT AND 5 CFR 1320
EMPLOYMENT APPLICATION, OMB CONTROL NUMBER 3316-0063**

A. Justification

- 1. Explain the circumstances that make the collection of information necessary. Identify any legal or administrative requirements that necessitate the collection. Attach a copy of the appropriate section of each statute and regulation mandating or authorizing the collection of information.**

Resumes are accepted from the public who have interest in employment with TVA. The TVA Form 1 is required from candidates being considered for employment and is required as part of the employment process. For candidates being considered for an employee/employer relationship they are required to complete the TVA Form 1. For contractors needing extended security clearances they are required to complete the Contractor Security Questionnaire (form TVA 17353). The information on the application (TVA Form 1) is needed to collect information on qualifications, suitability for employment and eligibility for veteran' preference. The information is used to make comparative appraisals and to assist in selections. Data on Convictions (form 9871), Personnel Security Questionnaire Short Form (form 13045A), Contractor Security Questionnaire (form 17353), Veteran's Information (form 3595) , Request for Extension – Veteran's Preference Documents (form 19700), and Applicant Information Sheet (form 17878), are necessary to collect information to initiate company security investigations to determine whether clearances and employment will be granted.

- 2. Indicate how, by whom, and for what purpose the information is to be used. Except for a new collection, indicate the actual use the agency has made of the information received from the current collection.**

The information is used by Human Resource Consultants, Staffing Consultants, Employment Processing Staff, selecting managers, and security personnel to evaluate applicants' qualifications, determine their eligibility for TVA positions, and determine suitability for employment.

- 3. Describe whether, and to what extent, the collection of information involves the use of automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g. permitting electronic submission of responses, and the basis for the decision for adopting this means of collection. Also, describe any consideration of using information technology to reduce burden.**

Technology within TVA allows applicants to submit a resume electronically to apply for TVA's externally posted positions. All resumes are scanned into an electronic data base. This data maintenance/retrieval system allows for less paper handling, fewer hard file needs, more applicant filing space, and access at all times to all applicants. These allowances are the basis for the decision for adopting these means of collection. All other employment forms are currently collected in hardcopy format and are only required once a person has been selected for an interview. TVA is currently using a Resume Builder that allows for automatic data collection for the resume, information required in the TVA Form 1 and supporting documentation. This reduces some of the candidates' burden because information is used from the initial input of data.

- 4. Describe efforts to identify duplication. Show specifically why any similar information already available cannot be used or modified for use for the purposes described in Item 2 above.**

TVA currently electronically searches to match the names, telephone numbers, and addresses on applications/resumes/other forms it receives against those already on file.

- 5. If the collection of information impacts small business or other small entities (Item 5 of OMB Form 83-I), describe any methods used to minimize burden.**

Not Applicable.

6. **Describe the consequence to Federal program or policy activities if the collection is not conducted or is conducted less frequently, as well as any technical or legal obstacles to reducing burden.**

Applicants need apply only one time during a six-month period to be considered for employment, which is a voluntary action and not a collection imposed by TVA. It is also recommended that applicants update their information every six months to assure accuracy of data and to assure the selection process is not adversely affected.

The TVA Form 1 and other employment forms are requested once a candidate has been identified for an interview.

7. **Explain any special circumstances that would cause an information collection to be conducted in a manner:**

- requiring respondents to report information to the agency more often than quarterly;
- requiring respondents to prepare a written response to a collection of information in fewer than 30 days after receipt of it;
- requiring respondents to submit more than an original and two copies of any document;
- requiring respondents to retain records, other than health, medical, government contract, grant-in-aid, or tax records for more than three years;
- in connection with a statistical survey, that is not designed to produce valid and reliable results that can be generalized to the universe of study;
- requiring the use of statistical data classification that has not been reviewed and approved by OMB;

that includes a pledge of confidentiality that is not supported by authority established in statute or regulation, that is not supported by disclosure and data security policies that are consistent with the pledge, or which unnecessarily impedes sharing of data with other agencies for compatible confidential use; or

- requiring respondents to submit proprietary trade secret, or other confidential information unless the agency can demonstrate that it has instituted procedures to protect the information's confidentiality to the extent permitted by law.

None.

