

aggregating or otherwise refining records in the system. Relevant records are disclosed to such a contractor. The contractor is required to maintain Privacy Act safeguards with respect to such records.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper files and magnetic tape.

RETRIEVABILITY:

Name and address, date of the inventory or survey, and other identifiers permit the retrieval of a computer record of the individual's information contained on magnetic tape. Original records of information are reviewed by the contractor and/or National Center for Health Statistics (NCHS) staff for accuracy and edited, and data with personal identifier (such as name and address) are transferred to magnetic tape. The records are then matched by personal identifiers to produce an unduplicated file of individuals in a health occupation.

SAFEGUARDS:

Measures to prevent unauthorized disclosures are implemented as appropriate for the particular records maintained. NCHS and its contractors implement personnel, physical, and procedural safeguards as follows:

1. **Authorized Users:** Persons authorized and needing to use the records, including project directors, contract officers, interviewers, analysts, statisticians, statistical clerks, and key punch operators on the staffs of the Center and the contractors.

2. **Physical Safeguards:** The manual portions of the records are stored in locked files or offices when not in use. The automated records and the computer equipment are in secured areas with fire extinguishers and sprinkler system. Access to the buildings in which the manual and the automated records are stored is controlled by special entry devices and 24-hour security guards.

3. **Procedural Safeguards:** All employees of NCHS and contractor personnel with access to NCHS records are required, as a condition of employment, to sign an affidavit binding them to nondisclosure of individually identifiable information; periodic training sessions are conducted to reinforce the confidentiality restrictions. Data stored in computers are accessed through the use of passwords/keywords known only to the principal investigators and authorized personnel.

These passwords/keywords are changed frequently.

Contractors who maintain records in this system are instructed to make no further disclosure of the records. Privacy Act requirements are specifically included in contracts for survey and research activities related to this system. The HHS project directors, contract officers, and project officers oversee compliance with these requirements.

These safeguards are in accordance with chapter 45-13, "Safeguarding Records Contained in Systems of Records," of the HHS General Administration Manual; supplementary chapter PHS.hf: 45-13; Part 6, "ADP Systems Security," of the HHS ADP Systems Manual; the National Bureau of Standards of Federal Information Processing Standards (FIPS Pub. 41 and FIPS Pub. 312); and the NCHS Staff Manual on Confidentiality.

RETENTION AND DISPOSAL:

The original records are retained in the offices of national professional associations and/or State boards of licensure, or the NCHS data processing facility until the process of conversion to magnetic tape and verification of information is completed and a subsequent inventory or survey is initiated. For these reasons the records may be retained for a period of up to five years before disposal.

SYSTEM MANAGER(S) AND ADDRESS:

Director, National Center for Health Statistics, Center Building, Room 2-19, 3700 East-West Highway, Hyattsville, Maryland 20782.

NOTIFICATION PROCEDURE:

To determine if a record exists, write to the System Manager at the above address.

RECORD ACCESS PROCEDURE:

Access to record systems which have been granted an exemption from the Privacy Act access requirement may be made at the discretion of the System Manager. Positive identification is required from anyone seeking access. Appeal of access refusal may be made to the Director, Office of Management, Public Health Service. An individual may also request an accounting of disclosure of his/her record, if any.

CONTESTING RECORD PROCEDURES:

If access has been granted, contact the System Manager and reasonably identify the record, specify the information being contested, and state the corrective action sought, with supporting information to show how the

record is inaccurate, incomplete, untimely, or irrelevant.

RECORD SOURCE CATEGORIES:

Health practitioners, state licensing agencies, or professional associations.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

With respect to this system of records, exemption has been granted from the requirements contained in subsections 552a(c)(3), (d)(1) through (4), and (e)(4)(G) and (H) in accordance with the provisions of subsection 552a(k)(4) of the Privacy Act of 1974. The reasons that the system has been exempted is that this system contains only records required by statute to be maintained and used solely as statistical records. The exemption was published in the Federal Register, October 8, 1975, page 47413.

69-37-0012

SYSTEM NAME:

Vital Statistics for Births, Deaths, Fetal Deaths, Marriages and Divorces Occuring in the United States during Each year. HHS/OASH/NCHS.

SECURITY CLASSIFICATION:

None

SYSTEM LOCATION:

Room 2-19, Center Building, 3700 East-West Highway, Hyattsville, Maryland 20782;

Federal Records Center, 4205 Suitland Road, Suitland, Maryland 20409.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Individuals who are born and their parents; individuals who die; individuals who are married or divorced; and parents experiencing fetal deaths.

CATEGORIES OF RECORDS IN THE SYSTEM:

The records include microfilm images of State records or machine-readable data prepared by the State from records collected under the laws of each State for births, deaths fetal deaths, marriages and divorces. The records contain the demographic characteristics of individuals associated with each event. In addition, the birth records include information on the characteristics of each live birth, the health status of the infant, and socioeconomic characteristics of the parents. The death records contain medical information relating to cause of death and to socioeconomic characteristics of the deceased; the fetal death record contains medical information relating to cause of death and socioeconomic characteristics of the parents. Marriages

and divorces include demographic and socioeconomic characteristics of both parties to the event and legal information regarding the event.

