**READ (OR PARAPHRASE) THE FOLLOWING TO THE SUBJECT
AFTER THE INFORMED CONSENT IS SIGNED:**

(Thank you for participating in our study. The National Survey on Drug Use and Health is a large survey given to about 70,000 people across the country every year. It collects information on many health-related issues. The aim is to better serve all segments of the U.S. population. Right now we're interested in testing some new questions we might want to use in the study. Before we use them, we want to see how well people understand these question and how they might go about answering them.)

During this process, I will show you how to use our project laptop and you will enter your answers to questions about use of certain drugs and about health issues into the computer. My job is to take a lot of notes and to figure out how potential respondents think about these questions. There are no right or wrong answers to the questions I ask. Our main goal is to make sure that the questions make sense and that people can answer them easily. You can help us by pointing out anything you find confusing or unclear. If something doesn't make sense, tell me that. Or if you're not sure about your response, tell me that too. When we're done you'll receive a Visa gift card for your participation.

Do you have any questions? [ANSWER ANY QUESTIONS].

OK, let's begin.