8. **If applicable, provide a copy and identify the date and page number of publication in the Federal Register of the agency's notice, required by 5 CFR 1320.8(d), soliciting comments on the information collection prior to submission to OMB. Summarize public comments received in response to that notice and describe actions taken by the agency in response to these comments. Specifically address comments received on cost and hour burden. Describe efforts to consult with persons outside the agency to obtain their views on the availability of data, frequency of collection, the clarity of instructions and recordkeeping, disclosure, or reporting format (if any), and on the data elements to be recorded, disclosed, or reported.**

Consultation with representatives of those from whom information is to be obtained or those who must compile records should occur at least once every 3 years—even if the collection of information activity is the same as in prior periods. There may be circumstances that may preclude consultation in a specific situation. These circumstances should be explained.

Copy of Federal Register Notice is attached. There were no public comments. The pool of applicants for TVA employment is unique and the information is, therefore, not elsewhere available. Feedback about the forms is frequently received from the applicants themselves. Forms TVA 1 and TVA 9871 have been revised to simplify and enhance their utility based, in part, on feedback from applicants.

9. **Explain any decision to provide any payment or gift to respondents, other than reenumeration of contractors or grantees.**

None.

10. Describe any assurance of confidentiality provided to respondents and the basis for the assurance in statute, regulation, or agency policy.

A Privacy Act statement appears on all forms related to the employment application process (forms are listed on form OMB 83-1).

11. Provide additional justification for any questions of a sensitive nature, such as sexual behavior and attitudes, religious beliefs, and other matters that are commonly considered private. This justification should include the reasons why the agency considers the questions necessary, the specific uses to be made of the information, the explanation to be given to persons from whom the information is requested, and any steps to be taken to obtain their consent.

Not applicable.

12. Provide estimates of the hour burden of the collection of information. The statement should:
 - Indicate the number of respondents, frequency of response, annual hour burden, and an explanation of how the burden was estimated. Unless directed to do so, agencies should not conduct special surveys to obtain information on which to base hour burden estimates. Consultation with a sample (fewer than 10) of potential respondents is desirable. If the hour burden on respondents is expected to vary widely because of differences in activity, size, or complexity, show the range of estimated hour burden, and explain the reasons for the variance. Generally, estimates should not include burden hours for customary and usual business practices.

- If this request for approval covers more than one form, provide separate hour burden estimates for each form and aggregate the hour burdens in Item 13 of OMB Form 83-1.

- Provide estimates of annualized cost to respondents for the hour burdens for collections of information, identifying and using appropriate wage rate categories. The cost of contracting out or paying outside parties for information collection activities should not be included here. Instead this cost should be included in Item 14.

Form	Resumes	1	9871	13045A	3595	17353	
a) Number of respondents	<u>17,54331,500</u>		2,113	2,519	1,813	1,680	300
b) Frequency of response	1	1	1	1	1	1	1
c) Number of responses	<u>17,54331,500</u>		2,113	2,519	1,813	1,260	300
d) Hours per response	1.00	1.00	.25	.25	.25	.50	
e) Annual burden	<u>17,54331,500</u>		2,113	630	453	315	150

Resumes = Number of new, duplicate and updated resumes received.

Form 1 = Number of applications requested from interviewees, hires or Interns.

Form 9871 = Number requested from interviewees, hires and Interns including updates.

Form 13045A = Number requested from interviewees, hires and new Interns.

Form 17353 = Used for special company access/evaluation needs, and estimated number of respondents based on randomly selected company organization.

Number of respondents - derived from information technology reports for a one-year period (number of respondents for FY 20036). Actual number of respondents is the number of resumes received. All other forms are initiated after the resumes have been reviewed.

Number of responses - product of (a) x (b).

Hours per response - estimate of time allocated for preparing and returning form(s). The actual hours can vary from one hour for the resume, and one hour to two and a quarter hours to complete the required forms. This will depend on the number of forms that apply to each individual or position.

Annual burden - product of (c) x (d).

The estimated hourly wage (including benefits) for the TVA service area is \$19.00; therefore, the estimated respondent cost is \$598,500 (\$19 x 31,500 hours = \$598,500 total estimated annualized cost to respondents). The hourly wage information was obtained from the PEW Center on the States, a research organization administered by the University of Richmond. A sixty percent load for benefits was added to the \$12.00 from the PEW Center to reach the estimated hourly wage of \$19.00.