Periodically the National Center for Health Statistics (NCHS) conducts followback surveys, collecting information on random samples of births and deaths through mail questionnaires. The content of questionnaires for the followback surveys varies. Past surveys have collected information on such topics as hospital utilization in the last year of life, smoking habits of the deceased, health status of infants, and pregnancy and employment histories of mothers.

Lists of names and other identifying information in the system are provided to NCHS by individuals and organizations who for health research purposes seek to have them matched against files of decedents in order to identify State death records.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Public Health Service Act, Section 306(h) (42 U.S.C. 242k.)

PURPOSE(S):

The data are used for statistical purposes only. Uses within the Department include the preparation of aggregated data in the form of statistical tables for publication, analysis, and interpretation, to meet the legislative mandates of 42 U.S.C. 242k, i.e., to determine the extent and nature of illness and disability of the population of the U.S., including life expectancy and levels of infant and maternal mortality, environmental and other health hazards, trends in family formation, growth, and dissolution, and other related matters. The followback surveys are designed primarily to expand the scope of data that NCHS can collect from the national registration system, to make the registration system more responsive to changing needs for data, and to evaluate the quality of data collected on the birth and death records.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The processed data are disseminated for public use in forms that do not permit identification of individuals, such as published statistical tables, special unpublished tabulations, and public use computer tapes, which carry no individual identifiers. They are used by members of Congress and their staffs, other executive branch agencies, state and city governments, public and private research institutions, life insurance companies, faculty and students of universities, physicians,

workers in health information, newspaper reporters and feature writers, etc. The findings are used to make determinations on needs for legislation, appropriations, and programs in the health field; to pinpoint health problems, measure progress of national health programs, and make population estimates; for epidemiological studies, marketing research, sociological studies, and studies of the family; and for other research directed at understanding our society.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper files and magnetic tapes.

RETRIEVABILITY:

Some States submit microfilm copies of certificates of birth, death, fetal death, marriage, and divorce, and statistics are extracted from them. These microfilms contain individual identifiers; they are the only individually identified records in the system. Other States submit vital statistics data on magnetic tape, showing only a State file number for each case but no personal identifiers

SAFEGUARDS:

Measures to prevent unauthorized disclosures are implemented as appropriate for the particular records maintained. NCHS and its contractors implement personnel, physical, and procedural safeguards as follows:

1. **Authorized Users:** Persons authorized and needing to use the records, including project directors, contract officers, interviewers, analysts, statisticians, statistical clerks, and key punch operators on the staffs of the Center and the contractors.

2. **Physical Safeguards:** The manual portions of the records are stored in locked files or offices when not in use. (The automated portions of the records do not contain individually identifiable data. Because they are not subject to the Privacy Act, descriptions of the computer safeguards used are not included in this notice.) Access to the buildings in which the manual records are stored is controlled by special entry devices and 24-hour security guards.

3. **Procedural Safeguards:** All employees of NCHS and contractor personnel with access to NCHS records are required, as a condition of employment, to sign an affidavit binding them to nondisclosure of individually identifiable information; periodic training sessions are conducted to reinforce the confidentiality restrictions.

Contractors who maintain records in this system are instructed to make no further disclosure of the records. Privacy Act requirements are specifically included in contracts for survey and research activities related to this system. The HHS project directors, contract officers, and project officers oversee compliance with these requirements.

These safeguards are in accordance with chapter 45-13, "Safeguarding Records Contained in Systems of Records," of the HHS General Administration Manual; supplementary chapter PHS.hf: 45-13; the National Bureau of Standards Federal Information Processing Standards (FIPS Pub. 41 and FIPS Pub. 312); and the NCHS Staff Manual on Confidentiality.

RETENTION AND DISPOSAL:

The microfilm copies of the individually identifiable records are retained in office files of NCHS until the process of conversion to magnetic tape and verification of information is completed. The death records are sent to the Federal Records Center ten years after tabulation for deaths occurring during the three year period surrounding census years and one year after tabulation for other years. They are held until disposed of, 15 years after tabulation for deaths of the censal years, and five years after tabulation for other years. Records of births, fetal deaths, marriages, and divorces are disposed of two years after tabulation. The questionnaires for the followback surveys are destroyed after conversion to magnetic tape, tabulation, and analyses have been completed.

SYSTEM MANAGER(S) AND ADDRESS:

Director, National Center for Health Statistics, Center Building, Room 2-19, 3700 East-West Highway, Hyattsville, Maryland 20782.

NOTIFICATION PROCEDURE:

To determine if a record exists, write to the System Manager at the above address.

RECORD ACCESS PROCEDURE:

Access to record systems which have been granted an exemption from the Privacy Act access requirement may be made at the discretion of the System Manager. Positive identification is required from anyone seeking access. Appeal of access refusal may be made to the Director, Office of Management, Public Health Service. An individual may also request an accounting of disclosures of his/her record, if any.

