MQ311A — FLOUR MILLING PRODUCTS (PRODUCTION, STOCKS, AND CAPACITY)

DEFINITIONS AND SPECIAL INSTRUCTIONS

1. Scope of survey

This survey covers all firms in the United States operating wheat and rye flour mills.

2. Figures to be reported

A separate report should be filed for each active or idle flour mill of your company. If you have an idle mill, please report the maximum quantity of wheat flour that could be produced in that mill in one day if it operated 24 hours.

Please write if you need additional forms.

For each item, report all amounts in the unit of measure shown in the Reference List. Please note that some figures should be rounded to thousands. For example, if you ground 660,020 bushels of wheat flour, report 660.

3. Definitions

The product detail for this survey, as shown in the Reference List, is defined according to standard nomenclature for this industry.

Wheat ground for flour — Represents the purchased weight of wheat ground, including the weight of foreign material (dockage). Includes the milling of Canadian wheat in bond. Measured in bushels of 60 pounds.

Rye ground for flour — Represents the purchased weight of rye ground, including the weight of foreign materials (dockage). Measured in bushels of 56 pounds.

Millfeed — Includes bran, middlings, shorts, and other milling byproducts intended principally for use as feed materials.

Capacity — Represents maximum quantity of flour that can be produced in a mill in 1 day if operating for 24 hours. Include the capacity of idle mills until the mills are reported to be destroyed, dismantled, or abandoned.

Stocks of flour — Represents mill stocks in all positions, sold and unsold.

Production of wheat and rye products — Include the milling of Canadian wheat in bond.