13. **Provide an estimate of the total annual cost burden to respondents or recordkeepers resulting from the collection of information. (Do not include the cost of any hour burden shown in Items 12 and 14).**

The cost estimate should be split into two components: (a) a total capital and start-up cost component (annualized over its expected useful life); and (b) a total operation and maintenance and purchase of services component. The estimates should take into account costs associated with generating, maintaining, and disclosing or providing the information. Include descriptions of methods used to estimate major cost factors including system and technology acquisition, expected useful life of capital equipment, the discount rate(s), and the time period over which costs will be incurred. Capital and start-up costs include, among other items, preparations for collecting information such as purchasing computers and software; monitoring, sampling, drilling and testing equipment; and record storage facilities.

If cost estimates are expected to vary widely, agencies should present rates of cost burdens and explain the reasons for the variance. The cost of purchasing or contracting out information collection services should be a part of this cost burden estimate. In developing cost burden estimates, agencies may consult with a sample of respondents (fewer than 10), utilize the 60-day pre-OMB submission public comment process and use existing economic or regulatory impact analysis associated with the rulemaking containing the information collection, as appropriate.

Generally, estimates should not include purchases of equipment or services, or portions thereof, made: (1) prior to October 1, 1995, (2) to achieve regulatory compliance with requirements not associated with the information collection, (3) for reasons other than to provide information or keep records for the government, or (4) as part of customary and usual business or private practices.

None known.

14. **Provide estimates of annualized cost to the Federal government. Also, provide a description of the method used to estimate cost, which should include quantification of hours, operational expenses (such as equipment, overhead, printing, and support staff), and any other expense that would not have been incurred without this collection of information. Agencies also may aggregate cost estimates from Items 12, 13, and 14 in a single table.**

The annual cost for resumes to be collected in TVA is described in terms of manpower. It is estimated that 2 FTE's receive/review/scan resumes and send acknowledgements. For all other employment form approximately 2 FTE's request and process those forms.

Additionally, other possible agency users such as Human Resource Consultants, Security personnel, and managers are estimated to handle the employment forms. The number of personnel who may handle respondent information and the time spent by each on respondent information are dependent upon company employment needs and resulting interviews, offers, and actual employment.

15. **Explain the reasons for any program changes or adjustment reported in Items 13 or 14 of the OMB Form 83-I.**

None

16. **For collections of information whose results will be published, outline plans for tabulation, and publication. Address any complex analytical techniques that will be used. Provide the time schedule for the entire project, including beginning and ending dates of the collection of information, completion of report, publication dates, and other actions.**

Not applicable.

17. **If seeking approval to not display the expiration date for OMB approval of the information collection, explain the reasons that display would be inappropriate:**

Not applicable.

18. **Explain each exception to the certification statement identified in Item 19, "Certification for Paperwork Reduction Act Submissions," of OMB Form 83-I.**

Not applicable.

B. Collections of Information Employing Statistical Methods

The agency should be prepared to justify its decision not to use statistical methods in any case where such methods might reduce burden or improve accuracy of results. When Item 17 on the Form OMB 83-I is checked, "Yes," the following documentation should be included in the Supporting Statement to the extent that it applies to the methods proposed:

1. Describe (including a numerical estimate) the potential respondent universe and any sampling or other respondent selection methods to be used. Data on the number of entities (e.g., establishments, State and local government units, households, or persons) in the universe covered by the collection and in the corresponding sample are to be provided in tabular form for the universe as a whole and for each of the strata in the proposed sample. Indicate expected response rates for the collection as a whole. If the collection had been conducted previously, include the actual response rate achieved during the last collection.
2. Describe the procedures for the collection of information including:
 - * Statistical methodology for stratification and sample selection,
 - * Estimation procedure,
 - * Degree of accuracy needed for the purpose described in the justification,
 - * Unusual problems requiring specialized sampling procedures, and
 - * Any use of periodic (less frequent than annual) data collection cycles to reduce burden.
3. Describe methods to maximize response rates and to deal with issues of non-response. The accuracy and reliability of information collected must be shown to be adequate for intended uses. For collections based on sampling, a special justification must be provided for any collection that will not yield "reliable" data that can be generalized to the universe studied.
4. Describe any tests of procedures or methods to be undertaken. Testing is encouraged as an effective means of refining collections of information to minimize burden and improve utility. Tests must be approved if they call for answers to identical questions from 10 or more respondents. A proposed test or set of test may be submitted for approval separately or in combination with the main collection of information.
5. Provide the name and telephone number of individuals consulted on statistical aspects of the design and the name of the agency unit, contractor(s), grantee(s), or other person(s) who will actually collect and/or analyze the information for the agency.