CONTESTING RECORD PROCEDURES:

If access has been granted, contact the System Manager and reasonably identify the record, specify the information being contested, and state the corrective action sought with supporting information to show how the record is inaccurate, incomplete, untimely, or irrelevant.

RECORD SOURCE CATEGORIES:

Vital statistics records are obtained from State vital statistics offices, or, in rare instances, from other State or county repositories of marriage or divorce data. Information in followback surveys is obtained from hospitals, physicians, or relatives of the infants or the deceased.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

With respect to this system of records, exemption has been granted from the requirements contained in subsections 552a(c)(3), (d)(1) through (4), and (e)(4)(G) and (H), in accordance with the provision of subsection 552a(k)(4) of the Privacy Act of 1974. The reason that this system has been exempted is that this system contains only records required by statute to be maintained and used solely as statistical records. The exemption was published in the Federal Register, October 6, 1975, page 47413.

69-37-0013

SYSTEM NAME:

Health Resources Utilization Statistics. HHS/OASH/NCHS.

SECURITY CLASSIFICATION:

None.

SYSTEM LOCATION:

Room 2-19, Center Building, 3700 East-West Highway, Hyattsville, Maryland 20782; Federal Records Center, 4205 Suitland Road, Suitland, Maryland 20409; and at selected contractor locations. A current list of contractor sites is available by writing to the System Manager at the address below.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Recipients of medical care included in statistical surveys and reports of the National Center for Health Statistics (NCHS), including but not limited to: (1) Staff and residents of nursing homes selected by random sampling techniques to be representative of nursing homes in the U.S. (2) physicians providing medical care and patients visiting such physicians; (3) patient medical records from selected short-stay hospitals.

CATEGORIES OF RECORDS IN THE SYSTEM:

Records containing information on: (1) The utilization of long-term care and nursing home care through data on clients and residents (demographic and social characteristics, health status and charges paid for care) and the facility (general characteristics certification, services offered and expense); (2) the demographic characteristics, medical and other problems of persons visiting physicians, and the physicians' diagnoses, treatment, and disposition decisions made during such visits as obtained from physicians during randomly assigned one-week survey periods; (3) the demographic characteristics administrative information (admission and discharge dates, discharge status, and medical record number), and medical information (diagnoses and surgical procedures) abstracted from the face sheet of short-stay hospital medical records; (4) records of family planning medical services provided by the clinics participating in a nationwide sample survey reporting system, the demographic and socioeconomic characteristics, including education and welfare status, of the recipients of these services, and the extent to which these services (excluding physicians' offices) are funded by Federal grants.

In many cases, these records do not contain individual identifiers when they come under control of the National Center for Health Statistics; they carry only sequence numbers, which only the originating agency would be able to translate into a personal identifier—and even then, not in all cases. Names of residents and staff of nursing homes and patients of physicians are listed on separated forms for sampling purposes only and are not included in the final statistical records.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Public Health Service Act, Section 306(b) (42 U.S.C. 242k).

PURPOSE(S)

The data are used for statistical purposes only, as specified by statute, Section 306(d) of 42 U.S.C. 242m. Uses within the Department include the preparation of aggregated data in the form of statistical tables for publication, analysis and interpretation to meet the legislative mandates of 42 U.S.C. 242k. I.e., collection of statistics on the utilization of health services, including the utilization of: (1) Long-term care services and nursing home facilities to determine levels of illness and disability, effects on the serviced population, and the costs of care; (2)

ambulatory health services by specialties and types of practice of the health professionals providing such services; (3) short-stay hospitals to determine characteristics of patients, length of stay, diagnosis and surgical operations, and utilization patterns of care in hospitals of different size and ownership; (4) family planning facilities to provide statistics on the size of and services dispensed by these facilities, the numbers and characteristics of family planning patients, the overall proportion of the "target population" which is being reached by family planning programs on a national scale, and the like. The family planning data are distributed to the Deputy Assistant Secretary for Population Affairs, DHHS, and the Bureau of Community Health Services in the Health Resources and Services Administration for the purpose of executing national family planning programs.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The data are disseminated in forms which do not permit the identification of individuals, such as publications of statistical tables, special requested tabulations, and public use computer tapes. These are communicated to interested persons outside DHHS, such as members of Congress and their staffs, other executive branch agencies, universities and medical schools, state and local health planning agencies, private foundations, etc. The findings are used by demographers, sociologists, health statisticians, epidemiologists, medical educators, health planners, other scholars, and concerned citizens, to evaluate health matters, make determinations on needs for legislation, appropriations, new service programs, and the like.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:**STORAGE:**

Paper files and magnetic tapes.

RETRIEVABILITY:

Data are retrieved by individual identifier only in the editing stage of data processing and only for the purpose of correcting errors in the recording of information. Original survey records are reviewed for accuracy and edited, then data (without personal identifiers such as name or Social Security Number) are transferred to magnetic tape.

SAFEGUARDS:

Measures to prevent unauthorized disclosures are implemented as
